CATTLE and CALVES

New England's cattle and calf herd totaled 491,100 head on January 1, 2008, an increase of 0.7 percent from the previous year. The beef cow inventory on that date was 42,900 head, up seven percent from a year earlier. The first of the year milk cow inventory totaled 221,600 head, a reduction of 0.2 percent. Increases in both inventory and value per head placed the New England value of inventory at $697.4 million, up $75 million from a year earlier.

Calves born in New England during 2007 totaled 215,300 head, down 1.4 percent from the 2006 calf crop.

Operations with one or more head of cattle at any time during 2007 totaled 7,010 farms, 250 fewer farms than the previous year. Commercial dairy farms in New England during 2007 totaled 1,935 farms, a loss of 90 farms from 2006. The New England region has lost 1,940 cattle farms since 1998, of which 1,088 were commercial dairy farms.

[1] A cattle and calf operation is any place having one or more head of cattle on hand at any time during the year, including operations with milk cows.
[2] A milk cow operation is any place having one or more head of milk cows, excluding cows used to nurse calves, on hand at any time during the year.
[3] Information provided by the individual State Departments of Agriculture (or its equivalent). The number of commercial operations consists of licensed dairies in each state. For 1998-2002, the reference date is the end of the calendar year, except Massachusetts, which is June 30th. In 2002, the definition was changed to represent the annual average number of dairy farms licensed to sell milk in each state.
