GRAPE CRUSH REPORT

OVERVIEW

Information contained in this Report was supplied by procesers to fulfill the reporting requirements of Section 55601.5 of the Food and Agriculture Code.

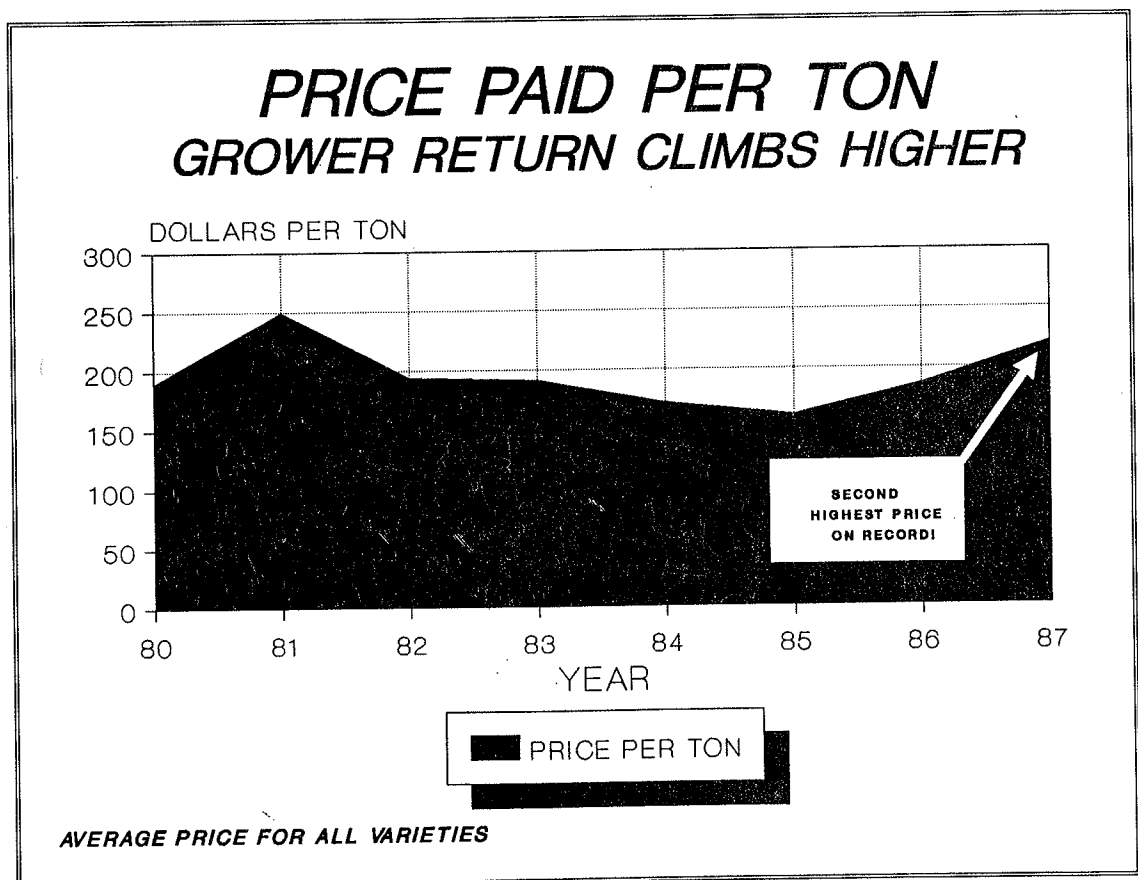

The Final Grape Crush Report includes all grape tonnage crushed and purchased during the 1987 season. Changes in tonnage, Brix, and prices from the preliminary report to this final report were due to: additional purchased tonnage and prices from reference price contracts that were in effect prior to January 1, 1977 and were priced by February 25, 1988; late reports; and corrections to the original data. Reporting errors by some processors have caused a change in some district/variety entries.

Detail of the crushed tonnage, degrees Brix and weighted average prices are reported by grape type and variety as well as by grape pricing district. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code. A district map is located on the inside of the front cover.

GRAPE PRICES CONTINUE TO RISE

California grape growers have received an average price of \$220.53 per ton for grapes crushed in 1987, up 18 percent from the 1986 average price. The average price has rebounded by 37 percent since 1985. The 1987 price is the second highest on record -- only surpassed by the \$249.40 price paid in 1981.

The 1987 crush totaled 2,486,631 tons, down 11 percent from the 1986 crush and 20 percent less than the record-large 1982 harvest. White wine varieties continue to account for a larger share of all grapes crushed while red wine varieties decline.

LEADING VARIETIES CRUSHED 1987 CROP

TOTAL TONS CRUSHED

WHITE WINE VARIETIES GAIN

SOURCE: GRAPE CRUSH REPORT

LEADING GRAPE VARIETIES

French Colombard, the most widely planted grape variety in California, continued its dominance with 25 percent of the crush volume. Thompson Seedless, a raisin variety grape, remained in second place with 16 percent of the total crush. The remaining top ten varieties were all wine varieties except the seventh largest -- Flame Tokay which falls into the table grape classification.

Grapes produced in District 4 (Napa County) received the highest average price of \$808.63 per ton. District 3 (Sonoma and Marin counties) received the second highest return of \$625.97 per ton. Of the grapes grown Statewide, Chardonnay grapes received the highest average price of \$921.98 per ton. The average price paid for Cabernet Sauvignon grapes was \$630.99 per ton. The 1987 Thompson Seedless price was \$122.45, up 17 percent from the \$104.84 price paid last year. The crush volume of Thompson Seedless grapes declined by 11 percent from 1986 to 397,832 tons.

EXPLANATION OF TABLES

Table 1 is a summary of the 1987 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 1986 are shown for comparison.

Table 2 includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 1987 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 1986 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

Table 3 shows the weighted average degrees Brix for all grapes crushed (Table 2) by California processors from the 1987 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1986 are shown for comparison.

Table 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 1987 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 1986 are shown for comparison. Table 4 does not include tonnage purchased as distilling material other than beverage brandy -- this is shown in Table 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Table 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (Table 4) by California processors from the 1987 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 1986 are shown for comparison. Table 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy, this is shown in Table 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Table 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (Table 4) by California processors from the 1987 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 1986 are shown for comparison. Table 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in Table 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 1988 and include reference price contracts written prior to January 1, 1977 with prices final as of February 25, 1988. Weighted average prices also include any Brix adjustments, bonuses, or allowances. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The following example indicates the method used for calculating weighted averages:

| Variety | Dist. | Total Grapes Crushed | | Final Prices of Grapes Purchased from Grower(s) | | | | | | | | | | Actual final price paid by winery to grower at each base price and Brix adjustment factor including bonuses or allowances. Dollars/Ton | Total Paid (Columns 5 X B) | Wtd. Average Price Per Ton |
|-----------|-------|----------------------|------------------------|---|------------------------|----------------------------|--------------------|------------------------|------|--|------------------------|------|------|--|----------------------------|----------------------------|
| | | Over the Scale Tons | Wtd. Avg. Degrees Brix | Net Weight Fresh Tons | Wtd. Avg. Degrees Brix | Total Brix (Columns 5 X 6) | Base Price Per Ton | Acceptable Brix Limits | | Brix Adjustment Factors Per Degree Brix Per Ton Plus and Minus * | Brix Adjustment Limits | | | | | |
| | | | | | | | | Max. | Min. | | Base | Max. | Min. | | | |
| Column → | | 3 | 4 | 5 | 6 | A | 7 | 8 | 9 | 10 | 12 | 13 | 14 | B | C | 15 |
| Zinfandel | 1 | 100.0 | 20.1 | 100.0 | 20.1 | 2,010.00 | \$ 450.00 | 25 | 19 | + or - 10% | 22 | 24 | 20 | \$ 364.50 | \$ 36,450.00 | \$ |
| Zinfandel | 1 | 20.5 | 21.3 | 20.5 | 21.3 | 436.65 | 450.00 | 25 | 19 | + or - 10% | 22 | 24 | 20 | 418.50 | 8,579.25 | |
| Zinfandel | 1 | 10.6 | 23.5 | 10.6 | 23.5 | 249.10 | 450.00 | 25 | 19 | + or - 10% | 22 | 24 | 20 | 517.50 | 5,485.50 | |
| | | 131.1 | 20.6 | 131.1 | 20.6 | 2,695.75 | | | | | | | | | \$ 50,514.75 | \$ 385.31 |

Columns 4 and 6 were obtained by dividing the total Net Fresh Tons, (Columns 3 and 5) into the total Brix of these same tons (Column A): $\frac{2,695.75}{131.1} = 20.6$

Column 15 was obtained by dividing the total Net Fresh Tons, (Column 5) into the total dollars paid for these same tons (Column C): $\frac{\$50,514.75}{131.1} = \385.31

Table 7 shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 1987 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 1986 are given for comparison.

Table 8 shows base prices paid to growers by variety, by Brix adjustment factors, and percent of variety tonnage. The weighted average of all base prices by variety is not shown in this publication, but is available in summary form by contacting the Federal-State Market News Service, Sacramento, California (916-445-5721).

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

Table 9 includes tonnage of all grapes crushed to growers' accounts by California processors from the 1987 crop. Growers retained ownership of these grapes at the time of crushing. This tonnage is reported by grape pricing districts and variety. Comparisons with 1986 are shown.

a/ See code descriptions beginning on page 48.
b/ Percentage total by variety will not necessarily add to 100.00 due to rounding.
c/ Less than .005 percent.
d/ Price basis per degree Brix.

Table 8 - Supplement

BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

NOTE: Brix adjustment factors designated with an asterisk were added since release of the Preliminary Grape Crush Report, 1987 crop.
