Dear Data User:

We are pleased to present the 77th issue of Nebraska Agricultural Statistics. It is a cooperative effort of the National Agricultural Statistics Service, USDA, and the Nebraska Department of Agriculture (NDA). This annual book of **Facts for Decisions** is published with supporting funds from the NDA for assembling data into this format, printing and distribution.

The basic data contained herein was compiled through the cooperation of producers, agri-businesses, county extension educators and county FSA directors who respond to our surveys.

Your time and effort is very much needed and appreciated. Thanks.

You may notice that this edition has a slightly new look. Headers at the top of each page and organization of data into sections should make information easier to find. We have also added twenty-year data tables of acreage, yield, production and value for specific crops at the U.S. and State level. The weather and crop progress section has also been expanded and additional historic livestock data can be found in the "Livestock and Products" section.

Our field and phone enumerators and office staff are dedicated to serving the data needs of Nebraska's agricultural industry. Please support us in this effort and give us your comments or suggestions on how we can better serve your needs.

Sincerely,

William G. Hamlin
State Statistician
