ACKNOWLEDGEMENTS

This publication summarizes basic information concerning Florida's poultry industry. It is intended for the use of poultrymen, allied industries and all others who are interested in poultry production.

Many producers, hatcherymen, marketing agencies and others voluntarily supplied information used to develop these statistics. Their cooperation is sincerely appreciated.

This report is made possible through a cooperative effort of the Florida Crop and Livestock Reporting Service, the Market News Section and the Poultry and Egg Inspection Section. The Market News Section has assisted in publishing this bulletin by providing price data and other related statistics. Production and inventory data are official state and USDA statistics prepared by the Florida Crop and Livestock Reporting Service. This publication was prepared by Leo R. Figueroa, Agricultural Statistician, Florida Crop and Livestock Reporting Service and Richard Macomb, Marketing Specialist, Market News Section.

POULTRY AND EGG SUMMARY

For the year 1968, Florida farmers received 80,102,000 for poultry and eggs, 18 percent more than 1967. Eggs returned 60 million dollars and broiler 17 million dollars. All poultry and eggs as a percent of total farm income increased slightly from 1967.

The average price received by producers for eggs was 30.1 cents per dozen, up 0.5 cents from 1967. Broiler prices increased from 12.7 cents in 1967 to 13.4 cents in 1968.

The average number of layers on Florida farms during 1968 was 10,330,000, up 9 percent from 1967.

Rate of lay per day per 100 layers rose from 63.8 eggs in 1967 to 64.0 for 1968. There were 2,412 million eggs produced in Florida last year, an increase of 10 percent over 1967. Ten years ago the rate of lay per day was 57.3 eggs and Florida produced 881 million eggs.

Straight run chicks hatched by commercial hatcheries during 1968 in Florida totaled 83.8 million. Of this, broilers accounted for 54 percent and egg-type chicks 46 percent. A decade earlier, broilers represented 66 percent and egg-type chicks 34 percent of the total straight run hatch of 30.4 million birds.
