

California Livestock and Dairy

California's total livestock and livestock products cash receipts were \$7.61 billion in 2006, down 10 percent from 2005. This decline was enough to bump the state from second to fourth ranking nationally in livestock cash receipts. Milk, cattle, and chickens remain the state's leading commodities and cash receipts declined for all three.

The Golden State's dairy industry showed mixed results in 2006. Increased milk production, milk per cow, and a higher number of cows outpaced the demand for dairy products and contributed to lower milk prices for dairy producers. The dairy sector in California continued to change in 2006 with dairies relocating within California, to other states, or shutting down. There was a net loss of 68 dairies in the state during the year.

California has been the nation's leading dairy state since 1993 when it surpassed Wisconsin in milk production. Sales of milk and cream contributed \$4.49 billion in 2006. Wisconsin, New York, Idaho, and Pennsylvania were the next leading states. California ranked number one in the U.S. in the production of fluid milk, butter, ice cream, and nonfat dry milk. California was second in cheese production. The inclination of low milk prices slowly started to shatter toward year-end. The extreme temperatures that hit central California in July and August of 2006 also played an important role in milk prices and production. Many dairy producers felt long-term effects from the heat wave that affected cow reproductive cycles and lowered calf birth rates.

California's dairies produced 38.8 billion pounds of milk, accounting for 21 percent of the nation's milk supply. For the first time, all 12 months of 2006 recorded more than 3.00 billion pounds in milk production. Approximately 48 percent of all the Golden State's milk was used to make cheese.

According to the California Department of Food and Agriculture's Dairy Statistics Branch, 35 counties contributed to the state's market milk production. The top five milk-producing counties in California were Tulare (26 percent), Merced (14 percent), Stanislaus (10 percent), Kings (9 percent), and Kern (9 percent). These counties accounted for 68.4 percent of the state's total milk production in 2006. Sales of fluid milk in California averaged 36 percent whole milk, 34 percent reduced fat milk, 14 percent low fat milk, and 16 percent skim milk.

Milk production per cow increased 2 percent in California to 21,815 pounds and the number of dairy cows in the state rose to 1.78 million head. California cheese production has more than doubled in the past decade, from 1.05 billion pounds in 1996 to 2.21 billion pounds in 2006. The steady increase in milk production throughout 2006 caused the U.S. to have more milk on the market than demand, resulting in continued acceptance of dairy product export bids. For 2006, export bids were accepted for cheese, 6,129 metric tons (13.5 million lbs.); anhydrous milk fat, 4,319 metric tons (9.50 million lbs.); butter, 5,864 metric tons (12.9 million lbs.); and whole milk powder, 1,758 metric tons (3.90 million lbs.).

Cash receipts for cattle and calves exemplify decreasing receipts for 2006, but the previous six years have been showing an increasing trend. The 2006 sales totaled \$1.68 billion, compared with \$1.74 billion in 2005. Cattle and calves showed a 4 percent decrease, while receipts for hogs and pigs were 2 percent below the previous year. Sheep and lambs declined the most among meat animals at 17 percent below 2005.

California's 2006 honey production, at 19.8 million pounds, was 34 percent below 2005. Producing colonies totaled 380 thousand, down 5 percent from the previous year. The yield per colony averaged 52 pounds, compared to 75 pounds produced in 2005. However, the average price per pound was 98 cents per pound, 14 cents higher than 2005.

1/ Steers and heifers over 500 pounds (including fed cattle) and slaughter cows.

2/ Steers and heifers (all qualities) over 500 pounds (including fed cattle).

3/ Beef cows and cull dairy cows sold for slaughter.

4/ Steers and heifers (all qualities) under 500 pounds

Grazing Fee Annual Average Rates, 1997-2006 1/

Year	Per Animal Unit 2/	Cow-Calf	Per Head
	<i>Dollars Per Month</i>		
1997	10.60	13.00	12.00
1998	11.50	14.50	12.90
1999	12.10	15.00	12.50
2000	12.30	15.50	12.70
2001	13.00	16.00	13.50
2002	12.80	16.50	14.00
2003	13.50	17.50	14.30
2004	14.50	19.50	15.50
2005	15.40	20.50	17.00
2006	16.50	21.00	17.00

1/ The average rates are estimates based on survey indications of monthly lease rates for private, non-irrigated grazing land from the January Cattle Survey.

2/ Includes animal unit plus cow-calf rates. Cow-calf rate converted to animal unit (AUM) using (1 aum=cow-calf *0.833).

Milk Cows, Milk Production and Value, 1997-2006
