MEAT ANIMAL AND MILK PDI FINAL ESTIMATES

USDA's National Agricultural Statistics Service has published final estimates for Meat Animals Production, Disposition, and Income, and final estimates for Milk Disposition and Income, including revisions made by the Agricultural Statistics Board (ASB), for the production years 2018 through 2023. The production, disposition, and income from meat animals for 2018-2023 were published during calendar years 2019-2023. The disposition and income from milk production for 2018-2023 were published during calendar years 2019-2023. Data included in these final publications provide a historic record and a benchmark for current estimates.

Revisions were made after a thorough review of the original survey data and all additional data now available, including the 2022 Census of Agriculture. Other data series considered included slaughter data, shipment records, imports, exports, and any other available administrative information. For Milk Disposition and Income, other data series considered included Federal Milk Market Orders, receipts of milk by plants and dealers, and any other available administrative information. The 2018-2013 Meat Animal Production, Disposition, and Income and Milk Disposition and Income estimates are considered final and will not be revised again.

For a full copy of the *Meat Animals Production, Disposition, and Income Final Estimates 2018-2023* and *Milk Disposition and Income Final Estimates 2018-2023* reports please visit www.nass.usda.gov.
