

Farm Labor, 2007

By Brijette L. Robinson

Pennsylvania farmers voluntarily participate in quarterly agricultural labor surveys in April, July, and October. These surveys provide data concerning the number of hired farm workers, hours worked, and wage rates. The survey reference week is the seven-day period (Sunday through Saturday) which includes the 12th day of the month. Results for Pennsylvania are published as part of Northeast Region II, which includes Delaware, Maryland, and New Jersey.

The total number of workers hired by farm operators in the Northeast II Region during 2007 ranged between a low of

33,000 in April to a high of 38,000 in October. The average hours worked during the survey week by all hired workers varied from 37.1 hours in April 2007 to 42.0 hours in July 2007.

In 2007, all hired workers earned between \$10.55 per hour in April to \$10.78 per hour in July. During the same period, field workers' hourly wage rates ranged between \$9.62 in July to \$10.34 in April. In contrast, livestock workers' hourly wage rates ranged from \$8.56 in April to \$10.04 in July.
