Statistics Service

### ACKNOWLEDGMENT

This report is made possible through a cooperative effort of the Florida Agricultural Statistics Service, USDA, and the Florida Department of Agriculture and Consumer Services.

Many agricultural producers, associated allied industries, and government agencies associated with the livestock industry voluntarily supplied basic data used to develop these statistics. Their contributions are sincerely appreciated.

### FLORIDA CASH RECEIPTS SUMMARY

Florida's livestock industry had gross receipts of \$1.1 billion during 1995, a decrease of \$83 million from 1994. This was the lowest level since 1987.

Milk sales at \$364 million remained the largest contributor to gross receipts. However, receipts from milk receipts were down from 1994 by \$45 million. Cattle and calf sales brought in \$290 million, down \$46 million from the previous year and the lowest level since 1986. Chickens and egg receipts in 1995 were \$315 million, a record high.

Chicken and egg receipts increased by \$24 million, and replaced Cattle and Calves as the number two contributor to gross receipts. Hog receipts decreased by 0.8 million dollars. Honey receipts were \$12 million, an increase of three million dollars over 1994. The "Other" category, (which includes horses, goats, sheep, aquaculture products, and other categories not listed separately) at \$116 million, decreased by \$18 million in 1995.

## DAIRY SUMMARY

Florida dairies produced 2.38 billion pounds of milk in 1995. This was 242 million pounds more than produced during 1994 and 177 million pounds less than the production of 2.56 billion pounds of 1993.

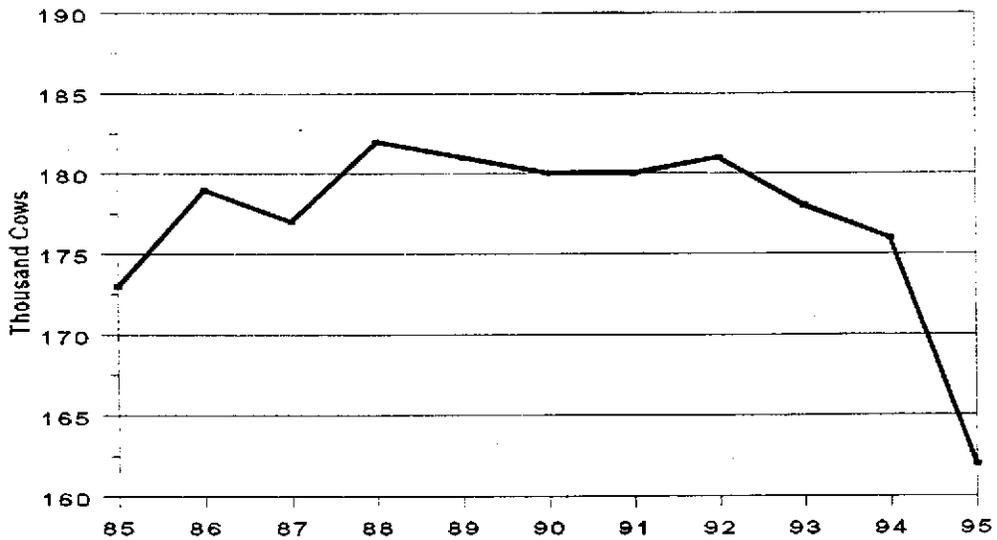

An average of 162,000 milk cows were on Florida farms and commercial dairies in 1995. This was a decrease of 1,400 from 1994. Compared to other States, Florida ranked 15th among the States in the average number of milk cows, as well as 15th in total milk production.

Cash receipts from marketings of Florida milk in 1995 totaled 364 million dollars, \$44 million less than 1994.

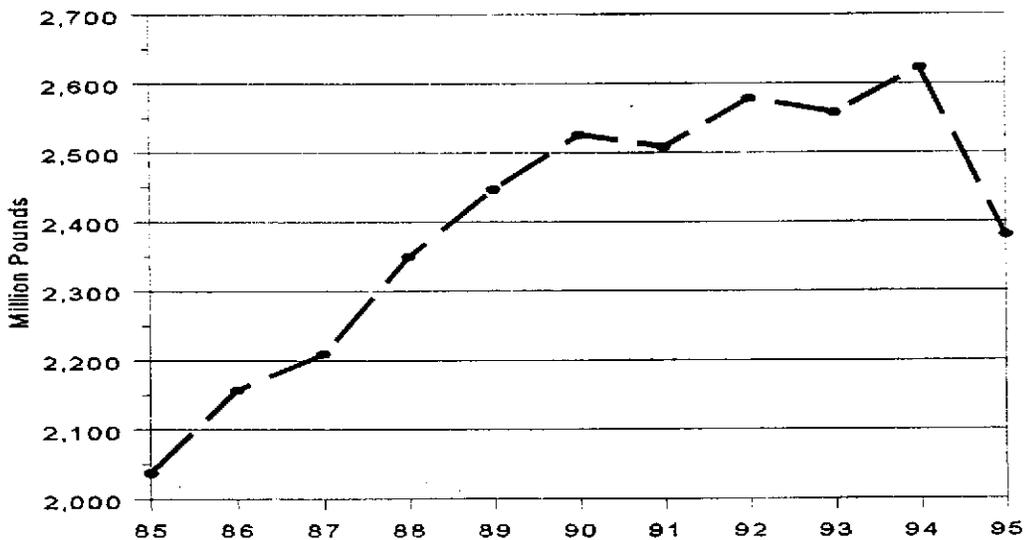

Total United States milk production was 155.6 billion pounds in 1995, compared to 153.7 billion pounds in 1997. The average number of milk cows on U.S. farms and dairies during 1995 was 9,461,000, a decline of 39,000 from 1994. The average annual milk production per cow was a record 16,451 pounds, above last year's level (which was also a record), by 276 pounds.

Nationwide, cash receipts from marketings of milk during 1995 totaled 19.9 billion dollars, down less than one percent from 1994. Production returns averaged \$12.93 per hundredweight, 19 cents less than 1994's average of \$13.12 per hundredweight.

## 1996 COUNTY SUMMARY

Okeechobee County continues to have almost three times as many dairy cows as any other county in Florida. The three leading counties (Okeechobee, Lafayette and

Highlands), account for just over one-third of the dairy cows in Florida.

1/ Partial balance sheet estimates by States: The sum of inventory, January 1, 1995, calf crop and inshipments is equal to the sum of marketings, farm slaughter, deaths, and inventory, January 1, 1996. Farm slaughter and deaths are not included in this table. 2/ Excludes interfarm sales within State, but includes custom slaughter for use on farms where produced.

1/ An operation is any place having one or more head of beef cows on hand at any time during the year. 2/ Included in operations with cattle. 3/ Combined with other size groups.

## POULTRY AND EGG SUMMARY

### VALUE

The total value of Florida chicken and egg production in 1995 was \$314.5 million, up from \$290.9 million in 1994. Egg production was valued at \$95.2 million, up three percent from the previous year. The average annual price for eggs (hatching and table eggs combined) was 48.1 cents per dozen, 1.6 cents more than in 1994.

The value of broilers produced in Florida during 1995 totaled \$218.4 million, an increase of 14 percent from a year earlier. The average annual price of broilers in 1995 was 35.5 cents per pound, an increase of 2.0 cents per pound from 1994, and the highest average annual price in 10 years.

The value of sales from Other Chickens (spent hens, excluding broilers) was \$1.0 million, down 28 percent from a year earlier.

### INVENTORY

The average number of layers during 1995 was 9.0 million, down seven percent from the previous year. Hens and pullets of laying age on farms on December 1,

1995, were 9.7 million, of which 5.9 million were 1 year and older. Pullets not yet of laying age numbered 1.6 million down from 2.4 million birds in 1994.

### PRODUCTION

Florida broiler production in 1995 totaled 615.0 million pounds, up 7.8 percent from 1994 and a record high. Broilers raised in Florida during 1995 totaled 139.8 million birds, up five percent from 1994.

Egg production totaled 2,374 million, down 6.4 percent from 1994. There were 2.3 billion eggs produced and the average eggs laid per layer was 261 during 1995.

Commercial hatcheries produced 134.0 million straight run chicks in 1995, down from, 150.8 million in 1994. Broiler-type chicks accounted for 91 percent, and egg-type chicks were nine percent of the total eggs hatched.

## TERMS AND DEFINITIONS

**BROILERS** are meat-type chickens raised commercially and usually marketed around 7 weeks of age.

**EGGS** include both table and hatching eggs. Market egg prices are calculated on a farm basis, cases exchanged. They include all grades and sizes, but exclude charges for hauling, grading or packaging. Prices for hatching eggs are not published separately. Annual egg production, price, and value statistics are for table and hatching eggs combined.

**OTHER POULTRY** cash receipts include chickens other than broilers, turkeys, and miscellaneous farm poultry.

**CURRENT YEAR** data are preliminary and subject to revision.

**SURVEY METHODOLOGY**--Estimates for hens and pullets of laying age, pullets not yet of laying age, and of egg production are based upon data obtained from a sample of commercial chicken and egg producers. This sample is selected from the universe of Florida poultry management units, and includes approximately 93 percent of the total commercial laying flock.

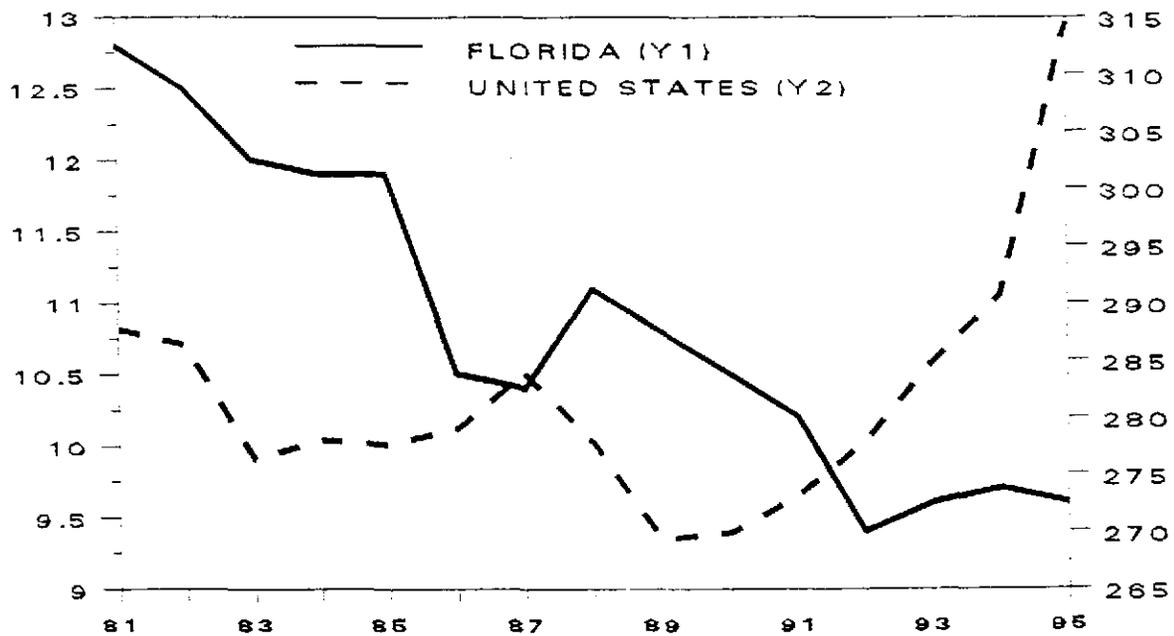

During December of each year, all known commercial egg producers in Florida are contacted. This complete enumeration establishes the annual universe of management units. Management units include all independent producers as well as contractors who report for a contractee.

## HONEY

**FLORIDA:** Honey production in 1995, at 19,780,000 pounds, increased 2 percent from the 1994 production of 19,320,000 pounds. Florida ranks fourth behind North Dakota, South Dakota, and California in honey production during the year. There were 230,000 colonies, the same as 1994, and the yield was 86 pounds per colony, up 2 pounds from 1994. Producers received an average of 63 cents per pound, 16 cents more than the 1994 average. Value of the crop increased from \$9,080,000 in 1994, to \$12,461,000, in 1995, a 37 percent increase.

**UNITED STATES:** Honey production in 1995 from producers with five or more colonies totaled 210 million pounds, down 3 percent from 1994. There were 2.65 million colonies producing honey in 1995, compared with 2.77 million in

1994. Yield per colony averaged 79.5 pounds, up 1.1 pounds from the 78.4 pounds in 1994. Colonies which produced in more than one State were counted in each State and yields per colony may be understated. Producer honey stocks were 42.2 million pounds on December 15, 1995, down 29 percent from a year earlier.

Prices for the 1995 crop averaged 64.4 cents per pound, up 22 percent from the 1994 price of 52.3 cents per pound. Prices are based on retail sales by producers and sales to private processors and co-ops. At the U.S. level, prices for each color are derived by weighting State average prices by the State quantities sold. Prices were higher for all color classes in 1995.

## CATFISH

### FLORIDA CATFISH

The total number of catfish operations in Florida on January 1, 1996 was 17 with a water surface area of 240 acres and total sales in 1995 of \$280,000. Of these 240 acres, 30 acres were used for broodfish.

### 15 SELECTED STATES

Catfish growers in the 15 selected States had sales of \$374 million during 1995. These sales were down 6 percent from the 1994 total of \$397 million. Sales of all foodsize fish totaled \$353 million, down 6 percent from last year's total of \$374 million. Sales of fingerlings and fry totaled \$16.1 million, compared with \$17.6 million in sales during 1994. Sales of stockers totaled \$4.75 million, down 11 percent from the \$5.32 million in sales during 1994. Sales of brood fish previously used for breeding totaled \$318 thousand, compared with \$384 thousand during 1994.

Direct sales to processors accounted for 95 percent of the total sales of food size fish. Fifty-four percent of the stockers sales were to other producers.

The total number of operations on January 1, 1996, in the 15 selected States was 1,320, up 4 percent from the July 1, 1995, total of 1,267. The number of operations in the top 4 producing States (AL, AR, LA, and MS), increased 11 percent from July 1, 1995.

The water surface acres being used for catfish production totaled 167,000 acres, up 5 percent from the July 1, 1995, total. Of the total acres, 4,405 are to be renovated during the period of January 1, 1996, to June 30, 1996. An additional 5,016 acres are under construction or expected to be constructed and in use by July 1, 1996. During the period of July 1, 1995, through December 31, 1995, 1,892 acres were taken out of production. As of January 1, 1996, 5,555 acres were being used for broodfish production.

Catfish producers had 1.16 million broodfish on hand January 1, 1996, down 11 percent from the 1.30 million on hand January 1, 1995. All foodsize fish on hand totaled 228 million on January 1, 1996, up 13 percent from the 202 million fish on hand the previous year. Large foodsize showed the largest increase of the three categories from January 1, 1995 rising 46 percent. Of the total number of foodsize fish, 6.6 million were large foodsize (over 3 pounds per fish), 64.8 million were medium foodsize (1 1/2 pounds to 3 pounds per fish), and 156.2 million were small foodsize fish (3/4 pound to 1 1/2 pounds per fish). Total number of stockers on hand January 1, 1996, at 628 million, were up 13 percent from the previous year's 554 million stockers. The 628 million stockers included 289 million large stockers (over 180 pounds to 750 pounds/1,000 fish) and 340 million small stockers (over 60 pounds to 180 pounds 1,000 fish). There were 835 million fingerlings on hand January 1, 1996, up 15 percent from the 725 million fingerlings on hand January 1, 1995.

## CONFIDENTIALITY OF COLLECTED DATA

All information collected from individual agricultural producers is held strictly confidential. Data provided by individual producers or other agricultural firms are used only to compile and publish statistics at the county, State, and national levels. Statistics at the county and State level are not published if they will potentially disclose information about an individual or operation. In addition, all names and addresses obtained by this office are held confidential.

## RELEASE DISTRIBUTION POLICY

Florida Agricultural Statistics Service (FASS) publications are provided free of charge to all Florida agricultural producers and other respondents to FASS surveys. Also entitled to free FASS publications are news media that use agricultural statistics in their publications, cooperating State agencies, and other USDA agencies that have an essential need for this information. Publications picked up at the FASS office will be provided at no charge.

Other persons or entities will be assessed a nominal charge to receive individual publications or to be placed on distribution list for future FASS publications.
