1/ Price and value figures refer to marketing season and not calendar year income: 2003 is preliminary. 2/ Price per unit is for baled dry hay only. 3/ Estimated marketings of alfalfa and other hay used as weights to calculate all hay price. 4/ Yield per acre is in pounds. 5/ Production includes some quantities of storage crop onions, harvested but not sold because of shrinkage and waste. Value of production is value of sales. 6/ Production shown is for utilized production which is the amount of fruit sold, plus quantities used at home, or held in storage. Value for fruit production is value of utilized production. 7/ Production reported in tons, not 1,000 tons.

1/ Price and value figures refer to marketing season and not calendar year income: 2003 is preliminary. 2/ Price per unit is for baled dry hay only. 3/ Estimated marketings of alfalfa and other hay used as weights to calculate all hay price. 4/ Yield per acre is in pounds. 5/ Production includes some quantities of storage crop onions, harvested but not sold because of shrinkage and waste. Value of production is value of sales. 6/ Production shown is for utilized production which is the amount of fruit sold, plus quantities used at home, or held in storage.
