1/ USDA estimates and publishes individual cash receipt values only for major commodities and major producing states. The U.S. receipts for individual commodities, computed as the sum of the reported states, may understate the value of sales for some commodities, with the balance included in the appropriate category labeled "other" or "miscellaneous." The degree of underestimation in some of the minor commodities can be substantial. NA= Not available. NR= Not for release.

Revised November 7, 2002.

Information contact: Ken Erickson (202)694-5565 E-Mail: erickson@ers.usda.gov

1/ The U.S. total exceeds the sum of the states because NASS does not release state data for some minor producing states due to disclosure issues. Horses, mules, and broilers are not included.

2/ Includes only farm share value for trucks and autos.

3/ All non-CCC crops held on farm plus the value above loan rate for crops held under CCC.

4/ Data for the value of purchased inputs are unavailable before 1984.

5/ Excludes debt for nonfarm purposes.

6/ Farmers Home Administration prior to 1994.

Source: Economic Resource Service/USDA Totals may not add due to rounding.

- 1/ Apples, apple juice, and apple products, as well as other miscellaneous fruits assumed to equal the previous year; current year production data has not yet been released.
- 2/ Includes minor oilseeds, sugar, confectionery, and tropical products, nursery & greenhouse, essential oils, beverages, excluding juice, and other miscellaneous vegetable products.
- 3/ For production, NASS does not print some States for each commodity to avoid disclosing individual operations. Consequently, there are other States included in each total which must be accounted for in trade.

Farm Real Estate Values And Cropland Values

Farm real estate values, a measurement of the value of all land and buildings on farms, averaged \$1,270 per acre as of January 1, 2003, up 5.0 percent from the previous year. The value of farm real estate increased in all States except Kansas, where values remained at 2002 levels. The \$60 per acre increase in farm real estate values continued an upward trend that began in 1987.

The increase in all land and buildings followed the trend of cropland and pasture values, which rose by 4.2 and 5.1 percent, respectively, from January 1, 2002. Cropland values averaged \$1,720 per acre and pasture values averaged \$618 per acre on January 1, 2003, compared with \$1,650 and \$588 per acre, respectively, a year earlier.

The increases in farm real estate and the cropland were largely, though not entirely, driven by low interest rates and poor returns for alternative assets. The certainty of government commodity programs also lent support to some agricultural land. Also, potential for nonagricultural uses contributed to strong increases, especially for pasture values. Income from crop and livestock commodities was mixed, providing limited support for farm real estate values in some areas, while creating a slight drag on values in other areas.

Average Per Acre Value of Farm Real Estate, 1999-2003

Year	Farm Real Estate Average Value Per Acre					Cropland: Average Value Per Acre
