CROP REPORT FOR WEEK ENDING NOVEMBER 11

AGRICULTURAL SUMMARY

Another week of favorable weather and soil conditions allowed farmers to make good progress with field activities, according to the Indiana Field Office of USDA's National Agricultural Statistics Service. Most farmers have completed fall harvesting activities. Farmers were busy during the week applying Anhydrous Ammonia, spreading fertilizer and lime, moving grain to market, doing fall tillage along with cleaning and storing equipment. Winter wheat condition improved slightly and is rated 80 percent good to excellent.

FIELD CROPS REPORT

There were 6.3 **days suitable for field work**. Ninety-six percent of the corn acreage is now **harvested** compared with 77 percent for last year and 87 percent for the 5-year average. By area, 94 percent of the corn acreage has been harvested in the north, 97 percent in central region, and 99 percent in the south. **Moisture** content of harvested corn is averaging about 15.5 percent.

Ninety-nine percent of the soybean acreage has been **harvested** compared with 90 percent for last year and 96 percent for the 5-year average. By area, 99 percent of the soybean acreage is harvested in the north, 99 percent in the central region, and 99 percent in the south. **Moisture** content of harvested soybeans is averaging about 11 percent.

Virtually all of the winter wheat acreage has been **seeded**. Ninety-seven percent of the winter wheat acreage has **emerged** compared with 71 percent for last year and 86 percent for the 5-year average.

LIVESTOCK, PASTURE AND RANGE REPORT

Pastures and forage crops still need precipitation in most areas. Hay supplies are in short supply around the state. Livestock are reported to be in mostly good condition.
