- 1-9

# Special Note

Estimates of the portion of the U.S. corn and soybean planted acreage that was left to be planted when the survey was conducted are published on page 6. These estimates are based on data provided by respondents who were contacted between May 30 and June 15. Nationally, corn left to be planted was 2.49 million acres. Soybeans left to be planted for the U.S. was 8.22 million acres.

# 2023 Principal Crops Planted Acreage

Texas	22,551	<span style="color: blue;">↑</span>	2.4

**Principal Crops Acres  
By State**

Planted acres are used for corn, sorghum, oats, barley, rye, winter wheat, Durum wheat, other spring wheat, rice, soybeans, peanuts, sunflower, cotton, dry edible beans, chickpeas, potatoes, sugarbeets, canola, and proso millet. Harvested acreage is used for all hay, tobacco, and sugarcane in computing total area planted.

NASS implemented program changes beginning with the 2019 crop year. Full details of the changes can be found at [https://www.nass.usda.gov/Surveys/Program\\_Review/index.php](https://www.nass.usda.gov/Surveys/Program_Review/index.php). The Planted (Adjusted) line in the chart above provides principal crop totals for comparable estimates across all years.
