## **2006 IDAHO WHEAT VARIETIES – SUPPLEMENT**

During the 2006 survey, we collected positive reports for 77 different wheat varieties. The top twenty varieties account for 77.9 percent of the wheat planted in Idaho for the 2006 crop. This supplement lists estimates for 28 additional varieties which account for 16.8 percent of Idaho's total wheat planted.

Included in the report are acreages of wheat in which multiple varieties were mixed at seeding. A total of four different combinations of wheat varieties were reported. Only one of these combinations had sufficient reports and acreage to be published.
