ACENSUSos

## Sampling Process

- NASS List Sampling Frame
- Stratified Sample Design
- Direct Sales Type Group Stratification:
- Group 1. Operations that had a direct market sales value.
- Group 2. Operations that had a direct market sales indicator.
- Group 3. Operations that did not have a direct market sales value or indicator.
- Total Sample Size
- 64,540

## Local Food Marketing Practices Publication Levels

## Key Definitions

Local Food: A locally or regionally produced agricultural food product that is transported less than 400 miles or within the state it is produced.
Operation: $\quad$ farm having at least $\$ 1,000$ in sales, or potential sales, which produced and sold food for humans to eat or drink directly to consumers, retail markets, institutions, and intermediary businesses in 2020. Excluding abnormal operations such as a prison, school, church, or research facility.
Commodity: Food sold in its current state from livestock and crop categories.
Value-Added: Products that have been altered or packaged in a way that is not required for transportation before being sold.

## Total Direct Food Sales and Number of Operations Through All Marketing Channels, 2020

- In 2020, 147,307 operations used direct marketing practices to sell foods in the U.S. This compares with 167,009 operations in 2015.
- In 2020, $\$ 9.0$ billion of food was sold through direct marketing practices, including value added products at the first point of sale. This compares with $\$ 8.7$ billion sold in 2015.
- $\$ 5.0$ billion were direct sales of fresh/raw commodities.
- $\$ 3.9$ billion were food sales of value-added commodities

## Local Food Operations Accepting SNAP Payments, 2020

- 7 percent of farms selling directly to consumers accepted supplemental nutrition assistance program (SNAP) payments. This compares with 8 percent in 2015.
- 27 percent of operations selling at a Farmers Market accepted SNAP payments. This is an increase from 19 percent in 2015.

## Internet Usage

- 78 percent of farms using direct marketing practices had access to the internet in 2020. This compares with 70 percent in 2015.
- 21 percent of farms using direct marketing practices host websites for their farms. This compares to 17 percent in 2015.
- 42 percent of the websites offer a platform for selling agricultural goods. This is an increase from 29 percent in 2015.

## Key Findings

- 147,307 operations sold $\$ 9.0$ billion of food through direct marketing practices in 2020.
- Direct-to-Consumers was the most popular form of direct marketing, with $77 \%$ utilizing direct-to-consumer marketing practices. However, direct-to-consumer sales only accounted for $33 \%$ of all direct marketing sales.
- California accounted for the largest share of direct sales with $\$ 1.4$ billion, $16 \%$ of the US total.
- Operations with direct food sales of $\$ 500,000$ or more, accounted for $2 \%$ of all direct marketing operations, but received $55 \%$ of direct marketing income.
- $78 \%$ of operations sold all their directly marketed food within 100 miles of the farm.
