

**FINAL  
GRAPE CRUSH REPORT  
1986 CROP**

**MARCH 10, 1987**

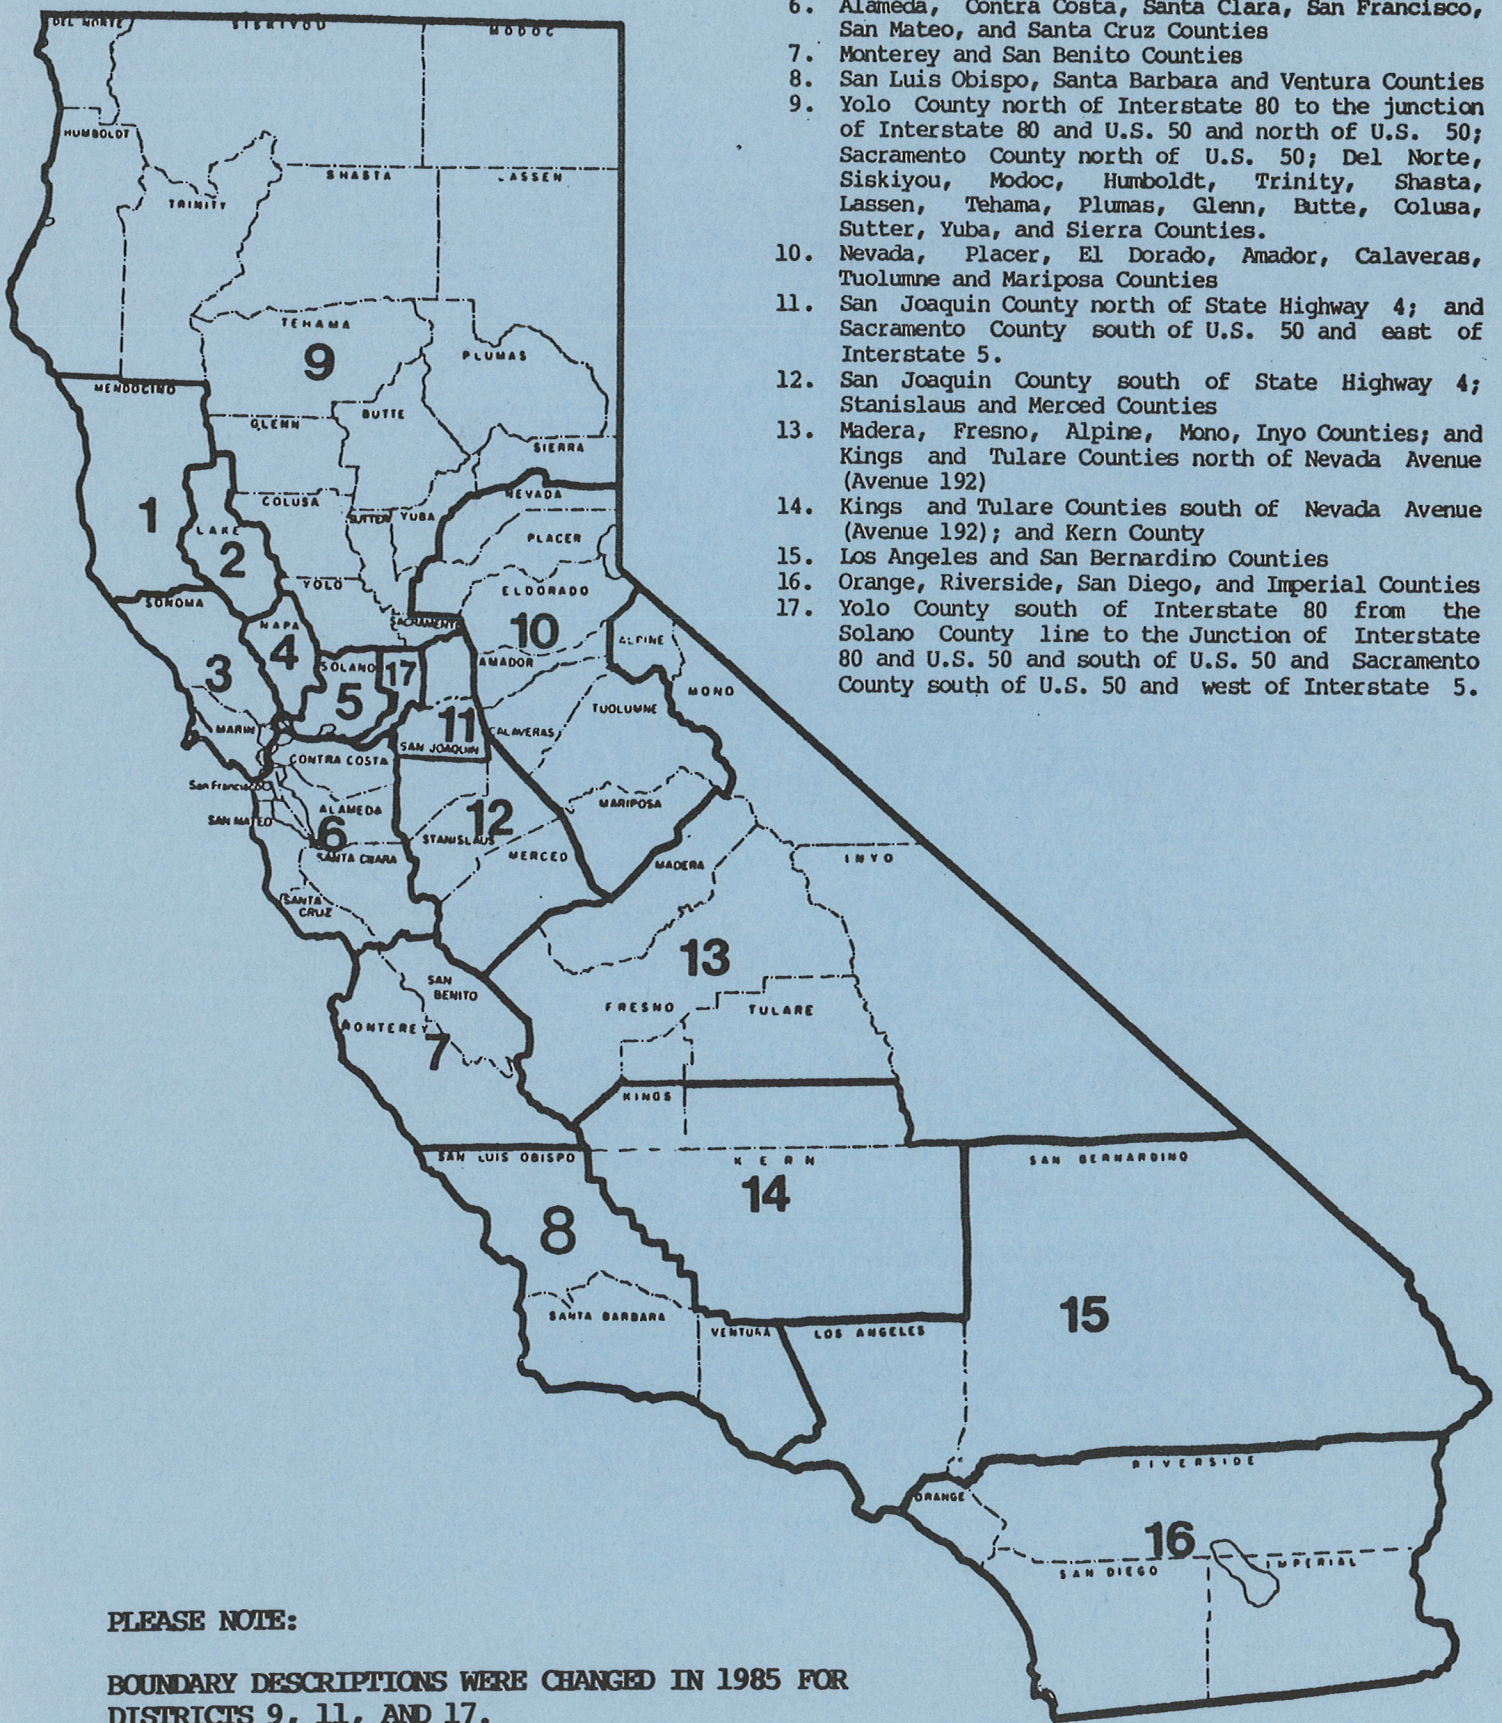

**CALIFORNIA DEPARTMENT OF FOOD AND AGRICULTURE  
Sacramento, California**

**CLARE BERRYHILL, DIRECTOR**

MAP & DEFINITIONS  
OF CALIFORNIA  
GRAPE PRICING DISTRICTS

1. Mendocino County
2. Lake County
3. Sonoma and Marin Counties
4. Napa County
5. Solano County
6. Alameda, Contra Costa, Santa Clara, San Francisco, San Mateo, and Santa Cruz Counties
7. Monterey and San Benito Counties
8. San Luis Obispo, Santa Barbara and Ventura Counties
9. Yolo County north of Interstate 80 to the junction of Interstate 80 and U.S. 50 and north of U.S. 50; Sacramento County north of U.S. 50; Del Norte, Siskiyou, Modoc, Humboldt, Trinity, Shasta, Lassen, Tehama, Plumas, Glenn, Butte, Colusa, Sutter, Yuba, and Sierra Counties.
10. Nevada, Placer, El Dorado, Amador, Calaveras, Tuolumne and Mariposa Counties
11. San Joaquin County north of State Highway 4; and Sacramento County south of U.S. 50 and east of Interstate 5.
12. San Joaquin County south of State Highway 4; Stanislaus and Merced Counties
13. Madera, Fresno, Alpine, Mono, Inyo Counties; and Kings and Tulare Counties north of Nevada Avenue (Avenue 192)
14. Kings and Tulare Counties south of Nevada Avenue (Avenue 192); and Kern County
15. Los Angeles and San Bernardino Counties
16. Orange, Riverside, San Diego, and Imperial Counties
17. Yolo County south of Interstate 80 from the Solano County line to the Junction of Interstate 80 and U.S. 50 and south of U.S. 50 and Sacramento County south of U.S. 50 and west of Interstate 5.

PLEASE NOTE:  
BOUNDARY DESCRIPTIONS WERE CHANGED IN 1985 FOR  
DISTRICTS 9, 11, AND 17.

## GRAPE CRUSH REPORT

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agriculture Code.

The Final Grape Crush Report includes all grape tonnage crushed and purchased during the 1986 season. Changes in tonnage, Brix, and prices from the preliminary report to this final report were due to: additional purchased tonnage and prices from reference price contracts that were in effect prior to January 1, 1977 and were priced by February 25, 1987; late reports; and corrections to the original data. Reporting errors by some processors have caused a change in some district/variety entries.

Detail of the crushed tonnage, degrees Brix and weighted average prices are reported by grape type and variety as well as by grape pricing district. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code.

All grapes crushed in 1986 totaled 2,793,510 tons, 2 percent less than last year's crush, and 10 percent below the record high 1982 crush. The crush of **raisin** type grapes totaled 504,716 tons, down 10 percent from the previous year. Thompson Seedless, the major raisin variety, was down 12 percent to 445,094 tons. **Table** varieties totaled 234,623 tons crushed, up 9 percent from last year. A decrease of 6 percent in the Tokay variety crush was more than offset by increases in other varieties. All **wine** varieties crushed totaled 2,054,171 tons, down 1 percent from 1985. Black varieties, with 762,111 tons, were down 11 percent and white varieties totaled 1,292,061 tons for an increase of 7 percent. White wine varieties accounted for 63 percent of the total wine varieties crushed compared with 58 percent in 1985 and 57 percent in 1984. This is the fourth consecutive year the crush of all white varieties has exceeded the quantity of all black varieties crushed. The major white wine variety crushed was French Colombard with 677,046 tons, representing 52 percent of the total white wine varieties crushed. Zinfandel was the black wine variety with the largest crush totaling 143,402 tons, up 16 percent from last year. Zinfandel represented 19 percent of the total black wine varieties crushed. Grenache was the second largest black variety accounting for 14 percent of the total black wine varieties crushed with 103,054 tons.

The weighted average price per ton for all grapes purchased for wine, concentrate, juice, vinegar and beverage brandy was \$186.20, up 16 percent from the 1985 price of \$160.95. The overall price rise was mainly caused by increased prices for raisin and black wine type grapes. Weighted average price for raisin type grapes was \$104.84 per ton, up \$30.10; table type \$132.87 per ton, up \$1.69 and wine type \$207.84 per ton, up \$22.83. White wine varieties averaged \$198.82 per ton, up \$7.07 from 1985; while black wine varieties averaged \$224.00 per ton, up \$49.08 from last year. The weighted average degrees Brix for all grapes crushed was 20.3 and averaged 20.2 for all grapes purchased.

## EXPLANATION OF TABLES

**Table 1** is a summary of the 1986 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 1985 are shown for comparison.

**Table 2** includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 1986 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 1985 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

**Table 3** shows the weighted average degrees Brix for all grapes crushed (Table 2) by California processors from the 1986 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1985 are shown for comparison.

**Table 4** includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 1986 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 1985 are shown for comparison. Table 4 does not include tonnage purchased as distilling material other than beverage brandy -- this is shown in Table 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

**Table 5** shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (Table 4) by California processors from the 1986 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1985 are shown for comparison. Table 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy, this is shown in Table 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

**Table 6** gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (Table 4) by California processors from the 1986 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 1985 are shown for comparison. Table 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in Table 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 1987 and include reference price contracts written prior to January 1, 1977 with prices final as of February 25, 1987. Weighted average prices also include any Brix adjustments, bonuses, or allowances. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The following example indicates the method used for calculating weighted averages:

Variety	Dist.	Total Grapes Crushed		Final Prices of Grapes Purchased from Grower(s)											Total Paid (Columns 5 X B /)	Wtd. Average Price Per Ton 15
		Over the Scale Tons 3	Wtd. Avg. Degrees Brix 4	Net Weight Fresh Tons 5	Wtd. Avg. Degrees Brix 6	Total Brix (Columns 5 X 6 /) A	Base Price Per Ton 7	Acceptable Brix Limits 8 9		Brix Adjustment Factors Per Degree Brix Per Ton Plus and Minus * 10	Brix Adjustment Limits 12 13 14			Actual final price paid by winery to grower at each base price and Brix adjustment factor including bonuses or allowances. Dollars/Ton B		
								Min.	Max.		Base	Min.	Max.			
Zinfandel	1	100.0	20.1	100.0	20.1	2,010.00	\$ 450.00	19	25	+ or - 10%	22	20	24	\$ 364.50	\$ 36,450.00	\$
Zinfandel	1	20.5	21.3	20.5	21.3	436.65	450.00	19	25	+ or - 10%	22	20	24	418.50	8,579.25	
Zinfandel	1	10.6	23.5	10.6	23.5	249.10	450.00	19	25	+ or - 10%	22	20	24	517.50	5,485.50	
		131.1	20.6	131.1	20.6	2,695.75								\$ 50,514.75	\$ 385.31	

Columns 4 and 6 were obtained by dividing the total Net Fresh Tons, (Columns 3 and 5) into the total Brix of these same tons (Column A):  $\frac{2,695.75}{131.1} = 20.6$

Column 15 was obtained by dividing the total Net Fresh Tons, (Column 5) into the total dollars paid for these same tons (Column C):  $\frac{\$50,514.75}{131.1} = \$385.31$

Table 7 shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 1986 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 1984 are given for comparison.

Table 8 shows base prices paid to growers by variety, by Brix adjustment factors, and percent of variety tonnage. The weighted average of all base prices by variety is not shown in this publication, but is available in summary form by contacting the Federal-State Market News Service, Sacramento, California.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

Table 9 includes tonnage of all grapes crushed to growers' accounts by California processors from the 1986 crop. Growers retained ownership of these grapes at the time of crushing. This tonnage is reported by grape pricing districts and variety. Comparisons with 1985 are shown.

a/ See code descriptions beginning on page 42.  
b/ Percentage total by variety will not necessarily add to 100.00 due to rounding.  
c/ Price basis per degree Brix.  
d/ Less than .005 percent.

Table 8 - Supplement

## BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

NOTE: Brix adjustment factors designated with an asterisk were added since release of the Preliminary Grape Crush Report, 1986 crop.
