WEATHER SUMMARY

Temperatures for the week were near normal in the southeast, but above normal elsewhere. The statewide average was 5 degrees above normal, and Farmington was 10 degrees above normal. Afternoon readings hit 100 degrees at most lower elevation stations in the south, and also at Farmington. Circulation around high pressure centered over Colorado allowed some moisture to seep into New Mexico to fuel afternoon and evening thunderstorms. These storms favored the northern half of the state, where Red River and Des Moines/Capulin both measured over an inch of rain.
