This report contains the results from the June Ag Yield and Objective Yield Surveys. Our thanks to all farmers who responded to the Ag Yield survey and to those wheat producers who permitted objective measurements to be taken in their fields.

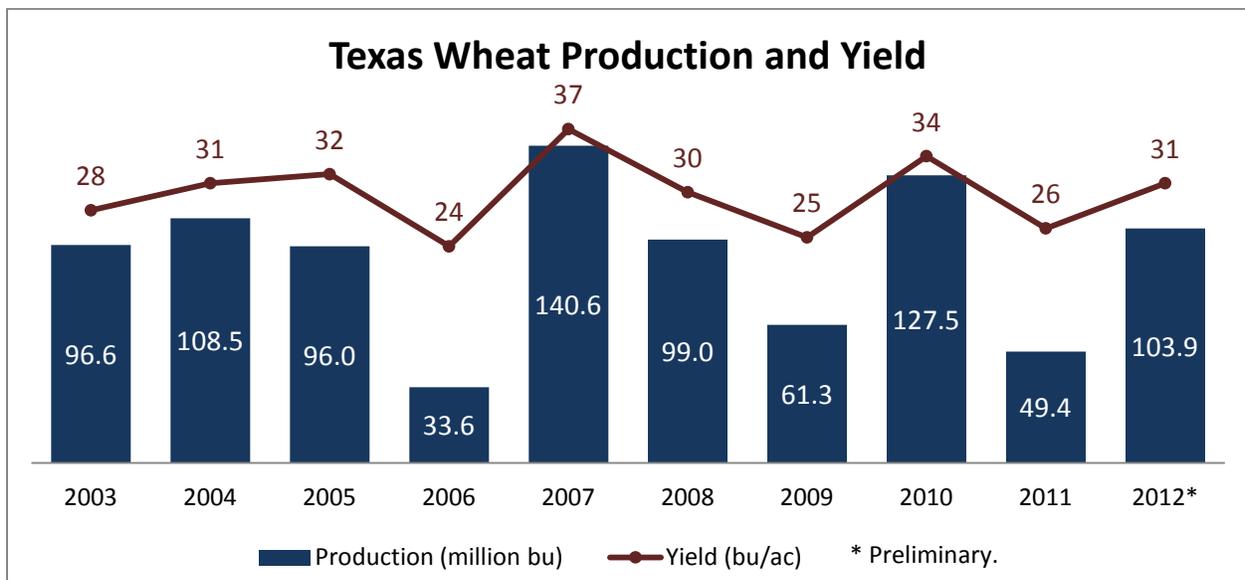

According to a June 1 survey conducted by the USDA-NASS, Texas Field Office, Texas wheat producers expect to harvest 103.9 million bushels, up from 49.4 million in 2011 and down 19 percent from 2010. This forecast is unchanged from the Texas May forecast.

Statewide yield is expected to average 31 bushels per acre, up 5 bushels from last year, and down 3 bushels from two years ago. Harvested acreage for grain, at 3.4 million acres, is up 76 percent from 2011.

Production on the Northern High Plains is forecast at 34.0 million bushels, up 86 percent from last year. Winter wheat production in the Blacklands is forecast at 27.4 million bushels, up 63 percent from last year. The Low Plains' production is estimated at 23.3 million bushels, up from 7.0 million bushels last year.

United States winter wheat production for 2012 is forecast at 1.68 billion bushels, up 13 percent from 2011. Yield is expected to average 47.3 bushels per acre, 1.1 bushels more than a year ago. Acreage to be harvested for grain is expected to total 35.6 million acres, up 10 percent from last year and unchanged from May 1.

As of June 11, 2012, 56 percent of the winter wheat acreage was rated fair to good, compared to 21 percent fair to good last year and harvest was 50 percent complete compared to a 5 year average of 30 percent.

^{1/} June 1, 2012.

The June wheat yield and production forecast are based on two surveys conducted by the Texas Field Office of USDA-NASS: a farm operator survey and an objective yield survey. The farm operator survey was conducted primarily by telephone with some use of mail, internet and personal interviewers. The objective yield survey collects actual stalk counts and head weights from plots set up in producer fields across the state.

NASS provides accurate, timely, useful and objective statistics in service to U.S. agriculture. The Agency invites you to express your thoughts and provide occasional feedback on our products and services by joining a data user community.
