

County and State Ag Statistics - *How to get the most recent information from the Internet!*

After this book is printed, use our Internet site to find:

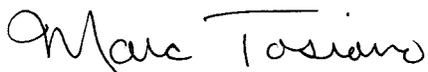

- > **Data published for more recent years.**
- > **Statistics in this book that have been revised.**
- > **Historical statistics over several years in the past.**

You may want to use these statistics in your own analyses on a computer. The NASS Internet site allows downloading of these data in various electronic formats.

Charts and maps are also available on the Internet for Pennsylvania and the Nation.

Try these Internet services at www.nass.usda.gov :

- 1) The ***Quick Stats*** option offers county & state statistics for all commodities, operator characteristics and much more through the Census of Agriculture item. The census data is not as timely as the annual statistics in #2 below, but census data is the most complete picture of ALL AGRICULTURE.
- 2) ***Quick Stats*** also shows the most up-to-date annual county & state statistics for major commodities including crop forecasts during the growing season through the State and County button. These data are more recent than the Ag Census in #1 above, but is only limited to selected major commodities.
- 3) Selecting ***Pennsylvania*** in the “Statistics by State” option takes you to the Pennsylvania field office site. The new issue of this book is available as each page is approved for release beginning in April; look for ***Annual Statistical Bulletin*** under the Pennsylvania Publications section. Also, click on ***Pennsylvania Charts or Maps*** button in the section named “More State Features” for Power Point files available to download to your computer.

Marc Tosiano, Director
NASS-PA

***This information is only available
with the help of the many growers
that complete and return NASS
Surveys and the Ag Census.***

Thank You!!
