

The **Product Registration Section** is utilizing its ever-expanding Microsoft Access database program to provide documentation, controlling information and reports of registration, tonnage, samples and case follow-ups. The databases maintain pertinent information on individual companies selling or attempting to sell regulated products in West Virginia. The program facilitates the establishment of a history for each product and company, and expedites the availability of that information to those needing it. The databases have improved the performance of the Division's field staff, enabling them to do a much better job since they are more aware of the generated reports and information. New this year was the establishment of the WVDA's computer network, allowing product registration and compliance personnel to share databases for registering and tracking feeds, fertilizers, lime and seeds and to store the information in a more secure location with daily backup of data.

- A total of 7,147 feed products were registered or re-registered.
- 1,158 Large Package Pet Foods were registered; Total: \$57,900.
- 3,325 Small Package Pet Foods were registered; Total: \$133,000.
- 410 Specialty Package Pet Foods were registered; Total: \$8,200.
- Fertilizer product registrations increased from 1964 in FY2000 to 2035 in FY2001.
- 741,912 tons of feed was reported as being sold.
- 58,456 tons of fertilizer was reported as being sold.
- 101,512 tons of agricultural liming materials were reported as being sold.
- A total of 84 lime companies and 106 lime products were registered, with revenue of \$2,650.
- 140 tons of seed potatoes were inspected.
- 181 seedsmen were registered.
- Total Revenues from Product Registration rose from \$436,482 in FY2000 to \$557,075 in FY2001, an increase of 27 percent.
