FOR IMMEDIATE RELEASE

## USDA To Measure Farmers' Small Grain Yields

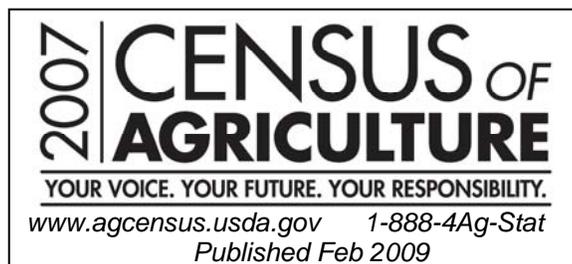

HARRISBURG, PA, March 17, 2008 - - - USDA's **Agriculture Yield Survey** is conducted in all states except Alaska and Hawaii. It is the primary tool used by USDA's National Agricultural Statistics Service (NASS) to measure crop production throughout the growing season. This survey takes only minutes to complete, yet produces some of the most valuable information farmers rely on during the crop year. The survey enables NASS to track and report any changes that might occur in expected yields due to weather, pests, diseases or other factors. In Pennsylvania, approximately 350 producers of hay, barley, oats, and winter wheat are asked to assist in this important survey each month from May through August.

"Participation of our farmers is essential to ensure that Pennsylvania production is being accurately measured," said Marc Tosiano, Director of the Pennsylvania Field Office.

Near the end of each month selected producers will be mailed a pre-survey letter explaining the importance of the survey along with a questionnaire. Operators may return the survey through the mail, complete it through our secure web site, or wait to be telephoned or personally visited by an enumerator, who will collect the required survey information.

Individual information is completely **CONFIDENTIAL** by law. "NASS safeguards the confidentiality of all survey responses and publishes only state and national level data, ensuring that no individual operation or producer can be identified," stated Marc Tosiano. "Complete, accurate and timely reporting by farm operators makes the Agricultural Yield Survey an effective tool for measuring the Nation's crop production."

Results from the surveys will be published in the *Crop Production* report from Washington, D.C. monthly, usually between the 9<sup>th</sup> and the 12<sup>th</sup> of the month. Results will also be available on the internet at [www.nass.usda.gov](http://www.nass.usda.gov). Data from the survey is also available in the *Keystone Ag Digest*. This bi-monthly publication is available from our web site, [www.nass.usda.gov/pa](http://www.nass.usda.gov/pa). For more information, contact Sherry Deane or Marc Tosiano at 1-800-498-1518.
