1/ Utilized production - The sum of fresh market and processed do not equal utilized production for 1934-1958 because home use is not included in the breakdown.

2/ Prices - Season average price estimates were started in 1909 and represented an "as sold" price. The basis for prices changed in 1949 to an equivalent PHD price (packing house door or processing plant door).

3/ Fresh market price estimates started in 1934. Processed price for 1934-1943 was a combined Washington-Oregon price. Processed price estimates started in 1944 for Washington.

4/ Canned price - Data for 1944-1958 represents the price for both canned and frozen. Data from 1959 on is for apples used only as canned.

5/ Juice/Frozen quantity - Data for 1944-1958 represents the quantity of apples used as frozen. Data from 1969 on represents the quantity of apples used for juice.

(D) Estimate not published to avoid disclosure of individual operation(s).
