DOYLE CONNER
COMMISSIONER

STATE OF FLORIDA
DEPARTMENT OF AGRICULTURE
THE CAPITOL
TALLAHASSEE
32304

Dear Fellow Citizens:

Current and accurate statistical information plays an important role in the development of any effective marketing program.

Recognizing this fact, the Florida Department of Agriculture has cooperated with the United States Department of Agriculture in compiling this statistical livestock summary for the State of Florida.

We trust that you will find this report a valuable aid.

Sincerely,

Doyle Conner

INTRODUCTION

This publication continues the series that began in 1963, and is designed to bring together, under one cover, available livestock statistics from various sources.

For the most part, this issue presents production and inventory numbers from 1955 to date, and price statistics 1950 to date. The production, disposition, and income estimates for some years have been revised on the basis of data obtained from the 1964 Census of Agriculture and other data which have become available since the original estimates were made.

Copies of the 1963-70 issues are available free upon request as long as the supply lasts by writing to the Florida Crop and Livestock Reporting Service, 1222 Woodward Street, Orlando, Florida 32803.

CATTLE AND CALVES ON FARMS

Florida's January 1, 1971 inventory of all cattle and calves, including both beef and dairy animals, totaled 1,864,000 head. This year's beginning inventory is 37,000 head more than a year earlier and represents a 2 percent increase compared with a 1 percent gain the previous year. Cows and heifers that have calved began 1971 at a record high of 1,110,000 head. Beef herds gained 37,000 head, while dairymen were adding 1,000 milk cows to dairy herds. Over the past five years beef cattle and calves have averaged 87 percent of total inventories and dairy animals, 13 percent. Nationally, all cattle and calves numbered 114.6 million head on January 1, 1971.

Beef cattle and calves on Florida farms and ranches numbered 1,614,000 head as 1971 began. All classes, except heifers and steers weighing over 500 pounds, showed increases over a year earlier. Cows and heifers that have calved reached a new peak of 917,000 head. Heifers over 500 pounds being kept for beef cow replacements numbered 144,000 compared with 138,000 on January 1, 1970. Beef cows on all U.S. farms increased 3 percent, while heifers over 500 pounds for beef cow replacements were 4 percent over the previous year.

Florida's dairy cattle and calves totaled 250,000 head on January 1, unchanged from a year earlier. Dairy cows, at 193,000 head, represent an increase of 1,000 head. Inventories for other classes of dairy animals decreased 1,000 head from their January 1, 1970 levels.

On January 1, 1971, FLORIDA ranked 22nd in the nation in total cattle and calves, 18th in milk cows and 15th in beef cow numbers. During 1970, 497,000 cattle and calves were shipped out of Florida.

CASH RECEIPTS

Cash receipts from Florida's cattle and calves marketed in 1970 set a new high totaling $150,835,000, up 10 percent from 1969. The increase resulted from both greater marketings and higher prices and topped the high of $136,995,000 set in 1969. Cattle prices in 1970 averaged $25.20 per hundredweight, compared with $23.90 in 1969. Calf prices averaged $33.10 per hundredweight compared to $30.20 in 1969. Marketings of cattle and calves in 1970 totaled 538,100,000 pounds, 2 percent more than the previous year. Receipts from hog marketings totaled $18,214,000 in 1970, a decrease of 1 percent from 1969. Higher prices contributed to the increase. Prices received for hogs averaged $21.90 per hundredweight in 1970, $.90 higher than the previous year's price.

HOGS ON FARMS

The December 1, 1970 hog inventory in Florida totaled 374,000 head, 13 percent above a year earlier. Pigs saved in 1970 totaled 535,000 head, up 10 percent from 1969. Pigs per litter in the spring of 1970 averaged 7.2, compared with 7.1 a year earlier. Fall 1970 farrowings averaged 6.9 pigs per litter, compared to 6.6 a year earlier.

On December 1, 1970, in the UNITED STATES there were 67,540,000 hogs and pigs, an increase of 19 percent over December 1, 1969. All sheep and lambs on hand in the UNITED STATES, January 1, 1971, totaled 19,560,000 head, 4 percent below a year earlier.

1/ Balance sheet estimates. Total of marketings, farm slaughter, deaths, and on hand end of year equals total of calf crop, inshipments and on hand beginning of year. 2/ Not strictly a calving rate. Figure represents calves born expressed as percentage of the number of cows on farms and ranches January 1, 1970. 3/ Excludes interfarm sales, but includes animals custom slaughtered for use on farms where produced. 4/ Does not include animals custom slaughtered for farmers at commercial establishments.

1/ Civilian consumption only, beginning 1941. 2/ Approximately at wholesale level of distribution. 3/ Equivalent eviscerated weight basis. Although most of the poultry was sold in dressed form until the 1940's, most is now sold ready-to-cook. The entire series was put on the latter basis to achieve comparability. 4/ Measured approximately at wholesale level of distribution. Average weight of eggs 1909-46 is assumed to be 1.5 pounds per dozen; conversion factor subsequently increased 0.01 pound each year through 1952, remained at 1.56 through 1956, thereafter 1.57. This change in factor allowed for the increasing size of eggs marketed. 5/ Not available.
