

Maryland Crop Quick Facts 2003 Crop

A wet spring was followed by a wet and humid summer. Rain has continued into the summer months delaying harvest of hay, and planting of soybeans. Some fields were still being planted to soybeans as of the end of July. Cooler than normal temperatures have resulted in late maturity for corn, soybeans, tobacco.

Corn development is behind normal by about two weeks this year. Maryland farmers were able to plant 510,000 acres due to wet field conditions. Corn yields are forecast at 131 bushels per acre, 55 bushels per acre higher than last year. Corn condition as of August 4, 2003 was rated 17 percent excellent, 35 percent good, 25 percent fair, 15 percent poor and 8 percent very poor.

Many soybean fields were planted late this year due to wet soils and the delay in small grain harvest. Soybean planted acres are expected to be 460,000 acres, 30,000 less than last year. Soybean condition as of August 4,

2003 was rated 7 percent excellent, 34 percent good, 28 percent fair, 21 percent poor, and 10 percent very poor.

Tobacco yield is expected to be similar to last year at 1,400 pounds. Tobacco condition as of August 4, 2003 was rated 3 percent excellent, 36 percent good, 30 percent fair, 24 percent poor, and 7 percent very poor.

Small grain harvest is now complete. Barley yield was 61 bushels per acre, 21 bushels per acre less than last year. Winter wheat yield was 36 bushels per acre, 30 bushels per acre less than last year. Late maturity, excess moisture, disease and insects all contributed to yield losses for small grains.

Hay harvest is behind normal this year. Second cutting of hay for other and alfalfa hay is currently underway. Some fields are ready for a third cutting.

Corn

- Largest harvested acreage since 1996.
- Highest yield since 2001.

Record Highs and Lows

Item	Unit	Record Highs		Record Lows	
Harvested	1,000 acres	726	(1891)	328	(1957)
Yield	Bushels	155	(2000)	14.5	(1930)
Production	1,000 Bushels	70,400	(1985)	6,554	(1930)

Acreage, Yield, Production and Price

Year	Planted	Harvested	Yield	Production	Price Per Unit
			<i>bu./acr</i>	<i>bushels</i>	<i>dols./bu.</i>
1993	500,000	420,000	78	32,760,000	2.90
1994	460,000	390,000	118	46,020,000	2.45
1995	450,000	400,000	105	42,000,000	3.65

2002	220,000	2.31	508,000	143
2003	215,000	----	----	----

Tobacco

- Lowest harvested acres on record.
- Fourth consecutive yearly acreage decline.

Record Highs and Lows

Item	Unit	Record Highs	Record Lows
Harvested	1,000 acres	53 (1951)	1.5 (2003)
Yield	Pounds	1,500 (1997)	480 (1900)
Production	1,000 Pounds	46,250 (1946)	2380 (2002)

Acreage, Yield, Production and Price

Year	Harvested	Yield	Production	Price Per Unit
		<i>bu./acre</i>	<i>bushels</i>	<i>dols./bu.</i>
1993	9,500	1,290	12,255,000	1.51
1994	8,500	1,500	12,750,000	1.64
1995	8,500	1,350	11,475,000	1.67
1996	8,000	1,250	10,000,000	1.92
