

IDAHO WHEAT VARIETIES

Released: July 14, 2005

2005 IDAHO WHEAT VARIETIES – SUPPLEMENT

During the 2005 survey, we collected positive reports for 99 different wheat varieties. The top twenty varieties account for 76.7 percent of the wheat planted in Idaho for the 2005 crop. This supplement lists estimates for 33 additional varieties which account for 18.3 percent of Idaho's total wheat planted. Durum and Spring Club wheat varieties are included in this report for the first time.

Included in the report are acreages of wheat in which multiple varieties were mixed at seeding. A total of 12 different combinations of wheat varieties were reported. Only two of these combinations had sufficient reports and acreage to be published.
