## Demographic Data in the Census of Agriculture

The agriculture census is a complete count of U.S. farms and ranches and the people who operate them. Demographic information is available at national, state, and county levels, and for classes of farm and congressional districts. Results from the 2017 Census and earlier are available through the searchable database Quick Stats, the new Census Data Query Tool, downloadable PDF reports, maps, and topic-specific Highlights and Profiles. See also the video "What's New in the 2017

Census?"(www.nass.usda.gov/Newsroom/Video\_ Features/index.php).

See 2017 Census of Agriculture, U.S. Summary and State Data, for complete footnotes, explanations, definitions, commodity descriptions, and methodology.

<sup>a</sup> This race alone or in combination with other races. <sup>b</sup> May not add to 100% due to rounding. <sup>c</sup> Data collected for a maximum of four producers per farm. <sup>d</sup> Crop commodity names may be shortened; see full names at <u>www.nass.usda.gov/go/cropnames.pdf</u>. <sup>e</sup> Position below the line does not indicate rank. (D) Withheld to avoid disclosing data for individual operations. (NA) Not available. (Z) Less than half of the unit shown. (-) Represents zero.
