Alabama farmers know the value of being “stewards of the land”. They have taken advantage of available conservation tools such as terraces constructed by the Civilian Conservation Corps in the 1930’s to prevent erosion and the current practice of no-till planting to reduce soil disturbance. And, they are open to environmental regulations based on sound scientific studies because they know that sound environmental stewardship and responsible use of chemicals ensures that future generations of farmers will produce safe, affordable food for Alabama consumers.

We are lucky to be living in a time when consumers are becoming more aware and interested in how their food is grown and where it comes from. It is important that they are taught the environmental advantage of buying locally grown fruits and vegetables produced with responsible methods. An educated consumer not only better appreciates the efforts of farmers but also has a truer understanding of agriculture.

I am proud of the history of stewardship exhibited by Alabama producers. Their commitment to growing safe and affordable food and fiber is second to none, and I am committed to providing them with the support they need to make this happen. I consider it a great opportunity and an honor to serve the farmers and ranchers of Alabama as their Commissioner of Agriculture.

Ron Sparks
Commissioner

Stewardship of our natural resources is not something farmers take for granted; farmers are aware that their production decisions not only affect the wider community, but directly impact their neighbors and families as well. No-till planting, integrated pest management systems, and growing for local markets are strong indications that farmers continue to head toward responsible careful management of our natural resources. I want to thank Alabama farmers for participating in our surveys. The data from these surveys help create the *Alabama Agricultural Statistics Bulletin* and are used by local, state, and federal governments, land grant universities, and others to help farmers be good stewards of their land.

As the director for the Alabama Field Office, USDA/NASS, I want to thank our field and telephone enumerators for their dedication in performing their duties at a very high level. Their ability to get the job done even with tight time constraints and under adverse conditions has always impressed me. I also want to thank the office staff for putting together another quality bulletin. Even in these times of limited resources, they are constantly looking for ways to do their jobs more effectively and more efficiently.

Bill Weaver
Director

State Highlights for 2008-2009:

- Total farm receipts were over $5.04 billion for the year. (excluding forestry)
- Cash receipts from crops, livestock and poultry totaled $4.46 billion, versus $4.10 billion the previous year.
- The top five farm commodities for cash receipts were: (1) poultry, (2) cattle and calves, (3) greenhouse, sod, and nursery products, (4) cotton and (5) peanuts. Together they make up 86 percent of the total commodity receipts.
- Livestock and poultry accounted for 78% of the commodity receipts and crops the other 22%.
- Poultry made up 66 percent of the cash receipts for all commodities (excluding forestry).
- Alabama ranked 3rd in broiler production with marketings of 1.06 billion birds.
- Greenhouse, sod, and nursery receipts totaled $256.0 million ranking Alabama 20th in the nation.
- Laying flocks produced 2.15 billion eggs to rank 14th in egg production.
- Cattle inventory on January 1, 2009 was 1.26 million head and the state ranked 26th nationally.
- Catfish sales amounted to $93.3 million. Alabama ranked second behind Mississippi in sales.
- Principal acreages for crops were: corn (260,000), cotton (290,000), peanuts (193,000), soybeans (360,000).
- Alabama ranked 3rd in peanuts and 8th in cotton production.
- The state was 5th in pecan production and 14th in peach.

The 2008 crop season was better than expected for producers across many areas of the state. Early spring planting was delayed in several northern locations because of cool temperatures and wet fields. Timely rainfall and mild weather throughout much of the growing season produced record yields for cotton, peanuts, and winter wheat. Total **hay stocks** for December 1 increased to 1.54 million tons, up 222,000 tons from December 2007. **Hay** yield increased to 2.2 tons per acre, up from the 1.8 tons per acre produced in 2007. Hay production totaled 1.98 million tons of hay from 900,000 harvested acres, an increase of 60,000 acres from the previous year. **Corn** acreage fell to 260,000 planted acres, a decrease of 80,000 acres from 2007. Producers harvested 235,000 acres for grain, with a yield of 104 bushels per acre. Total grain production grew from 21.8 million bushels of corn in 2007 to 24.4 million bushels in 2008. **Cotton** production was estimated in May 2009 at 469,000 bales from 286,000 harvested acres. Alabama cotton yield in 2008 was 787 pounds of lint produced per acre, up 268 pounds per acre from last year and 8 pounds per acre below the previous record set in 1985. The state's **peanut** yield was at a record high in 2008, with 3,300 pounds of nuts produced per acre, up 750 pounds per acre from the previous year.

Farmers harvested 193,000 acres, and produced 636.9 million pounds of peanuts in 2008. **Soybean** production totaled 12.3 million bushels from 350,000 harvested acres, an increase of 8.37 million bushels and 165,000 acres from 2007. Yield was estimated at 35 bushels per acre, just one bushel below the record yield set in 2003. **Irish potato** growers produced 204,000 cwt of potatoes this year, up 50,000 cwt from 2007. **Sweet potato** production totaled 438,000 cwt, an increase of 162,000 cwt from a year ago. **Winter wheat seedings** for the 2009 crop season were estimated at 240,000 acres, unchanged from 2008.

1/ Marketing year average prices are weighted prices for commodities sold during the marketing year. They represent average prices received by farmers at point of first sale for all grades and qualities. 2/ Estimates are for market eggs only. 3/ Unit change in 2002 from ct/lb to $/ton.

Total Farm Receipts for 2008 totaled $5.06 billion, an increase of $382 million (8 percent) from the previous year. These receipts included returns for livestock and poultry, crops, government agricultural payments, and other farm related income.

Receipts for all Agricultural Commodities included $3.50 billion for Livestock and Poultry and $962.1 million for crops. Poultry receipts made up 66 percent of the total cash receipts for all commodities. Higher returns were realized for most **crop** commodities and **broilers** while receipts for **cattle, hogs, eggs, dairy and greenhouse & nursery** commodities were down from previous year.

Broiler Chickens continued to lead the way as Alabama's #1 agricultural commodity with receipts of $2.63 billion, up 9 percent from the previous year. Receipts for **Eggs** amounted to $298.6 million compared with $313.0 million in 2007. **Cattle and Calves** contributed $331.7 million in sales, down 19 percent from a year earlier. **Greenhouse, Sod and Nursery** returned $256.0 million, while **Cotton** was up to $154.5 million in receipts.

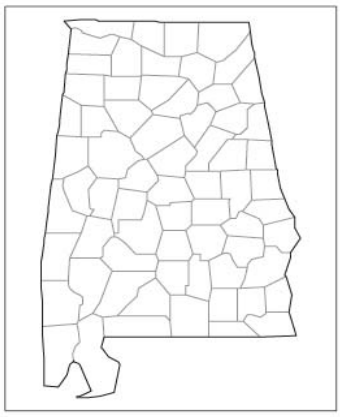
2007 CENSUS OF AGRICULTURE
State Profile

Alabama



History

For 156 years (1840 – 1996), the U.S. Department of Commerce, Bureau of the Census was responsible for collecting census of agriculture data. The 1997 Appropriations Act contained a provision that transferred the responsibility for the census of agriculture from the Bureau of the Census to the U.S. Department of Agriculture (USDA), National Agricultural Statistics Service (NASS). The 2007 Census of Agriculture is the 27th Federal census of agriculture and the third conducted by NASS.

The first agriculture census was taken in 1840 as part of the sixth decennial census of population. The agriculture census continued to be taken as part of the decennial census through 1950. A separate mid-decade census of agriculture was conducted in 1925, 1935, and 1945. From 1954 to 1974, the census was taken for the years ending in 4 and 9. In 1976, Congress authorized the census of agriculture to be taken for 1978 and 1982 to adjust the data reference year so that it coincided with other economic censuses. This adjustment in timing established the agriculture census on a 5-year cycle collecting data for years ending in 2 and 7.

Reports Issued by the Alabama Agricultural Statistics Service	
Alabama Farm News *A report containing statistics for a variety of commodities produced in Alabama and the Nation. Size of inventory, acreages, yields, production, and prices comprise the majority of the statistics.*	Quarterly
Crop Weather Report *Crop condition and progress are reported during the growing season. Soil moisture supplies and other weather related information are included in the report.*	Weekly: Apr - Nov
Broilers *Broiler eggs set and chicks placed are reported for Alabama and 15 major producing states.*	Weekly (Each Wednesday)
Alabama County Data *Estimates for cattle, poultry, corn, cotton, peanuts, and soybeans are available at the county level.*	Annually (Between April and June)
Alabama Agricultural Statistics *A composite publication showing current and revised data for most reports issued during the year, including county data for major commodities.*	Annually (Usually in September)
Census of Agriculture *A publication that is the leading source of facts and figures about American agriculture. Conducted every five years, the Census provides a detailed picture of U.S. farms and ranches and the people who operate them. It is the only source of uniform, comprehensive agricultural data for every **state** and **county** in the United States.*	Every 5 years

Keepers of the Land

Alabama farmers, like their fathers before them, are truly stewards of the land. Perhaps that is because they know, better than most, that Alabama is a place that gives life. To them, protecting the environment isn't a burden, it's a privilege. The water, land and air are as much the tools of their trade as a tractor and a plow. Thanks to their stewardship, those resources will be around for Alabamians to enjoy for generations to come.
