

APPLE COUNTY ESTIMATES - 1997

| County | Total Bearing Acres | Yield per Bearing Acre 1/ | Total Production | Utilized Production 2/ |
|----------------|------------------------|------------------------------|---------------------|---------------------------|
| | -Acres - | -Pounds- | -Thou Lbs- | -Thou Lbs- |
| Oconee | 950 | 13,200 | 12,540 | 12,084 |
| Spartanburg | 850 | 11,200 | 9,520 | 9,518 |
| Other Counties | 1,100 | 34,500 | 37,940 | 34,398 |
| State | 2,900 | 20,700 | 60,000 | 56,000 |

1/ Yield is calculated by dividing total production by total bearing acres with the published estimate rounded according to agency rounding rules. 2/ Utilized production by county is based on ratio of State utilized production to State total production.
