Estimates made by the Ohio Field Office are based on information supplied by farmers and agri-businesses. These estimates are the result of the data collected on probability designed surveys. Considerable information is collected from farmers randomly selected for telephone or personal interviews. Data for county estimates are collected from a large mail survey and, where available, check data are used to the extent possible. Our sincere thanks are also extended to the office staff, field and telephone interviewers of the Ohio Field Office.

OHIO 2005 CROP SUMMARY

Winter Wheat was 2 percent jointed by April 3, a day later than last year. Harvest started around the first of July, and was virtually completed by July 24. Winter wheat yield was estimated at 71 bushels, up 9 bushels per acre from the 62 bushel per acre recorded in 2004. Growers harvested 830,000 acres of winter wheat for grain in 2005, a decline of 60,000 acres from 2004. Total wheat production was estimated at 58.9 million bushels, a 6.8 percent increase from the 55.2 million bushels produced in 2004.

Ohio's 2005 average winter wheat yield of 71 bushels per acre was 1 bushel below the record yield of 72 bushels set in 2000.

Corn was 95 percent planted by May 22, compared to 85 percent in 2004 and 80 percent for the five-year average. Ninety-nine percent of the corn crop was emerged by June 12, compared to 92 percent for last year and the five-year average. Corn silage harvest began at the end of August, and was 95 percent completed by October 2. This was more than 3 weeks ahead of last year and 15 days ahead of the five-year average. One percent of the corn for grain was harvested by September 18, identical to the harvest progress of last year and the five-year average. Ninety percent of the corn was harvested by November 20. Corn yield for grain was estimated at 143 bushels per acre, down 15 bushels from last year. There were 3.25 million acres harvested in 2005, up 140,000 acres from 2004. Total corn production was 464.8 million, compared to 4.91 million bushels in 2004.

Ohio's average corn yield for 2005 at 143 bushels per acre was 15 bushels below the record yield of 158 bushels set in 2004.

Soybeans were 15 percent planted by April 24 and 99 percent planted by June 12. This was two and a half weeks ahead of last year and the five-year average. Ninety-eight percent of the soybeans were emerged by June 19, which was 15 days ahead of last year and 16 days ahead of the five-year average. Soybean harvest was 5 percent complete by September 18. Farmers had 95 percent of the crop harvested by November 13, which was 3 days ahead of last year, but 2 days behind the five-year average. Growers harvested 4.48 million acres of soybeans in 2005 and reported an average yield of 45 bushels per acre, a decline of 2 bushels per acre from the previous year. Total soybean production was estimated at 201.6 million bushels, down 6.1 million bushels from 2004.

Ohio's 2005 average soybean yield of 45 bushels per acres was two bushels below the record level set in 2004 and the second highest yield on record.

Oats were 10 percent planted by April 10 and ninety-nine percent planted by May 15. This was 15 days ahead of last year and 11 days ahead of the five-year average. 2005 LIVESTOCK, DAIRY AND POULTRY SUMMARY

Highlights of Ohio's livestock statistics for 2005 include cattle inventories dropping to 1.28 million head; 2 percent below last year's level of 1.3 million head. Dairy cow numbers increased by 7,000 head and total milk production rose 4 percent over last year's numbers. Sheep breeding stock numbers declined 4 percent and wool production dropped 11 percent from last year. Hog inventories, in 2005, were the highest since 1998. Egg production was up 2 percent, broilers were up 4 percent, but turkey numbers were down 2 percent from 2004. Honey production in 2005 was 12 percent higher than 2004.

Cattle and calf inventories, at 1.28 million on January 1, 2006, dropped 20,000 head from last year. Even though beef and dairy cow inventories are both on the rise, the decrease in total numbers are primarily from steers, bulls and replacement heifers. Ohio ranks 26th in the nation for cattle inventory, despite the fact that cattle operations have remained static at 27,000 in both 2005 and 2006. Cattle on feed numbers are down 10 percent from the previous year. Cattle inventory values increased 8 percent from \$950 per head in January 2005 to \$1,030 per head in January 2006. The total inventory value of cattle & calves rose \$83 million over last year's figure generating a 7 percent increase.

Milk cow numbers increased from 266,000 head in January 2005 to 273,000 head in January 2006. Total milk production in Ohio rose 4 percent from 4.56 billion pounds in 2004 to 4.74 billion pounds in 2005. Milk producers received prices 5 percent lower than last year. Average milk prices, for 2005, decreased from \$16.60 per cwt. in 2004 to \$15.80 per cwt. in 2005. The number of milk cow operations fell off slightly in 2005 bringing the total for Ohio to 4,400. Milk production per cow rose from an annual average of 17,338 pounds in 2004 to 17,567 pounds in 2005. Wayne county continues to lead the state in dairy cows followed by Mercer and Holmes counties, respectively.

Hog inventories increased from 1.45 million head in December 2004 to 1.55 million head in December 2005. Inventory levels increased by 7 percent and have not been this high since 1998. The number of hog operations declined 2 percent from 4,000 farms in December 2004 to 3,900 farms in December 2005. Hog prices made no significant change in 2005. Hog prices increased slightly from \$49.30 per cwt. in 2004 to \$49.40 per cwt. in 2005. The leading hog counties in the state are Mercer, Darke and Putnam, respectively, which represent over 27 percent of Ohio's hog inventories.

Sheep and Lamb numbers decreased from 142,000 head in January 2005 to 141,000 head in January 2006. This was a 1 percent decrease from last year. Breeding stock inventories decreased 4 percent, from 122,000 head in 2005 to 117,000 head in 2006. The 2005 lamb crop dropped 5 percent. The value of sheep and lamb inventories rose 2 percent in 2005, to \$167 per head. **Wool** production in Ohio decreased 11 percent from last year. There was a decrease of 7,000 head shorn last year, and fleece weights decreased from 6.5 pounds per head to 6.0 pounds per head. Ohio still ranks 13th nationally in sheep numbers, and remains the leader in the Eastern United States. The leading three counties for breeding stock numbers are Knox, Harrison and Licking, respectively, which represent more than 13 percent of Ohio's breeding stock.

Meat and Other Goat numbers dropped from 29,000 head in January 2005 to 28,000 in January 2006. Total numbers were down 3 percent from last year. However, **Milk Goats** numbers climbed from 9,500 head in January 2005 to 10,700 head in January 2006. This was a 13 percent increase from last year.

Laying Hen numbers climbed 3 percent higher from 27.9 million head in December 2004 to 28.8 million head in December 2005. Ohio still ranks second in the U.S. for both laying hens and egg production. Total egg production increased 2 percent from 7.36 billion eggs in 2004 to 7.51 billion eggs in 2005. Ohio supplied 8.3 percent of the nation's eggs in 2005. The generated value of production for 2005 was in excess of \$228 million. **Turkey** numbers in Ohio decreased from 5.80 million birds in 2004 to 5.70 million birds in 2005. Pounds produced declined only 3 percent, but prices per pound increased 5 percent, raising the value of production to \$93.5 million.

Bee Colonies were down from 16,000 colonies in 2004 to 15,000 colonies in 2005. Yield per colony jumped up 19 percent to 69 pounds per hive. Production increased 12 percent from 928 thousand pounds, in 2004, to 1.04 million pounds in 2005. Value of production rose 3 percent, settling at slightly below \$1.46 million. Prices went down 7 percent from \$1.52 per pound in 2004 to \$1.41 per pound in 2005.

Mink farmers experienced a 1 percent increase in females bred in 2005. There were 18,600 females bred in 2005 compared to 18,400 bred in 2004. Pelts produced in 2004 increased 12 percent from the previous year.

Cattle inventory, on January 1, 2006, at 1.28 million head, is only 7 percent above the all-time record low of 1.20 million head set in 2003. Ohio cattle ranches received \$80 more per head in 2005; an 8 percent increase from last year.

Ohio dairy cows produced 4.743 billion pounds of milk in 2005. The population of Ohio, in 2005, is estimated at 11,464,042. This level of production could provide nearly one gallon of milk per week for every person in Ohio.

Hog numbers on December 1, 2005, haven't been this high for 7 years. Since 1867, the lowest hog inventories occurred in 2001 at 1.43 million head, the highest inventory on record was in 1944 during WWII at 4.133 million head.

Wool production during 2005, at 800,000 pounds, and fleece weights, at 6.0 pounds per head, are both all-time record lows since records have been kept. Inventory values have doubled in the past 10 years.

Egg prices fell from 54.5 cents per dozen in 2004 to 36.5 cents per dozen in 2005. Egg producers have experienced a 33 percent decline in prices translating to \$105 million less than they received in 2004.

Prices were down 7 percent in 2005, but Ohio bees managed to increase yields by 19 percent pushing production up 12 percent and thereby increasing the value of production by over 3 percent.

¹A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales. ²Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.
