## **2022 AGRICULTURAL CHEMICAL USE - VEGETABLES**

Survey results for the 2022 Agricultural Chemical Use Survey are now available, according to the USDA's National Agricultural Statistics Service. The 2022 Agricultural Chemical Use Survey of vegetable producers collected data about fertilizer and pesticide use as well as pest management practices on acres planted to 22 different vegetable crops. NASS conducted the survey among producers in 18 states, focusing on the states that were major producers for the surveyed crops.

The estimates, based primarily on surveys conducted with vegetable growers last fall, can be accessed using the QuickStats online database, found here: [http://www.nass.usda.gov/Quick\\_Stats/](http://www.nass.usda.gov/Quick_Stats/)
