DOYLE CONNER
COMMISSIONER

STATE OF FLORIDA
DEPARTMENT OF AGRICULTURE
THE CAPITOL
TALLAHASSEE
32304

Dear Fellow Citizens:

Current and accurate statistical information plays an important role in the development of any effective marketing program.

Recognizing this fact, the Florida Department of Agriculture has cooperated with the United States Department of Agriculture in compiling this statistical livestock summary for the State of Florida.

We trust that you will find this report a valuable aid.

Sincerely,

Doyle Conner

LIVESTOCK SUMMARY

INTRODUCTION

This publication continues the series began in 1963 and is designed to bring together under one cover available livestock statistics from various sources.

For the most part, this issue presents production, and inventory statistics from 1955 to date and price statistics 1950 to date. The production, disposition, and income estimates for some years have been revised on the basis of data obtained from the 1964 Census of Agriculture and other data which have become available since the original estimates were made.

Copies of the 1963-69 issues are available free upon request as long as the supply lasts by writing to the Florida Crop and Livestock Reporting Service, 1222 Woodward Street, Orlando, Florida 32803.

CATTLE AND CALVES ON FARMS

Florida's January 1, 1970 inventory of all cattle and calves, including both beef and dairy animals, totaled 1,827,000 head. The increase of 18,000 head over a year earlier reversed a declining trend in cattle numbers that had continued since 1965. Cows and heifers aged 2 years and older began 1970 at a record high of 1,108,000 head. Beef herds gained 13,000 head while dairymen were adding 5,000 milk cows to dairy herds. Over the past five years beef cattle and calves have averaged 87 percent of total inventories and dairy animals 13 percent. Nationally, all cattle and calves numbered 112.3 million head on January 1, 1970. Beef cattle and calves accounted for 81 percent of the U. S. herd while milk cows and heifers made up 19 percent.

Beef cattle and calves on Florida farms and ranches numbered 1,577,000 head as 1970 began. All classes except steers aged 1 year and older, showed slight increases over a year earlier. Cows and heifers aged 2 years and older increased 2 percent and reached a new peak of 909,000 head. Heifers 1-2 years age numbered 168,000 compared with 163,000 on January 1, 1969. Beef cows on all U. S. farms increased 3 percent while heifers 1-2 years age were 4 percent over the previous year.

Dairy cattle and calves totaled 250,000 head on January 1, 4 percent above a year earlier. Dairy cows and heifers 2 years and older represent the increase of 5,000 head. Inventories for other classes of dairy animals were unchanged from their January 1, 1969 levels.

On January 1, 1970 FLORIDA ranked 23rd in the nation in total cattle and calves, 27th in dairy and 20th in beef cattle inventories. In the cows 2 years and over class, FLORIDA ranked 23rd in dairy and 17th in beef cows among the 50 states. During 1969, 407,240 cattle and calves were shipped out of Florida.

CASH RECEIPTS

Cash receipts from cattle and calves marketed in 1969 set a new high totaling $136,995,000, up 27 percent from 1968. The increase resulted from both greater marketings and higher prices and topped the high of $120,994,000 set in 1967. Cattle prices in 1969 averaged $23.90 per hundredweight compared with $21.60 in 1968. Calf prices averaged $30.20 per hundredweight compared to $25.80 in 1968. Marketings of cattle and calves in 1969 totaled 525,827,000 pounds, 11 percent more than the previous year. Receipts from hog marketings totaled $17,694,000 in 1969, an increase of 28 percent over 1968. Greater supply and higher prices contributed to the increase. Prices received for hogs averaged $21.00 per hundredweight in 1969, $3.40 higher than the previous year's price.

HOGS ON FARMS

The December 1, 1969 hog inventory in Florida totaled 331,000 head, 5 percent below a year earlier. Hog numbers have been gradually declining since the early 1950's. Pig's saved in 1969 totaled 487,000 head, up 2 percent from 1968. Pigs per litter in the spring of 1969 averaged 7.1 compared with 6.8 a year earlier. Fall 1969 farrowings averaged 6.6 pigs per litter compared to 6.9 a year earlier.

On December 1, 1969 in the UNITED STATES there were 56,743,000 hogs and pigs, a decrease of 6 percent over December 1, 1968. All sheep and lambs on hand in the UNITED STATES January 1, 1970 totaled 20,422,000 head, 4 percent below a year earlier.

1/ Balance sheet estimates. Total of marketings, farm slaughter, deaths, and on hand end of year equals total of calf crop, inshipments and on hand begining of year. 2/ Not strictly a calving rate. Figure represents calves born expressed as percentage of the number of cows and heifers 2 years old and over on farms and ranches January 1. 3/ Excludes interfarm sales, but includes animals custom slaughtered for use on farms where produced. 4/ Does not include animals custom slaughtered for farmers at commercial establishments.

1/ Civilian consumption only, beginning 1941. 2/ Approximately at wholesale level of distribution. 3/ Equivalent eviscerated weight basis. Although most of the poultry was sold in dressed form until the 1940's, most is now sold ready to cook. The entire series was put on the latter basis to achieve comparability. 4/ Measured approximately at wholesale level of distribution. Average weight of eggs 1909-46 is assumed to be 1.5 pounds per dozen; conversion factor subsequently increased 0.01 pound each year through 1952, remained at 1.56 through 1956, thereafter 1.57. This change in factor allowed for the increasing size of eggs marketed. 5/ Not Available. 6/ Preliminary.
