## United States

The 2008 **winter wheat** planted area, at 46.6 million acres, is 4 percent above last year but down slightly from the previous estimate. Area harvested for grain is forecasted at 40.3 million acres, up slightly from the June forecast and up 12 percent from last year. Area planted to **other spring wheat** for 2008 is estimated at 14.2 million acres, up 7 percent from last year. Grain area is expected to total 13.8 million acres, up 6 percent from 2007.

The 2008 **corn** planted area for all purposes is estimated at 87.3 million acres; down 7 percent from last year when corn planted area was the highest since 1944. Despite the decrease, planted acreage is the second highest since 1946, behind last year, as high prices continue to provide incentive to plant corn. Growers expect to harvest 78.9 million acres for grain, down 9 percent from last year when harvested area was the highest since 1933. If realized, this would be the second highest since 1944, behind last year.

**Barley** growers seeded 4.13 million acres for 2008, up 3 percent from the 4.02 million acres seeded last year. Acres for harvest, at 3.64 million, are up 4 percent from 2007.

**Sugarbeet** area planted totals 1.08 million acres, down 15 percent from 2007. The area for harvest is forecast at 1.03 million acres, down 18 percent from 2007. Planted acres decreased from 2007 in all States except Colorado.

Producers expect to harvest 60.4 million acres of **all hay** in 2008, down 2 percent from 2007.
