

OKLAHOMA AGRICULTURAL STATISTICS NASDA Enumerators

Most of the data published by Oklahoma Agricultural Statistics is collected by a part time staff of office and field enumerators. They are the heart of our data collection activities. This enumerator staff is employed through a cooperative agreement with the National Association of State Departments of Agriculture (NASDA). The National Agricultural Statistics Service is recognized as one of the premier statistical organizations in the world. That reputation rests in large part on the efforts of enumerators in every state of the Nation who are the primary contact between the producers and our office.

In 2003, our Oklahoma office officially became a call center. Call centers are set up to make calls for several states. There were four call centers that handled all of the incoming questions for the nation for the 2002 Census of Agriculture. Our Oklahoma enumerators handled over 37,000 calls to help producers complete their 2002 Census of Agriculture. They also helped make calls for other states on various surveys throughout the year. We are very proud of our enumerators at Oklahoma Ag Statistics. These are people who enjoy their job and enjoy visiting with the producers of our State. If you are a producer, the next time you are called or visited in the field by one of our enumerators, we hope you can recognize one of the names below.
