¹ Includes processed meats, poultry and fish on a fresh basis.

² Beef carcass weight is the weight of the chilled hanging carcass which includes the kidney and attached internal fat, but not the head, feet and unattached internal organs.

³ Ready-to-cook poultry weight is the entire dressed bird which includes bones, skin, fat, liver, gizzard and neck.

⁴ Includes veal and lamb.

⁵ Computed from unrounded data.

⁶ Includes fresh and frozen, canned and cured. Excludes game fish consumption.

⁷ Bushels converted at 60 pounds.
