ACKNOWLEDGEMENTS

The inventory, production, slaughter, utilization, monthly and annual average price, and livestock value statistics for Florida are official State and USDA estimates prepared by the Crop and Livestock Reporting Service. Corresponding data for other livestock producing States are from official reports of the USDA Statistical Reporting Service. Information on shipments, auction market prices, and special feeder sales are from cooperative work between the Florida Department of Agriculture's Market News Section and the Divisions of Inspection and Animal Industry, and the USDA's Livestock Division, Agricultural Research Service and Crop and Livestock Reporting Service.

Many livestock producers and ranchers, slaughterers, auctions, feed lots, and other agencies associated with the livestock industry offered suggestions or voluntarily supplied basic data used to develop these statistics. Their contribution is sincerely appreciated.

This publication was prepared by Maurice H. Hammer and Jack D. Shaw, Agricultural Statisticians, Florida Crop and Livestock Reporting Service, and Gifford Rhodes, Marketing Specialist, Market News Section.

LIVESTOCK SUMMARY

INTRODUCTION

This publication continues the series that began in 1963, and is designed to bring together, under one cover, available livestock statistics from various sources.

For the most part, this issue presents production and inventory numbers from 1960 to date, and price statistics 1955 to date. The production, disposition, and income estimates for some years have been revised on the basis of more complete data which have become available since the original estimates were made.

Copies of the 1963-71 issues are available free upon request as long as the supply lasts by writing to the Florida Crop and Livestock Reporting Service, 1222 Woodward Street, Orlando, Florida, 32803.

CATTLE AND CALVES ON FARMS

Florida's January 1, 1973 inventory of all cattle and calves, including both beef and dairy animals, totaled 2,237,000 head. This year's beginning inventory is 107,000 head more than a year earlier and represents a 5 percent increase compared with a 3 percent gain the previous year. Cows and heifers that have calved began 1973 at a record high of 1,336,000 head. Beef herds gained 102,000 head, while dairymen were adding 3,000 milk cows to dairy herds. Nationally, all cattle and calves numbered 122.0 million head on January 1, 1973.

Beef cattle and calves on Florida farms and ranches numbered 1,973,000 head as 1973 began. All classes, except other heifers and steers weighing over 500 pounds, showed increases over a year earlier. Cows and heifers that have calved reached a new peak of 1,136,000 head. Heifers over 500 pounds being kept for beef cow replacements numbered 206,000 compared with 175,000 on January 1, 1972. Beef cows on all U. S. farms increased 6 percent, while heifers over 500 pounds for beef cow replacements were 7 percent over the previous year.

Florida's dairy cattle and calves totaled 264,000 head on January 1, an increase of 5,000 head. Dairy cows, at 200,000 head, represent an increase of 3,000 head. Inventories for other classes of dairy animals increased 2,000 head from their January 1, 1972 levels.

On January 1, 1973, FLORIDA ranked 18th in the nation in total cattle and calves, 15th in milk cows and 11th in beef cow numbers. During 1972, 655,000 cattle and calves were shipped out of Florida.

CASH RECEIPTS

Cash receipts from Florida's cattle and calves marketed in 1972 set a new high totaling $189,941,000, up 20 percent from 1971. The increase resulted from higher prices and topped the high of $136,995,000 set in 1969. Cattle prices in 1972 averaged $30.00 per hundredweight, compared with $25.90 in 1971. Calf prices averaged $46.00 per hundredweight compared to $35.80 in 1971. Marketings of cattle and calves in 1972 totaled 507,100,000 pounds, 4 percent less than the previous year. Receipts from hog marketings totaled $21,913,000 in 1972, an increase of 29 percent from 1971. Higher prices contributed to the increase. Prices received for hogs averaged $24.20 per hundredweight in 1972, $7.60 higher than the previous year's price.

HOGS ON FARMS

The December 1, 1972 hog inventory in Florida totaled 310,000 head, 15 percent below a year earlier. Pigs saved in 1972 totaled 450,000 head, down 19 percent from 1971. Pigs per litter in the spring of 1972 averaged 7.4, the same as a year earlier. Fall 1972 farrowings averaged 6.9 pigs per litter, unchanged from a year earlier.

On December 1, 1972, in the UNITED STATES there were 61,502,000 hogs and pigs, a decrease of 2 percent from December 1, 1971. All sheep and lambs on hand in the UNITED STATES, January 1, 1973, totaled 17,726,000 head, 5 percent below a year earlier.

1/ Balance sheet estimates. Total of marketings, farm slaughter, deaths, and on hand end of year equals total of calf crop, inshipments and on hand beginning of year. 2/ Not strictly a calving rate. Figure represents calves born expressed as percentage of the number of cows that have calved on hand January 1, 1972. 3/ Excludes interfarm sales, but includes animals custom slaughtered for use on farms where produced. 4/ Does not include animals custom slaughtered for farmers at commercial establishments.

1/ Civilian consumption only, beginning 1941. 2/ Approximately at wholesale level of distribution. 3/ Equivalent eviscerated weight basis. Although most of the poultry was sold in dressed form until the 1940's, most is now sold ready-to-cook. The entire series was put on the latter basis to achieve comparability. 4/ Measured approximately at wholesale level of distribution. Average weight of eggs 1909-46 is assumed to be 1.5 pounds per dozen; conversion factor subsequently increased 0.01 pound each year through 1952, remained at 1.56 through 1956, thereafter 1.57. This change in factor allowed for the increasing size of eggs marketed. 5/ Revised. N/A Not Available.
