

F O R E W O R D

This is the eleventh in a series of statistical summaries on vegetable crops in Florida. Through the joint efforts of the Florida Crop and Livestock Reporting Office of the Agricultural Marketing Service, U. S. Department of Agriculture and the Department of Agricultural Economics, Agricultural Experiment Stations, University of Florida, data are presented on the acreage, production, and value of 17 vegetable crops with additional data on production and harvesting costs for certain crops in specific areas.

The purpose of this publication is to present in summary form the more important and basic information that growers are likely to need in analyzing their individual operations with respect to production and marketing problems. In addition to this annual statistical summary, the Crop Reporting Service issues monthly reports on the acreage and potential production of vegetable crops by seasons (fall, winter, spring, and summer). This timely periodic information when properly used should encourage judicious planting and more orderly marketing programs. The ready availability of facts, both current and historic, should exert a much needed stabilizing influence in an industry that is very sensitive to exaggerations and unfounded rumors.

With the exception of the shipment information, the data contained herein are estimates and are based on reports by, and interviews with, growers, shippers, marketing associations and organizations, seedsmen, railroad representatives, canners and other processors. We gratefully acknowledge our indebtedness to each person and organization contributing to the development of these data.

We further acknowledge the assistance extended by such agencies as the Agricultural Extension Service through its county agricultural agents, the Federal-State Inspection and Market News Services, the Florida State Marketing Bureau, the Florida State Marketing Board, the Agricultural Stabilization and Conservation Committee, the State Plant Board and other well informed sources.

Much credit is due to our entire clerical personnel for the painstaking work they have done in preparing this booklet for publication. Arlene Kruse and Joyce Cooper handled most of the assembling of data and the cutting of stencils.

I N D E X

Each crop generally carries the following sequence of data by season: Name of crop - Season; Acres for harvest by Counties; Acreage, production and value - State summary; Acreage and production by counties and areas, 1954-55; Shipping data; Per acre costs and returns. Crops that harvest in more than one season are then combined in one total grouping classified as "All" and placed before the breakdown by seasonal groupings. Yellow pages are placed mainly as dividers between crops with per acre cost and returns on or adjacent thereto.

DEFINITIONS AND EXPLANATIONS

SEASONAL GROUPINGS - In order that competitive production within the State of Florida and the United States may be classified on a National basis under reasonably uniform groups, we have established a National pattern which is based on the most active harvesting periods. These major groups are WINTER, SPRING, SUMMER, and FALL. The WINTER group includes the months of January, February, and March; SPRING includes April, May, and June; SUMMER includes July, August, and September (Florida carries no official summer commercial crops); and FALL includes October, November, and December. These periods are not rigidly fixed and the harvesting period for a particular grouping may extend into the preceding or following group. However, in arranging our data we have followed these groupings in so far as it is practical. For example, it has been considered practical to carry cabbage, cauliflower, escarole, lettuce, and strawberries as one season crops, designating them WINTER since the volume production is harvested generally during January, February, and March. Since some systematic order of grouping is necessary it is deemed best for all concerned to handle our classifications on a National basis even though they may not always agree with some local designations now in use.

PLANTED ACREAGE - The definition for planted acreage is based on a "loss of crop" concept. Estimates of planted acres for any seasonal grouping consist of acres for harvest (see next paragraph) during that particular seasonal group plus any acreage planted for harvest during the season, but which was lost or destroyed and did not produce a crop in the season under consideration. If the acreage is lost and not replanted it is counted as planted. If it is lost but replanted for harvest in the same season as the original acreage would have been harvested, the acreage replanted is not considered as additional acreage planted. However, if the acreage lost is replanted for harvest in a later season, it is considered as planted for both seasons and as acres for harvest only for the latter season.

ACRES FOR HARVEST - This is considered as being all acreage from which a crop could have been harvested had economic conditions (prices, available labor, etc.) warranted the harvest. It includes mature acreage on which the harvest was postponed or delayed too long due to economic reasons and the production lost thereby. Acreage which produces such low yields or poor quality that the crop is not worth picking at any reasonable price is considered as crop failure and is not included in the acreage for harvest. Unharvested acreage which produces yields which would be harvested at reasonable prices is included in acreage for harvest.

YIELD - Yield refers to total production of merchantable quality produced on an acre basis and may include some unharvested production left in fields for economic reasons.

PRODUCTION - Total production represents the yield times (X) the acres for harvest. Production of value is that part of the production which was harvested and sold or utilized and does not include economic abandonment.

ECONOMIC ABANDONMENT - This category includes mature production not harvested because of economic factors, such as low prices, shortage of labor, etc. Such loss of production includes quantities left in fields partially harvested as well as production on acreage abandoned for economic reasons. In the production tables in this book economic abandonment is the difference between the total production and the production of value.

Acreage abandoned at any stage of growth before maturity will be considered as loss of acreage or crop failure rather than economic abandonment of production.

AVERAGE PRICE - All prices used in this report are on an F.O.B. basis or its equivalent, less selling charges. In the case of some commodities which are sold in units other than the one listed, these units are converted into the equivalent of the ones used.

TOTAL VALUE - The total value is the average price per unit times (X) the production of value.

CANNED OR PROCESSED ACREAGE AND PRODUCTION - The acreage of vegetables in Florida planted solely for canning and other processing purposes during the period covered by this publication has been confined principally to cucumbers for pickles. The acreages of beans and tomatoes, the principal crops processed, are planted primarily for fresh market, but each year substantial quantities are canned or frozen.

In order to show the utilization of the production from the acreage brought to harvest, three columns on production are used in the State Summaries. The first shows the total production, the second shows the production sold for fresh market consumption; and the third shows the production sold for processing (either canned or frozen). Production abandoned for economic reasons is the total production minus the sum of the production for fresh market and processing.

Those desiring to know the equivalent acreage utilized for processing should divide the number of bushels processed by the average yield then generally round to the nearest hundred. The prices given for processed beans and tomatoes are based on a per ton price and reduced to a per bushel price (rounded to the nearest whole cent).

COSTS AND RETURNS PER ACRE IN SELECTED AREAS IN FLORIDA - This feature is contributed by the Economics Department of Florida Agricultural Experiment Stations. These tables represent the summarization of grower records or estimates of costs and returns per acre from several vegetable crops in the major producing areas of Florida for the 1954-55 season. In so far as possible, growing and harvesting costs have been separated and labor items excluded from costs of materials.

MIXED CAR MOVEMENT - Total shipments of produce in mixed cars are shown by months on Page 86. These data include the equivalent cars shown in our regular shipment data under each specific crop carried in this publication.

CABBAGE: COSTS AND RETURNS PER ACRE IN SELECTED AREAS IN FLORIDA, SEASON 1954-55

(The figures shown below are compiled by the Florida Agricultural Experiment Stations. They are based on grower records and estimates and are averages of the samples shown.)

Item	Everglades	Hastings	Sanford
Number of growers	10	12	13
Number of acres	1788.0	997.0	336.4
Average acres per grower	178.8	83.1	25.9
Average yield per acre (40 lb. sacks or crates)	339.8	419.9	553.5
<u>Average per acre</u>			
<u>Growing costs:</u>			
Land rent	\$ 12.99	\$ 31.57	\$ 27.03
Seed and seedbed	10.00	18.38	16.29
Fertilizer	22.69	64.49	78.71
Spray and dust	18.14	12.38	24.34
Cultural labor	51.02	52.86	45.95
Machine hire	1.40	1.32	
Gas, oil and grease	16.81	16.16	13.80
Repair and maintenance	17.65	15.35	15.45
Depreciation	15.61	18.06	11.10
Licenses and insurance	3.73	3.83	4.66
Interest on production capital (6% - 4 mos.)	3.16	4.50	4.61
Interest on capital invested (other than land)	9.37	10.84	6.66
Miscellaneous expense	3.57	3.87	4.42
Total growing cost	\$ 186.14	\$ 258.61	\$ 253.02
<u>Harvesting costs:</u>			
Cutting and packing	\$ 51.25	\$ 45.68	\$ 64.27
Containers	131.39	139.55	137.78
Hauling	17.60	20.31	22.50
Commission	21.00	40.65	57.12
Total harvesting cost	\$ 221.24	\$ 246.19	\$ 281.67
Total crop cost	\$ 407.38	\$ 504.80	\$ 534.69
Crop sales	\$ 423.18	\$ 525.80	\$ 760.96
Net return	\$ 15.80	\$ 21.00	\$ 226.27

1/ Reported by 4 and 9 growers averaging \$3.51 and \$8.43 per acre, respectively.

Conversion Factor: Truck - 470 bushels 1945-46 through 1948-49; 600 bushels 1949-50; 620 bushels 1950-51 through 1954-55.

EGGPLANT: COSTS AND RETURNS PER ACRE IN SELECTED AREAS IN FLORIDA, SEASON 1954-55

(The figures shown below are compiled by the Florida Agricultural Experiment Stations. They are based on grower records and estimates and are averages of the samples shown.)

Item	Alachua	Fort Myers	Pompano
Number of growers	5	8	3
Number of acres	20.0	122.0	40.0
Average acres per grower	4.0	15.2	13.3
Average yield per acre (bushels)	85.0	635.9	555.0
 <u>Growing costs:</u>		<u>Average per acre</u>	
Land rent	\$ 7.70	\$ 22.50	\$ 25.36
Seed and seedbed	15.40	10.74	5.42
Fertilizer	42.06	121.26	209.72
Spray and dust	1/ 4.54	26.68	19.78
Airplane application			2/ 8.80
Cultural labor	55.35	144.29	134.59
Machine hire	3/ .10	3/ 4.16	14.29
Gas, oil and grease	13.34	14.38	15.86
Repair and maintenance	9.53	13.66	14.99
Depreciation	12.84	14.70	20.15
Licenses and insurance	2.53	3.40	3.77
Interest on production capital (6% - 5 mos.)	3.85	9.22	11.48
Interest on capital invested (other than land)	7.70	8.82	12.09
Miscellaneous expense	3.39	7.88	6.67
Total growing cost	\$ 178.33	\$ 401.69	\$ 502.97
 <u>Harvesting costs:</u>			
Picking labor	\$ { 35.93 }	\$ 132.98	\$ { 126.50 }
Grading and packing		174.40	
Containers	34.50	280.65	227.40
Hauling	7.50	63.59	52.75
Commission	7.50	86.52	35.25
Total harvesting cost	\$ 85.43	\$ 738.14	\$ 441.90
Total crop cost	\$ 263.76	\$ 1139.83	\$ 944.87
Crop sales	\$ 113.62	\$ 907.81	\$ 778.28
Net return	\$ -150.14	\$ -232.02	\$ -166.59

1/ Reported by 4 growers averaging \$5.68 per acre.

2/ Reported by 2 growers averaging \$13.20 per acre.

3/ Reported by 1 and 5 growers averaging \$0.49 and \$6.65 per acre, respectively.

Note: Conversion Factors prior to 1949-50 - 550 packages; 1949-50 - 580 packages, truck. In 1950-51 through 1954-55, all lettuce crates converted to 4-6 dozen size and 320 crates per carlot equivalent used as a conversion factor.

LETTUCE-ESCAROLE: COSTS AND RETURNS PER ACRE IN SELECTED AREAS IN FLORIDA, SEASON 1954-55

(The figures shown below are compiled by the Florida Agricultural Experiment Stations. They are based on grower records and estimates and are averages of the samples shown.)

Item	Everglades	Sanford	Sumter
Number of growers	8	6	7
Number of acres	2078.0	50.5	24.0
Average acres per grower	259.8	8.4	3.4
Average yield per acre (bushels)	404.0	473.7	205.0
<u>Growing costs:</u>			
Land rent	\$ 12.01	\$ 29.17	\$ 23.21
Seed and seedbed	6.24	14.11	15.78
Fertilizer	22.79	89.02	55.06
Spray and dust	14.82	1/ .21	7.93
Cultural labor	94.38	83.48	47.50
Machine hire	2/ 1.19		
Gas, oil and grease	10.03	10.02	15.27
Repair and maintenance	11.56	10.24	8.84
Depreciation	8.35	6.22	17.31
Licenses and insurance	2.19	2.39	3.15
Interest on production capital (6% + 4 mos.)	3.55	4.82	3.60
Interest on capital invested (other than land)	5.01	3.73	10.39
Miscellaneous expense	2.24	2.13	3.40
Total growing cost	\$ 194.36	\$ 255.54	\$ 211.44
<u>Harvesting costs:</u>			
Cutting and packing	\$ 79.50	\$ 67.28	\$ 64.35
Containers	148.48	178.64	112.75
Hauling	26.93	21.93	20.50
Precooling	36.75	37.89	
Commission	21.72	47.37	20.50
Total harvesting cost	\$ 313.38	\$ 353.11	\$ 218.10
Total crop cost	\$ 507.74	\$ 608.65	\$ 429.54
Crop sales	\$ 481.10	\$ 669.04	\$ 614.48
Net return	\$ -26.64	\$ 60.39	\$ 184.94

1/ Reported by 1 grower at \$1.25 per acre.

2/ Reported by 5 growers averaging \$1.90 per acre.

SQUASH: COSTS AND RETURNS PER ACRE IN SELECTED AREAS IN FLORIDA, SEASON 1954-55

(The figures shown below are compiled by the Florida Agricultural Experiment Stations. They are based on grower records and estimates and are averages of the samples shown).

Item	Alachua	Immokalee	Pompano
Number of growers	8	12	5
Number of acres	33.0	359.5	125.0
Average acres per grower.	4.1	30.0	25.0
Average yield per acre (bushels).	117.0	136.1	139.8
<u>Growing costs:</u>		<u>Average per acre</u>	
Land rent	\$ 7.69	\$ 17.71	\$ 22.22
Seed.	3.59	4.22	6.91
Fertilizer.	24.43	41.62	46.29
Spray and dust.	1/ 2.19	22.06	19.15
Cultural labor.	19.40	21.68	20.48
Machine hire.	2/ 0.50	2/ 2.22	2/ 4.29
Gas, oil and grease	8.60	9.08	8.09
Repair and maintenance.	6.62	8.59	7.53
Depreciation.	7.57	9.74	6.46
Licenses and insurance.	1.65	2.34	2.25
Interest on production capital (6% - 4 mos.)	1.54	2.68	2.77
Interest on capital invested (other than land)	4.54	5.84	3.88
Miscellaneous expense	2.51	4.48	1.52
Total growing cost.	\$ 90.83	\$ 152.26	\$ 151.84
<u>Harvesting costs:</u>			
Picking and packing	\$ 35.16	\$ 78.14	\$ 44.16
Containers.	44.21	54.11	52.08
Hauling	12.68	12.99	11.20
Commission.	12.68	17.49	9.07
Total harvesting cost	\$ 104.73	\$ 162.73	\$ 116.51
Total crop cost	\$ 195.56	\$ 314.99	\$ 268.35
Crop sales.	\$ 221.61	\$ 309.39	\$ 353.19
Net return.	\$ 26.05	\$ -5.60	\$ 84.84

1/ Reported by 4 growers averaging \$4.39 per acre.

2/ Reported by 1, 8 and 4 growers averaging \$4.00, \$3.33 and \$5.36 per acre, respectively.
