

APPLE COUNTY ESTIMATES - 2000 PRELIMINARY

| County | Total Bearing Acres | Yield per Bearing Acre 1/ | Total Production | Utilized Production 2/ |
|----------------|------------------------|------------------------------|---------------------|---------------------------|
| | -Acres - | -Pounds- | -Pounds- | -Pounds- |
| Oconee | 750 | 5,200 | 3,900,000 | 3,120,000 |
| Spartanburg | 670 | 21,800 | 14,606,000 | 11,685,000 |
| Other Counties | 280 | 5,300 | 1,494,000 | 1,195,000 |
| State | 1,700 | 11,800 | 20,000,000 | 16,000,000 |

1/ Yield is calculated by dividing total production by total bearing acres with the published estimate rounded according to agency rounding rules. 2/ Utilized production by county is based on ratio of State utilized production to State total production.
