2006 MINNESOTA CORN AND SOYBEAN VALUES OF PRODUCTION SET RECORD HIGHS

Minnesota's 2006 **CORN for Grain** value of production, at a record 3.47 billion dollars, was up 57 percent from the previous record high value of production set in 2005. Since the total production is down, the increase is due to a Marketing Year Average price of \$3.15 per bushel, an increase of \$1.29 over the previous marketing year.

SOYBEAN value of production was estimated at a record 1.90 billion dollars, up 12 percent from last year. An increase in production from 2005 and a 42 cent per bushel increase in the Marketing Year Average price contributed to setting the record value.

SPRING WHEAT value of production was estimated at 357 million dollars, up 37 percent from last year. The increase is due to a 9 percent rise in production, and a 94 cent per bushel increase in the Marketing Year Average price.

OAT value of production was estimated at 20.7 million dollars, up 11 percent from 2005. Although the total production is down 12 percent, the increase was driven by the Marketing Year Average price of \$1.85 per bushel, up 38 cents from the previous marketing year.

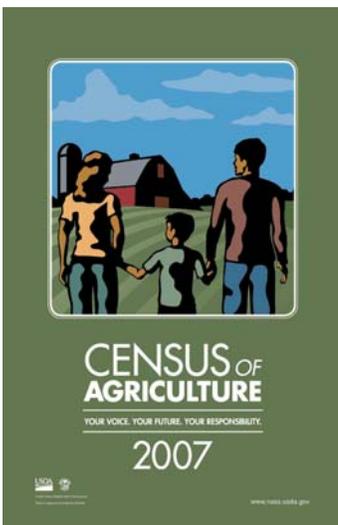

BARLEY value of production was 14.0 million dollars in 2006, up 80 percent from 2005 but down 19 percent from 2004. The total production was 5.40 million bushels and the Market Year Average price was \$2.60 per bushel, up 59 cents from the previous marketing year.

POTATO value of production, at a record 129 million dollars, was up 13 percent from last year's value of production of 114 million dollars. The Marketing Year Average price was down slightly from 2005 but the total production was up by 16 percent.

DRY EDIBLE BEAN value of production was 51.0 million dollars in 2006, up 4 percent from last year. Although total production fell, a \$2.80 per hundred weight increase in the Marketing Year Average price caused the increase in value.

ALL SUNFLOWER value of production was 23.5 million dollars, down 14 percent from 2005. A total of 149 million pounds were produced at an average price of \$16.20 per hundred weight.

ALL HAY value of production was 408 million dollars, down 1 percent from 2005. The Marketing Year Average price was \$72.00 per ton and a total of 5.68 million tons were produced in 2006.

Watch for your
Census Questionnaire
in late December 2007.

JANUARY MILK OUTPUT UP 3.5 PERCENT IN MINNESOTA

Totaling 739 million pounds, the state's January milk production was up 3.5 percent from January 2006.

Output per cow was 1,625 pounds in January, up 20 pounds from last January. Milk cows for January averaged 455,000 head, the same as December, and 10,000 above a year ago.

January 2007 milk output in the 23 major states was 14.2 billion pounds, up 1.4 percent from January 2006. Milk cows in the 23 states averaged 8.28 million head, up 81,000 from the previous year. At 1,719 pounds, production per cow was 8 pounds greater than January 2006.
