**SPECIAL PRESS RELEASE**

Released: July 10, 2008

### KANSAS RANKED 6TH IN AGRICULTURAL EXPORTS

Kansas ranked sixth among the 50 states as an exporter of agricultural products during fiscal year (FY) 2007, according to data compiled by the Economics Research Service using data from National Agricultural Statistics Service, and Census Bureau, U.S. Department of Commerce. Exports from all of the top ten states increased. The total value of Kansas exports, at \$3.8 billion, is up 23 percent from the previous fiscal year and is the highest on record. All categories increased from 2006 except for Seeds. Kansas accounted for 4.7 percent of the \$81.9 billion U.S. agricultural exports in FY 2007.

Kansas ranked first in the Nation for Feed & Fodders, Hides & Skins, and Animal Fats. The export numbers show Kansas ranking second in Wheat & Products. Other top ten rankings for Kansas were Live Animals & Meat (third place with \$596.2 million,) Sunflower Seed & Oil (third place with \$15.9 million), Seed (fifth place with \$33.7 million), and Feed Grains & Products (sixth place with \$752.8 million). Wheat & Products accounted for 26 percent of the State total and 12 percent of the National All Wheat & Products exports. Feed Grains & Products comprised 20 percent of the total Kansas exports and 6 percent of all U.S. Feed Grains & Products exports. Live Animals & Meat tallied 16 and 9 percent of the State and National exports, respectively.

### U.S. AGRICULTURAL EXPORTS UP 19 PERCENT

The United States exported \$81.9 billion of agricultural commodities in FY 2007, up 19 percent from 2006. California continued to lead the Nation in agricultural exports at \$11.3 billion. Iowa ranked second, followed by Texas, Illinois, Nebraska, Kansas, Minnesota, Washington, North Dakota, and Indiana. Agricultural export estimates by State are based on the assumption that if a State contributes a certain percentage of U.S. production, it contributes a similar percentage of export revenues. When appropriate, however, supplemental data (Customs district data, domestic use data, and the Census of Agriculture data, for example) were used to adjust the export share.
