ACKNOWLEDGMENT

This report is made possible through a cooperative effort of the Florida Agricultural Statistics Service, USDA, and the Florida Department of Agriculture and Consumer Services. Cover photo provided by the Florida Cattleman's Association and Market News Service, FDACS.

Many agricultural producers, associated allied industries, and government agencies associated with the livestock industry voluntarily supplied basic data used to develop these statistics. Their contributions are sincerely appreciated.

Published June 1997

FLORIDA CASH RECEIPTS SUMMARY

Florida's livestock industry had gross receipts of $1.15 billion during 1996, an increase of $20 million from 1995.

Milk sales at $431 million remained the largest contributor to gross receipts. Receipts from milk receipts were up from 1995 by $68 million, a ten year high. Cattle and calf sales brought in $217 million, down $73 million from the previous year, and the lowest since 1976. Chickens and egg receipts in 1996 were $354 million, $39 million more than 1995 and a record high.

Hog receipts increased by 2.8 million dollars. Honey receipts were $23 million, an increase of $11 million over 1995. The "Other" category, (which includes horses, goats, sheep, aquaculture products, and other categories not listed separately) at $110 million, decreased by $27 million from 1995.

DAIRY SUMMARY

Florida dairies produced 2.40 billion pounds of milk in 1996. This was 20 million pounds more than produced during 1995 but 222 million pounds less than the production of 1994.

An average of 156,000 milk cows were on Florida farms and commercial dairies in 1996. This was a decrease of 6,000 head from 1995. Compared to other States, Florida ranked 14th among the States in the average number of milk cows, as well as 16th in total milk production.

Cash receipts from marketings of Florida milk in 1996 totaled 431 million dollars, $68 million more than 1995.

Total United States milk production was 154.3 billion pounds in 1996, compared to 155.4 billion pounds in 1995. The average number of milk cows on U.S. farms and dairies during 1996 was 9,351,000 a decline of 107,000 from 1995. The average annual milk production per cow was 16,505 pounds, above last year's level of 16,433 pounds.

Nationwide, cash receipts from marketings of milk during 1996 totaled 22.8 billion dollars, up $2.9 billion from 1995. Production returns averaged $14.94 per hundredweight, $2.01 more than the 1995 average of $12.93 per hundredweight.

1997 COUNTY SUMMARY

Okeechobee County continues to be the leading county in Florida with almost 2.5 times as many dairy cows as any other county. The three leading counties (Okeechobee, Gilchrist, and Lafayette) account for just over one-third of the dairy cows in Florida.

FLORIDA MILK COWS Inventory by county, January 1, 1992-97

[1/] Partial balance sheet estimates by States: The sum of inventory, January 1, 1996, calf crop and inshipments is equal to the sum of marketings, farm slaughter, deaths, and inventory, January 1, 1997. Farm slaughter and deaths are not included in this table. [2/] Excludes interfarm sales within State, but includes custom slaughter for use on farms where produced.

[1] An operation is any place having one or more head of beef cows on hand at any time during the year. [2] Combined with other size groups.

POULTRY AND EGG SUMMARY

VALUE

The total value of Florida chicken and egg production in 1996 was $353.8 million, up from $315.0 million in 1995. Egg production was valued at $122.1 million, up 28 percent from the previous year. The average annual price for eggs (hatching and table eggs combined) was 63.3 cents per dozen, 15.2 cents more than in 1995, and the highest price since 1984.

The value of broilers produced in Florida during 1996 totaled $230.6 million, up from $218.4 million of a year earlier. The average annual price of broilers in 1996 was 39.7 cents per pound, an increase of 6.2 cents per pound from 1995, and a record high.

The value of sales from Other Chickens (spent hens, excluding broilers) was $1.1 million, up slightly from 1995.

INVENTORY

The average number of layers during 1996 was 8.96 million, down two percent from the previous year. Layers continued the steady downward trend of the past 15 years. Hens and pullets of laying age on farms on December 1, 1996, were 9.0 million, of which 4.3 million were 1 year and older. Pullets not yet of laying age numbered 1.3 million, down from 1.6 million pullets in 1995.

PRODUCTION

Florida broiler production in 1996 totaled 591.3 million pounds, down four percent from 1995. Broilers raised in Florida during 1996 totaled 131.4 million birds, down six percent from 1995.

Egg production totaled 2,314 million, down three percent from 1995. The average eggs laid per layer during 1996 was 258 eggs.

Commercial hatcheries produced 134.3 million straight run chicks in 1996, up slightly from 134.0 million in 1995. Broiler-type chicks accounted for 90 percent, and egg-type chicks 10 percent of the total chicks hatched.

TERMS AND DEFINITIONS

BROILERS are meat-type chickens raised commercially and usually marketed around 7 weeks of age.

EGGS include both table and hatching eggs. Market egg prices are calculated on a farm basis, cases exchanged. They include all grades and sizes, but exclude charges for hauling, grading or packaging. Prices for hatching eggs are not published separately. Annual egg production, price, and value statistics are for table and hatching eggs combined.

OTHER POULTRY cash receipts include chickens other than broilers, turkeys, and miscellaneous farm poultry.

CURRENT YEAR data are preliminary and subject to revision.

SURVEY METHODOLOGY–Estimates for hens and pullets of laying age, pullets not yet of laying age, and of egg production are based upon data obtained from a sample of commercial chicken and egg producers. This sample is selected from the universe of Florida poultry management units, and includes approximately 98 percent of the total commercial laying flock.

During December of each year, all known commercial egg producers in Florida are contacted. This complete enumeration establishes the annual universe of management units. Management units include all independent producers as well as contractors who report for all contractees.

CHICKENS AND EGGS: Value of Production, Florida, 1982-1996

Year	Broilers	Eggs	Other chickens [1/]	Total
		Thousand dollars		
1982	99,677	122,471	2,783	224,931

[1] 1987-96 data are on pages 75 and 78 for hogs and pigs. [2] Inventory as of January 1 prior to 1965 and as of December 1 preceding year beginning in 1965.

HONEY

FLORIDA: Honey production in 1996, at 25,200,000 pounds, increased 27 percent from the 1995 production of 19,780,000 pounds. Florida ranked second to California in honey production during the year. There were 240,000 colonies, 10,000 more colonies than in 1995. The yield was 105 pounds per colony, up 19 pounds from 1995. Producers in Florida received an average of 91 cents per pound, 27 cents per pound above the 1995 average price. The total value of Florida production increased from $12,659,000 in 1995, to $22,932,000, in 1996.

UNITED STATES: Honey production in 1996 from producers with five or more colonies totaled 198 million pounds, down 6 percent from 1995. There were 2.57 million colonies producing honey in 1996, compared with 2.65 million in 1995. Yield per colony averaged 77.2 pounds, down 2.3 pounds from the 79.5 pounds in 1995. Colonies which produced in more than one State were counted in each State and yields per colony may be understated. Producer honey stocks were 47.0 million pounds on December 15, 1996, up 11 percent from a year earlier.

Prices for the 1996 crop averaged a record high 89.4 cents per pound, up 31 percent from the previous record price of 68.5 cents in 1995. Prices are based on retail sales by producers and sales to private processors and co-ops. At the U.S. level, prices for each color are derived by weighting State average prices by the State quantities sold. Prices were higher for all color classes in 1996.

FLORIDA CATFISH

There were 12 catfish operations in Florida on January 1, 1997 with a water surface area of 100 acres and total sales in 1996 of $148,000. Of these 100 acres, 20 acres were used for broodfish.

15 SELECTED STATES

Catfish growers in the 15 selected States had sales of $417 million during 1996. These sales were up 4 percent from the 1995 total of $400 million. Sales of all foodsize fish totaled $389 million, up 3 percent from last year's total of $378 million. Sales of fingerlings and fry totaled $21.6 million, compared with $16.1 million in sales during 1995. Sales of stockers totaled $4.81 million, up 1 percent from the $4.76 million in sales during 1995. Sales of broodfish previously used for breeding totaled $383 thousand, compared with $319 thousand during 1995.

Direct sales to processors accounted for 96 percent of the total sales of foodsize fish. Thirty-six percent of the stocker sales were to other producers.

The total number of operations on January 1, 1997, in the 15 selected States was 1,302, down 2 percent from the January 1, 1996, total of 1,328. The number of operations in the top 4 producing States (AL, AR, LA, and MS), however, increased 1 percent from January 1, 1996.

The water surface acres being used for catfish production totaled 177,000 acres, up 6 percent from the January 1, 1996, total. Of the total acres, 5,530 are to be renovated during the period of January 1, 1997, to June 30, 1997. An additional 4,650 acres are under construction or expected to be constructed and in use by July 1, 1997. During the period of July 1, 1996, through December 31, 1996, 2,475 acres were taken out of production. As of January 1, 1997, 6,055 acres were being used for broodfish production.

Catfish producers had 1.16 million broodfish on hand January 1, 1997, down 1 percent from the 1.17 million on hand January, 1, 1996. All foodsize fish on hand totaled 271 million on January 1, 1997, up 19 percent from the 228 million fish on hand the previous year. Medium foodsize showed the largest increase of the three categories from January 1, 1996 rising 30 percent. Of the total number of foodsize fish, 7.8 million were large foodsize (over 3 pounds per fish), 84.6 million were medium foodsize (1 1/2 pounds to 3 pounds per fish), and 178.4 million were small foodsize fish (3/4 pound to 1 1/2 pounds per fish). Total number of stockers on hand January 1, 1997, at 755 million, were up 20 percent from the previous year's 628 million stockers. The 755 million stockers included 390 million large stockers (over 180 lbs. to 750 lbs./1,000 fish) and 364 million small stockers (over 60 lbs. to 180 lbs.1,000 fish). There were 872 million fingerlings on hand January 1, 1997, up 6 percent from the 823 million fingerlings on hand January 1, 1996.

CONFIDENTIALITY OF COLLECTED DATA

All information collected from individual agricultural producers is held strictly confidential. Data provided by individual producers or other agricultural firms are used only to compile and publish statistics at the county, State, and national levels. Statistics at the county and State level are not published if they will potentially disclose information about an individual or operation. In addition, all names and addresses obtained by this office are held confidential.

RELEASE DISTRIBUTION POLICY

Florida Agricultural Statistics Service (FASS) publications are provided free of charge to all Florida agricultural producers and other respondents to FASS surveys. Also entitled to free FASS publications are news media that use agricultural statistics in their publications, cooperating State agencies, and other USDA agencies that have an essential need for this information. Publications picked up at the FASS office will be provided at no charge.

Other persons or entities will be assessed a nominal charge to receive individual publications or to be placed on distribution list for future FASS publications.
