Cooperating with Mississippi Department of Agriculture and Commerce

This report contains the results from the **Crop Progress and Condition** weekly survey. The survey is completed by county extension agents' visual observations and contact with producers in their county. These data are also posted on our web site at <https://www.nass.usda.gov/ms> and in a more detailed report at <https://www.nass.usda.gov>. Thanks to all of the county extension agents who responded to this survey.

Week Ending: October 9, 2022

Released: October 11, 2022

According to the National Agricultural Statistics Service in Mississippi, there were 6.9 days suitable for fieldwork for the **week ending Sunday, October 9, 2022**. Topsoil moisture supplies were 20 percent very short, 48 percent short, 32 percent adequate, and 0 percent surplus. Subsoil moisture supplies were 24 percent very short, 55 percent short, 21 percent adequate, and 0 percent surplus.

Crop Progress for Week Ending October 9, 2022

Crop	This week (percent)	Last week (percent)	Last year (percent)	5-year average (percent)

Mississippi Subsoil Moisture Map for the week of September 26 – October 2, 2022

The Soil Moisture Active Passive (SMAP) provides measurements of soil moisture in the root zone as a weekly average, represented by pixels. Each pixel represents 9 by 9 kilometer plot or about 20,000 acres. The SMAP data measures soil moisture in cubic centimeters of water/cubic centimeters of soil. The scale represents the percent of water in a given volume of soil. More information and additional mapping is available at <https://nassgeo.csiss.gmu.edu/CropCASMA/>.
