Released June 11, 2007

Volume 07 No. 06

Dear Kansas Farmers, Ranchers and Agribusinesses:

The following tables are from recently published reports by USDA's Agricultural Statistics Board. These data are the direct results of information provided by Kansas producers and agribusinesses to surveys conducted by this office. Thank you for your response to these surveys.

Eldon Thiessen  
Director

### Survey Results Included

- Wheat Production

### Expected Kansas Winter Wheat Production Up 24 Percent

The 2007 Kansas wheat crop is forecast at 361.0 million bushels as of June 1. The current estimate is unchanged from the May 1 estimate but up 24 percent from 2006 crop. The current crop is projected to be harvested from 9.5 million acres, up 400,000 acres from a year ago. Yield per harvested acre is expected to average 38 bushels, unchanged from the May forecast but 6 bushels above the 2006 final yield.

Crop progress was behind the 5-year average during May, and by June 3<sup>rd</sup>, wheat turning, at 36 percent, lagged behind the 5-year average of 58 percent.

The State experienced mostly seasonal temperatures with significant rainfall in most areas during the month of May. Topsoil moisture conditions were mostly adequate or surplus for the State during the month.

As of May 27<sup>th</sup>, wheat condition was rated 11 percent excellent, 26 percent good, 31 percent fair, 20 percent poor, and 12 percent very poor. Condition changed very little during the month of May.

## U.S. WINTER WHEAT PRODUCTION DOWN 4 PERCENT FROM MAY

Winter wheat production is forecast at 1.61 billion bushels, down slightly from the May 1 forecast but 24 percent above 2006. Based on June 1 conditions, the U.S. yield is forecast at 43.2 bushels per acre, down 0.3 bushels from last month but 1.5 bushels more than last year. Grain area totals 37.2 million acres, up fractionally from May 1. Hard Red production is up slightly from a month ago to 1.03 billion bushels. Soft Red is down 2 percent from last month and now totals 341 million bushels. White production totals 237 million bushels, down 1 percent from last month. Of the White production total, 18.9 million bushels are Hard White and 218 million bushels are Soft White. Forecasted head counts from the Objective Yield surveys in the six Hard

Red Winter states (Colorado, Kansas, Montana, Nebraska, Oklahoma, and Texas) are above last year's level in Colorado, Kansas, Oklahoma, and Texas but below in Montana and Nebraska. Condition ratings improved during May in Montana and Texas while the other States showed little change. Harvest was just getting started in Texas and Oklahoma due to delays from wet weather. In Colorado, scattered hail has caused some damage but the beneficial moisture surrounding these storms has been positive. Wet conditions in Kansas, Nebraska, and Oklahoma have increased disease pressure while Montana enjoyed normal precipitation across the State in May.
