

2006 Iowa Cropland Data Layer Atlas

This 2006 Iowa Cropland Data Layer Atlas was constructed from 2006 categorized Resourcesat-1 AWiFS imagery (scene outlines shown above). The ground truth for this product utilized the Farm Service Agency Common Land Unit data covering approximately 1202 square miles, Impervious Surface, Forest Canopy, 2001 NLCD non-agricultural classes and the National Elevation Dataset. The Cropland Data Layer (CDL) was produced using See5 decision tree software classifier with a minimum mapping unit of 20 acres.

The CDL of Iowa has been created annually since crop year 2000 and this product makes temporal analysis between years possible to determine such trends as crop rotation, urban expansion and crop acreage variability. The CDL Atlas was created using ArcGIS software from the Environmental System Research Institute, with each page containing a separate Iowa county.

For more details see http://www.nass.usda.gov/research/Cropland/metadata/metadata_ia06.htm

2006 Iowa Cropland Data Layer

Categories

- | | | |
|--------------------------------|------------------------------|---------------------------|
| Corn | Shrubland | Water |
| Soybeans | Deciduous Forest | Commercial/Transportation |
| Alfalfa/Other Small Grains/Hay | Evergreen Forest | Developed, Open Space |
| Idle Cropland/Fallow/CRP | Mixed Forest | Developed, Low Intensity |
| Pasture/Non-Ag/Grassland | Woody Wetlands | Developed, High Intensity |
| | Emergent Herbaceous Wetlands | Bare Rock/Sand/Clay |

DATA SOURCE:
Resourcesat-1 AWIFS courtesy of
USDA Foreign Agricultural Service.

PROJECTION:
UTM zone 15, spheroid WGS84,
datum WGS84. Georegistered to
EarthSat Inc., GeoCover LC.

IMAGE PROCESSING:
See5 decision tree software classifier,
minimum mapping unit 20.

GROUND TRUTH:
The Farm Service Agency Common
Land Unit, Impervious Surface, Forest
Canopy, 2001 NLCD non-agricultural
classes and the National Elevation
Dataset.

MAP PRODUCTION:
ArcGIS 9.1 and 9.2.
