Weather Summary- For the week ending June 11, 2023

West Virginia began the week under high pressure, but on the cooler side as the State was in the wake of a cold front that had just passed through. The high pressure continued into Tuesday evening with no precipitation and below normal temperatures. Overnight into Wednesday, a dry cold front crossed over producing isolated light showers over southern parts of the State. Wednesday was cool again after the front and with a little instability in the upper levels, produced a few more isolated showers. At this point, most of West Virginia was dry and colder than normal by 5 to 8 degrees. Thursday was mostly sunny and cool with morning temperatures in the 30s and 40s, and highs in the 60s and 70s. Friday was mostly sunny and hazy with isolated showers up north. Saturday was dry, hazy, and warmer than most days this week with highs in the upper 70s to upper 80s. Sunday began dry, but as a strong cold front approached from the west clouds increased and precipitation began in the early afternoon. Showers and thunderstorms continued through the evening and into Monday. This week was much cooler than usual with all stations ending 4 to 9 degrees below average. West Virginia was also dry, as all stations reported below average precipitation this week. The orange or pink sunrises and sunsets as well as the white, hazy sky when there are no clouds are from the ongoing forest fires in Canada.

Temperatures: Keyser had the highest recorded temperature of 89 degrees. Beckley, Marlinton, and Terra Alta had the lowest recorded temperature of 38 degrees. The state average temperature was 61 degrees.

Precipitation: Pineville had the highest recorded amount of precipitation with 0.88 inches. Belington and Elkins had the lowest recorded amount of precipitation with 0.01 inches. The state average precipitation was 0.24 inches.

WV drought conditions: The northern half of West Virginia is experiencing D0 (abnormally dry) conditions with D1 (moderate drought) in portions of Pocahontas, Pendleton, Berkeley, and Jefferson counties.
