Dear Fellow Citizens:

Current and accurate statistical information plays an important role in the development of any effective marketing program.

Recognizing this fact, the Florida Department of Agriculture has cooperated with the United States Department of Agriculture in compiling this statistical livestock summary for the State of Florida.

We trust that you will find this report a valuable aid.

Sincerely,

Doyle Conner

LIVESTOCK SUMMARY

INTRODUCTION

This publication continues the series began in 1963 and is designed to bring together under one cover available livestock statistics from various sources.

For the most part, this issue presents production and inventory statistics from 1950 to date and price statistics 1945 to date. The production, disposition, and income estimates for 1960-64 have been revised on the basis of data obtained from the 1964 Census of Agriculture and other data which have become available since the original estimates were made. Those desiring historical data prior to 1945 may request the 1963 issue which presents the entire series of record.

Copies of the 1963-68 issues are available free upon request as long as the supply lasts by writing to the Florida Crop and Livestock Reporting Service, 1222 Woodward Street, Orlando, Florida 32803.

CATTLE AND CALVES ON FARMS

The January 1, 1969 inventory of all cattle and calves, including both beef and dairy types, totaled 1,804,000 head. This year's beginning inventory marked the fourth consecutive decline since January 1, 1965 when cattle numbers peaked at 1,892,000 head. This decrease represents a gradual reduction in beef cattle numbers with annual dairy inventories virtually unchanged since 1966. Over the past five years beef cattle and calves have averaged 87 percent of total inventories and dairy animals 13 percent.

Beef cattle and calves numbered 1,564,000 head on January 1, 1969 compared with 1,572,000 a year earlier. Brood cows and heifers and bulls over one year of age registered increases while inventories for classes declined. Brood cows constituted 57.1 percent of beef cattle compared with 55.4 percent the previous year.

Dairy cattle and calves totaled 240,000 head on January 1, slightly less than a year earlier. Dairy heifers 1-2 years ago represented the decrease of 1,000 head. Inventories for other classes of dairy anumals were unchanged from their January 1, 1968 levels.

On January 1, 1969 FLORIDA ranked 23rd in the nation in total cattle and calves, 27th in dairy and 19th in beef cattle inventories. In the cows 2 years and over class, FLORIDA ranked 24th in dairy and 17th in beef cows among the 50 states.

CASH RECEIPTS

Cash receipts from cattle and calves marketed in 1968 set a new high totaling $122,553,000, up 1 percent from 1967. The increase resulted from both greater marketings and higher prices and topped the high of $120,994,000 set in 1967. Cattle prices in 1968 averaged $21.60 per hundredweight compared with $20.60 in 1967. Calf prices averaged $25.80 per hundredweight compared to $24.30 in 1967. Marketings of cattle and calves in 1968 totaled 539,950,000 pounds, 4 percent less than the previous year. Receipts from hog marketings totaled $12,711,000 in 1968, a decrease of 2 percent over 1967. Greater supply and lower prices contributed to the decrease. Prices received for hogs averaged $17.60 per hundredweight in 1968, $.70 lower than the previous year's price.

HOGS ON FARMS

The January 1, 1969 hog inventory in Florida totaled 328,000 head, 8 percent above a year earlier. Hog numbers have been gradually declining since the early 1950's. Pig's saved in 1968 totaled 452,000 head, up 2 percent from 1967. Pigs per litter in the spring of 1968 averaged 6.8 compared with 6.9 a year earlier. Fall 1968 farrowings averaged 6.9 pigs per litter compared to 7.1 a year earlier.

On January 1, 1969 in the UNITED STATES there were 57,205,000 hogs and pigs, an increase of 4 percent over January 1, 1968. All sheep and lambs on hand in the UNITED STATES January 1, 1969 totaled 21,111,000 head, 5 percent below a year earlier.

1/ Balance sheet estimates. Total of marketings, farm slaughter, deaths, and on hand end of year equals total of calf crop, inshipments and on hand beginning of year. 2/ Not strictly a calving rate. Figure represents calves born expressed as percentage of the number of cows and heifers 2 years old and over on farms and ranches January 1. 3/ Excludes interfarm sales, but includes animals custom slaughtered for use on farms where produced. 4/ Does not include animals custom slaughtered for farmers at commercial establishments.

1/ Civilian consumption only, beginning 1941. 2/ Approximately at wholesale level of distribution. 3/ Equivalent eviscerated weight basis. Although most of the poultry was sold in dressed form until the 1940's, most is now sold ready to cook. The entire series was put on the latter basis to achieve comparability. 4/ Measured approximately at wholesale level of distribution. Average weight of eggs 1909-46 is assumed to be 1.5 pounds per dozen; conversion factor subsequently increased 0.01 pound each year through 1952, remained at 1.56 through 1956, thereafter 1.57. This change in factor allowed for the increasing size of eggs marketed. 5/ Not Available. 6/ Preliminary.
