The USDA, NASS, Alabama Field Office operates under a cooperative agreement between the Alabama Department of Agriculture and Industries and the National Agricultural Statistics Service of the United States Department of Agriculture. The agency collects and publishes statistics about crops, livestock, poultry, prices, and other information relating to the state's agriculture. This information is useful to farmers, policymakers, farm organizations, public and private researchers and many others to keep abreast of Alabama's #1 industry. * Beginning 2004 Peach production measured in tons.
