# SPRING WHEAT FIELD SELECTION

Α

|  | Total Planted Acres               |
|--|-----------------------------------|
| 1. How many total acres of spring wheat did this operation plant for the 2019 crop year?                 | 0050                              |
| [If no acres planted, review Screening Survey Information Form, make notes, then go to Conclusion on bac | ck page.]                         |
|  | Total Number of<br>Fields Planted |
| 2. What is the total number of environ wheat fields that were planted on this encretion?                 | 0020                              |
| 2. What is the total number of spring wheat helds that were planted on this operation?                   |                                   |
| [If only one field, enter "1" and go to item 4.]   |                                   |

3. Please list these fields according to identifying name/number or describe each field. Then I will tell you which field has been selected.

Α

[If there are more than 18 fields, make sure item 2 is total fields planted and list only the 18 fields closest to the operator's permanent residence. If respondent is unable to identify or describe the fields, use the Field Selection Grid Supplement.]

| FIELD NAME, NUMBER OR DESCRIPTION | FIELD NAME, NUMBER OR DESCRIPTION |
|-----------------------------------|-----------------------------------|
| 1                                 | 10                                |
| 2                                 | 11                                |
| 3                                 | 12                                |
| 4                                 | 13                                |
| 5                                 | 14                                |
| 6                                 | 15                                |
| 7                                 | 16                                |
| 8                                 | 17                                |
| 9                                 | 18                                |
|                                   |                                   |
