Lower Colorado Region 15, HUC 150100 through 150803	133
Great Basin Region 16, HUC 160101 through 160600	141
Pacific Northwest Region 17, HUC 170101 through 171200.....	148
California Region 18, HUC 180101 through 181002	158
Alaska Region 19, HUC 190101 through 190903	166
Hawaii Region 20, HUC 200100 through 200800.....	180

SUMMARY TABLES BY HYDROLOGIC UNIT CODE: 2017 AND 2012 (U.S., Region, HUC)

New England Region 01, HUC 010100 through 011000	3
Mid-Atlantic Region 02, HUC 020200 through 020802	10
South Atlantic-Gulf Region 03, HUC 030101 through HUC 031800	17
Great Lakes Region 04, HUC 040101 through HUC 041505	31
Ohio Region 05, HUC 050100 through HUC 051402	44
Tennessee Region 06, HUC 060101 through HUC 060400	54
Upper Mississippi Region 07, HUC 070101 through HUC 071402	59
Lower Mississippi Region 08, HUC 080101 through HUC 080903	68
Souris-Red-Rainy Region 09, HUC 090100 through HUC 090400	78
Missouri Region 10, HUC 100200 through HUC 103002.....	83
Arkansas-White-Red Region 11, HUC 110100 through 111403.....	100
Texas-Gulf Region 12, HUC 120100 through 121102	111
Rio Grande Region 13, HUC 130100 through 130900.....	121
Upper Colorado Region 14, HUC 140100 through 140802	128
Lower Colorado Region 15, HUC 150100 through 150803	134
Great Basin Region 16, HUC 160101 through 160600	142
Pacific Northwest Region 17, HUC 170101 through 171200.....	149
California Region 18, HUC 180101 through 181002	159
Alaska Region 19, HUC 190101 through 190903	168
Hawaii Region 20, HUC 200100 through 200800.....	181

APPENDIX

Methodology, Hydrologic Unit Code Changes, and Terms and Definitions	A-1
--	-----

Introduction

PURPOSE AND SCOPE

The 2017 Census of Agriculture Watershed publication provides data that supplement the 2017 Census of Agriculture, Volume 1. This report is the third time that NASS has summarized and published Census of Agriculture data by watersheds. As a service to agricultural and environmental data users, the 2017 data for selected individual land characteristics are published at the 6-digit Hydrologic Unit Code (HUC) level. For comparison, data from the 2012 Census of Agriculture are also published in this report at the 6-digit HUC level if comparable data were available. According to the United States Geological Survey (USGS), the U.S. is divided into 20 regions (2-digit Hydrologic Unit Code level). Eighteen of the regions occupy the land area of the conterminous United States, Alaska constitutes region 19, and the Hawaiian Islands are region 20. These regions are subdivided into over 200 subregions (4-digit Hydrologic Unit Code level) based on water flow patterns from the major rivers within the region. The subregions are further divided into basins (6-digit Hydrologic Unit Code level). For the purposes of this report, the basins will be referred to as watersheds.

LEGAL AUTHORITY

The 2017 Census of Agriculture is required by law under the “Census of Agriculture Act of 1997,” Public Law 105-113 (Title 7, United States Code, Section 2204g). The law directs the Secretary of Agriculture to conduct a census of agriculture in every fifth year.

FARM DEFINITION

The census definition of a farm is any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year. The definition has changed nine times since it was established in 1850. The current definition was first used for the 1974 Census

of Agriculture and has been used in each subsequent agriculture census. This definition is consistent with the definition used for current USDA surveys.

DATA COMPARABILITY

Most data are comparable between the 2017 and 2012 censuses. A few changes were made to the 2017 census that effect comparability for some data items. HUC6 watersheds with significant changes between the 2017 and 2012 censuses are designated with “(see text)” in the table and specific details regarding the changes are defined in the appendix. Some watershed boundaries were changed due to enhanced technology that more precisely defined the boundaries. See 2017 Census of Agriculture, Volume 1, Geographic Area Series, Part 51, Appendix B (https://www.nass.usda.gov/Publications/AgCensus/2017/Full_Report/Volume_1_Chapter_1_US/usapp_xb.pdf) for a detailed discussion of these changes.

REFERENCE PERIOD

Reference periods for the 2017 Census of Agriculture were similar to those used in the 2012 Census of Agriculture. Livestock and chicken inventories were measured as of December 31 of the census year.

WATER RESOURCES MAPS

The maps used throughout this report were provided by USGS. The data for each region are preceded by two maps, one of which shows the region in relation to the U.S., and the other which shows the region broken into each of its watersheds (6-digit HUC).

TABLES AND APPENDIX

Table 1. This table provides selected 2017 and 2012 data for the same data items for each region. For comparison purposes, each region’s data table

displays the U.S. level data totals, followed by the region totals, and then the individual watershed totals.

Appendix. Provides information about the statistical methodology used to assign each farm operation to a specific watershed. In addition, changes to HUC6 definitions and boundaries since 2012 are discussed. It also includes definitions of specific terms and phrases used in this publication.

RESPONDENT CONFIDENTIALITY

In keeping with the provisions of Title 7 of the United States Code, no data are published that would disclose information about the operations of an individual farm or ranch. All tabulated data are subject to an extensive disclosure review prior to publication. Any tabulated item that identifies data reported by a respondent or allows a respondent's data to be accurately estimated or derived, was suppressed and coded with a 'D'. However, the number of farms reporting an item is not considered confidential information and is provided even though other information is withheld.

SPECIAL STUDIES, SUBJECT SERIES REPORTS, AND CUSTOM TABULATIONS

Reports such as American Indians Reservations, 2018 Irrigation and Water Management Survey, and the 2018 Census of Aquaculture are part of the census program and provide supplemental information to the 2017 Census of Agriculture in the respective subject area. Results are published on the Internet.

Custom-designed tabulations may be developed when data are not published elsewhere. These tabulations

are developed to individual user specifications on a cost-reimbursable basis and shared with the public. Quick Stats, NASS's online database that allows data users to build customized queries, should be investigated before requesting a custom tabulation.

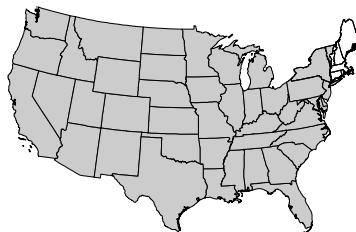

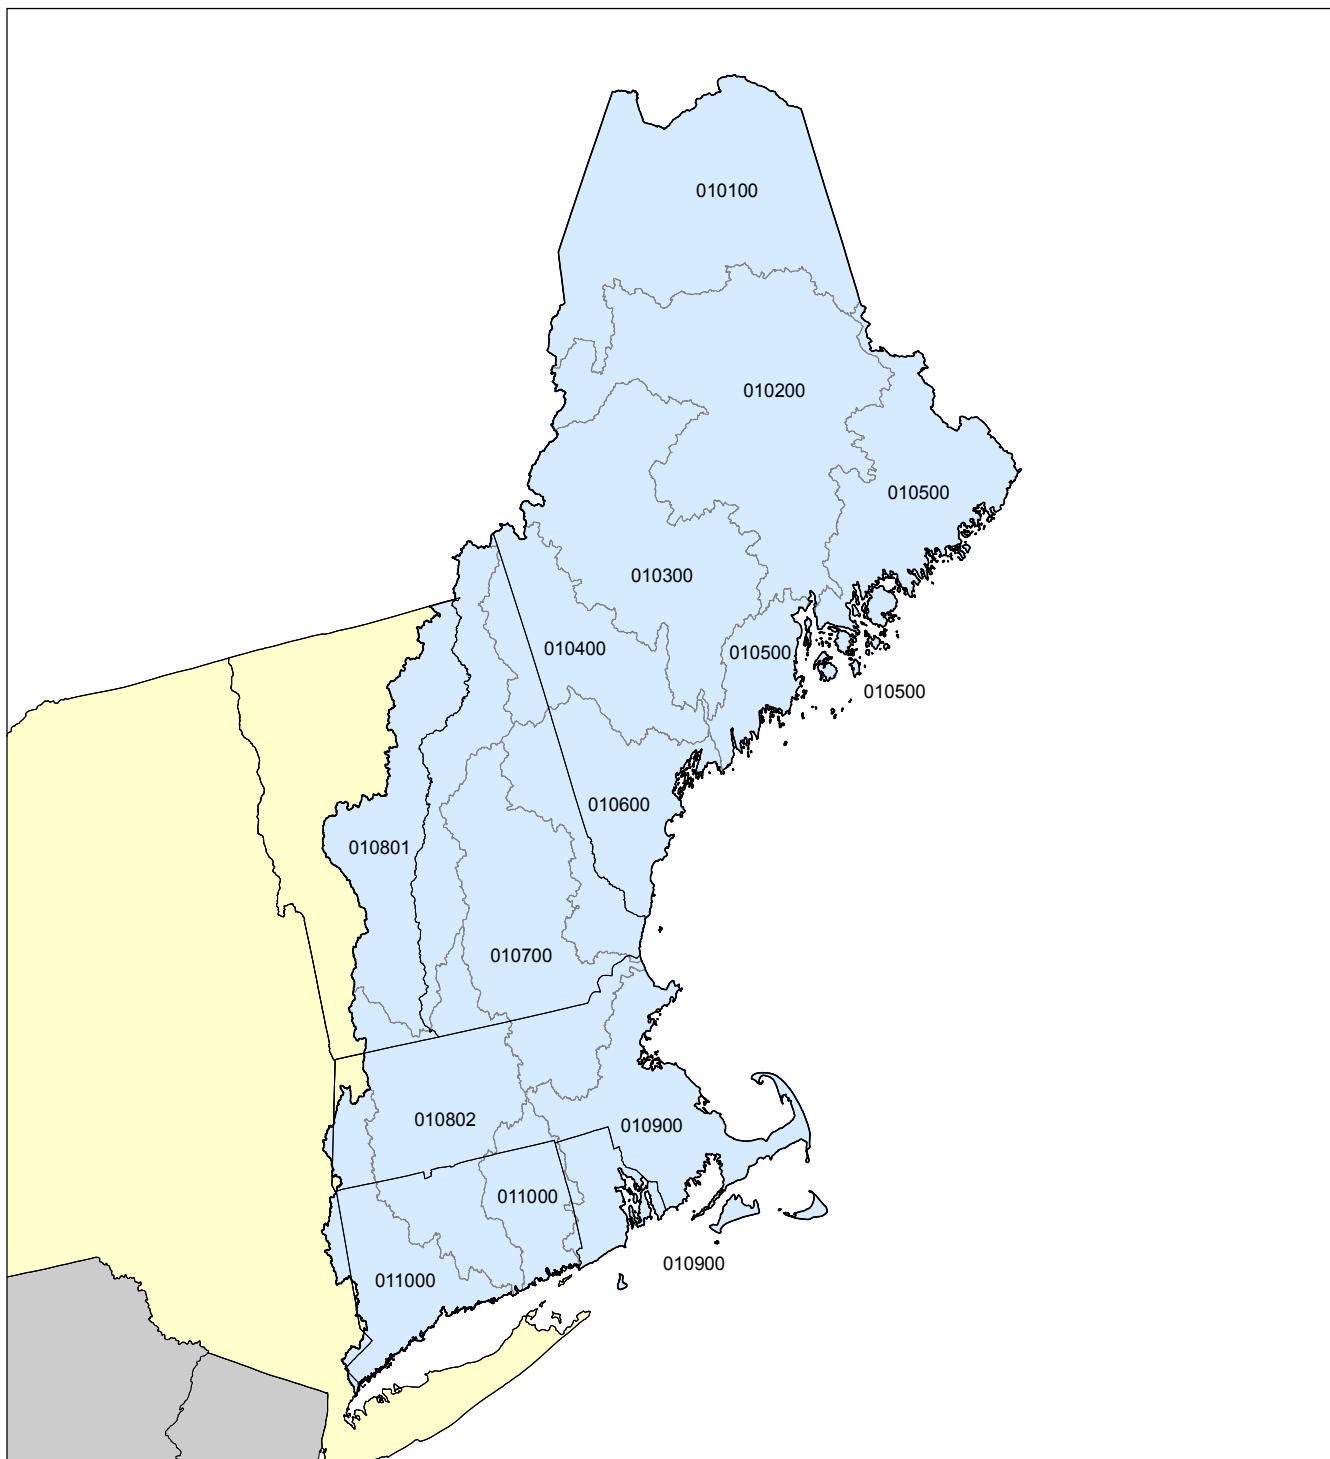

All NASS publications and custom tabulations are subject to a thorough disclosure review prior to release to prevent the disclosure of any individual respondent data. Requests for custom tabulations can be submitted via the internet from the NASS home page, by mail, or by e-mail at:

or
Datalab@nass.usda.gov

ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used throughout the tables:

- Represents zero.
- (D) Withheld to avoid disclosing data for individual farms.
- (NA) Not available.
- (X) Not applicable.
- (Z) Less than half the unit shown.

Land in farms	acres	55,395	64,550	190,200	171,315	2,206,057
L LAND USE AND PRACTICES						
Total cropland	farms	381	389	831	817	9,841
acres		11,370	9,335	31,855	26,753	1,901,411
Harvested cropland	farms	346	343	697	717	8,957
acres		6,772	7,170	21,790	17,937	1,814,693
Other pasture and grazing land that could have been used for crops without additional improvement	farms	64	43	82	101	786
acres		1,857	1,011	2,060	3,740	17,387
Cropland idle or used for cover crops or soil-improvement but not harvested and not pastured or grazed	farms	69	58	188	134	2,138
acres		2,268	1,038	5,896	4,119	62,649
Cropland on which all crops failed or were abandoned	farms	12	12	50	30	198
acres		151	98	1,517	581	3,093
Cropland in summer fallow (see text)	farms	24	6	38	27	255
acres		322	18	592	376	3,589
Total woodland	farms	335	411	869	863	4,791
acres		27,517	34,112	88,614	79,650	142,694
Woodland pastured	farms	177	234	489	523	1,086
acres		10,193	10,279	31,828	27,688	17,802
Woodland not pastured	farms	230	266	572	567	4,140
acres		17,324	23,833	56,786	51,962	124,892
Permanent pasture and rangeland, other than cropland and woodland pastured	farms	314	373	850	864	4,278
acres		13,121	15,527	57,193	53,529	76,381
Land in farmsteads, homes, buildings, livestock facilities, ponds, roads, wasteland, etc.	farms	302	382	710	791	7,605
acres		3,387	5,576	12,538	11,383	85,571
Irrigated land	farms	28	17	28	31	318
acres		34	21	53	74	14,265
Harvested cropland	farms	28	17	25	22	295
acres		34	21	(D)	46	13,716
Pastureland and other land	farms	-	-	3	9	33
acres		-	-	(D)	28	549
Cropland on which no-till practices were used	farms	24	8	57	31	4,057
acres		173	77	525	340	937,718
Cropland on which reduced tillage, excluding no till, practices were used (see text)	farms	6	-	20	29	2,262
acres		152	-	560	174	530,338
F FERTILIZERS AND CHEMICALS						
Commercial fertilizer, lime, and soil conditioners used	farms	154	153	399	320	6,217
acres treated		3,901	3,072	11,329	10,447	1,446,640
Manure used	farms	70	66	196	137	2,508
acres treated		1,207	839	2,653	3,405	150,594
Organic fertilizer used (see text)	farms	5	(NA)	43	(NA)	240
acres		134	(NA)	691	(NA)	17,522
Acres treated to control -						
Insects	farms	36	30	56	77	2,012
acres		92	140	1,603	1,940	503,430
Weeds, grass, or brush	farms	60	82	171	208	5,405
acres		938	1,340	3,890	4,172	1,667,337
Nematodes	farms	4	9	-	13	367
acres		18	33	-	44	66,710
Diseases in crops and orchards	farms	13	17	23	31	792
acres		59	62	101	72	177,383
Chemicals used to control growth, thin fruit, ripen, or defoliate	farms	2	4	4	16	92
acres on which used		(D)	9	(D)	185	7,673
S SELECTED CROPS						
Corn, all	farms	7	15	47	77	4,310
acres		63	188	797	748	758,696
Soybeans, for beans	farms	-	-	2	3	5,035
acres		-	-	(D)	(D)	902,485

Table 1. Summary by Hydrologic Unit Code: 2017 and 2012 (continued)

[For meaning of abbreviations and symbols, see introductory text.]

Item	H130403		H130500		H130600	
	2017	2012	2017	2012	2017	2012
F FARMS AND LAND IN FARMS						
Farms	number	621	532	1,567	1,468	2,840
Land in farms	acres	2,104,836	2,074,575	5,427,503	5,350,900	8,853,404
L LAND USE AND PRACTICES						
Total cropland	farms	92	123	665	634	1,273
Harvested cropland	acres	25,802	20,851	92,228	133,886	225,669
Other pasture and grazing land that could have been used for crops without additional improvement	farms	28	50	495	497	990
Cropland idle or used for cover crops or soil-improvement but not harvested and not pastured or grazed	farms	2,647	3,821	51,779	53,989	107,507
Cropland on which all crops failed or were abandoned	farms	13,181	9,661	7,162	41,801	19,452
Total woodland	farms	49,556	49,264	77,906	86,583	441,981
Woodland pastured	farms	32,224	37,887	76,021	84,702	415,188
Woodland not pastured	farms	17,332	11,377	1,885	1,881	437,207
Permanent pasture and rangeland, other than cropland and woodland pastured	farms	535	474	980	913	1,898
Land in farmsteads, homes, buildings, livestock facilities, ponds, roads, wasteland, etc.	acres	2,007,233	1,980,910	5,234,892	5,106,189	8,133,161
Irrigated land	farms	22,445	23,550	22,477	24,242	52,593
Harvested cropland	farms	591	1,151	51,638	53,223	95,895
Pastureland and other land	farms	383	473	44,740	48,979	873
Cropland on which no-till practices were used	farms	208	678	6,898	4,244	86,297
Cropland on which reduced tillage, excluding no till, practices were used (see text)	farms	9	2	63	78	106
F FERTILIZERS AND CHEMICALS	acres	2,049	(D)	1,662	2,875	12,726
Commercial fertilizer, lime, and soil conditioners used	farms	36	40	299	291	536
Manure used	acres treated	19,897	8,423	48,081	69,316	95,808
Organic fertilizer used (see text)	acres	299	555	12,892	17,559	21,000
Acres treated to control -	acres	-	(NA)	18	(NA)	53
Insects	farms	16	21	128	118	280
Weeds, grass, or brush	acres	(D)	820	27,301	28,094	59,726
Nematodes	farms	51	59	183	203	484
Diseases in crops and orchards	farms	18,457	15,911	33,204	36,549	148,032
Chemicals used to control growth, thin fruit, ripen, or defoliate	farms	2	-	3,784	1,255	7,159
acres on which used	acres	(D)	-	29	40	29
L SELECTED CROPS	acres	5	-	1,888	478	10,313
Corn, all	farms	2	-	16	54	43
Soybeans, for beans	acres	(D)	-	3,619	5,022	8,786
Small grains (wheat, oats, barley, rye)	farms	-	-	10,198	13,938	19,424
Cotton, all	acres	-	-	10	14	71
Rice	farms	4	4	599	1,496	3,540
Land in vegetables (see text)	farms	1,660	1,113	3,772	3,540	7,096
Land in orchards (see text)	farms	2	8	1,299	1,544	11,204
Nursery, greenhouse, floriculture, and sod (see text)	farms	(D)	79	8,899	5,764	7,545
All other crops (other than those listed above)	farms	-	-	206	289	306
acres	acres	-	-	192	20	308
L LIVESTOCK AND POULTRY	acres	23	33	287	303	9,665
Cattle and calves inventory	farms	876	2,054	25,686	27,243	60,503
Hogs and pigs inventory	number	20,073	20,023	90,784	87,880	356,008
Sheep and lambs inventory (see text)	farms	7	2	34	17	31
Total horses and ponies inventory	number	124	(D)	141	111	14
Goats, all inventory	farms	163	135	78	55	159
Chickens, all inventory (see text)	number	43,634	42,144	2,005	6,235	151
farms	193	165	548	502	1,066	134
farms	826	1,103	3,198	3,210	5,738	862
farms	303	249	158	134	1,066	5,664
farms	71,579	65,685	3,907	2,843	4,976	4,564
number	48	32	219	161	321	182
number	1,348	532	4,789	2,581	7,126	168

L LAND USE AND PRACTICES						
Total cropland	farms	530	546	368	467	356
acres		106,973	77,480	179,437	166,888	95,119
Harvested cropland	farms	398	425	292	394	258
acres		80,323	59,434	141,074	132,332	48,420
Other pasture and grazing land that could have been used for crops without additional improvement	farms	67	85	37	71	63
acres		8,672	6,496	493	8,659	29,795
Cropland idle or used for cover crops or soil-improvement but not harvested and not pastured or grazed	farms	142	134	98	98	92
acres		13,170	8,965	17,157	17,674	7,717
Cropland on which all crops failed or were abandoned	farms	26	46	12	15	17
acres		744	1,419	1,103	238	500
Cropland in summer fallow (see text)	farms	60	20	55	42	61
acres		4,064	1,166	19,610	7,985	8,687
Total woodland	farms	100	82	17	12	39
acres		214,297	44,088	2,378	85	(D)
Woodland pastured	farms	60	57	17	6	20
acres		205,361	43,177	2,378	61	(D)
Woodland not pastured	farms	49	27	-	6	20
acres		8,936	911	-	24	(D)
Permanent pasture and rangeland, other than cropland and woodland pastured	farms	621	771	335	378	465
acres		3,480,747	3,579,096	254,220	282,696	589,592
Land in farmsteads, homes, buildings, livestock facilities, ponds, roads, wasteland, etc.	farms	645	665	537	714	545
acres		52,428	64,967	22,409	32,513	(D)
Irrigated land	farms	511	567	493	586	316
acres		86,657	68,184	140,019	129,047	48,450
Harvested cropland	farms	383	403	290	372	258
acres		78,886	57,539	138,747	127,656	45,894
Pastureland and other land	farms	188	242	235	251	86
acres		7,771	10,645	1,272	1,391	73
Cropland on which no-till practices were used	farms	68	39	21	27	42
acres		13,779	4,314	10,647	3,292	6,237
Cropland on which reduced tillage, excluding no till, practices were used (see text)	farms	48	53	62	51	35
acres		23,927	16,498	54,494	26,561	9,754
F FERTILIZERS AND CHEMICALS						
Commercial fertilizer, lime, and soil conditioners used	farms	266	293	242	328	169
acres treated		73,326	55,486	119,535	115,983	46,186
Manure used	farms	82	106	131	97	68
acres treated		4,799	3,994	28,988	26,291	3,829
Organic fertilizer used (see text)	farms	21	(NA)	32	(NA)	25
acres		996	(NA)	3,373	(NA)	1,592
Acres treated to control -						
Insects	farms	82	117	125	164	91
acres		37,389	21,577	111,447	69,859	26,096
Weeds, grass, or brush	farms	212	279	161	250	137
acres		61,772	49,785	124,432	112,015	48,178
Nematodes	farms	13	36	3	39	17
acres		1,741	9,514	(D)	19,521	2,453
Diseases in crops and orchards	farms	20	23	21	24	21
acres		4,517	2,059	4,675	3,087	1,528
Chemicals used to control growth, thin fruit, ripen, or defoliate	farms	33	65	58	67	18
acres on which used		17,505	22,352	35,533	37,415	6,753
S SELECTED CROPS						
Corn, all	farms	14	28	42	43	20
acres		13,624	8,812	12,992	13,389	16,369
Soybeans, for beans	farms	-	-	-	-	-
acres		-	-	-	-	-

Watershed Name	Hydrologic Unit Code
Southern Southeast Alaska	190101
Central Southeast Alaska	190102
Northern Southeast Alaska	190103
Gulf Of Alaska	190104
Icy Strait-Chatham Strait	190105
Copper River	190201
Prince William Sound	190202
Kenai Peninsula	190203
Knik Arm	190204
Susitna River	190205
Western Cook Inlet	190206
Kodiak-Shelikof	190207
Cook Inlet	190208
Aleutian Islands	190301
Kvichak-Port Heiden	190302
Nushagak River	190303
Upper Kuskokwim River	190304
Lower Kuskokwim River	190305
Norton Sound	190501
Northern Seward Peninsula	190502
Kobuk-Selawik Rivers	190503
Noatak River-Lisburne Peninsula	190504
Western Arctic	190601
Barrow Alaska	190602
Colville River	190603
Prudhoe Bay	190604
Eastern Arctic	190605
Headwaters Yukon River	190701
White River-Yukon River	190704
Fortymile River-Yukon River	190705
Porcupine River	190801
Chandalar-Christian River	190802
Tanana River	190803
Beaver Creek-Yukon River	190804
Koyukuk River	190901
Melozitna River-Yukon River	190902
Outlet Yukon River	190903

HUC 190105: This watershed did not contain any known farms in 2012 or 2017.

HUC 190208: This watershed did not contain any known farms in 2012 or 2017.

HUC 190503: This watershed did not contain any known farms in 2012 or 2017.

HUC 190504: This watershed did not contain any known farms in 2012 or 2017.

HUC 190601: This watershed did not contain any known farms in 2012 or 2017.

HUC 190602: This watershed did not contain any known farms in 2012 or 2017.

HUC 190603: This watershed did not contain any known farms in 2012 or 2017.

HUC 190604: This watershed did not contain any known farms in 2012 or 2017.

HUC 190605: This watershed did not contain any known farms in 2012 or 2017.

HUC 190701: In 2012 this watershed did not exist. This watershed did not contain any known farms in 2017.

HUC 190704: In 2012 this watershed did not exist. This watershed did not contain any known farms in 2017.

HUC 190705: In 2012 this watershed did not exist. This watershed did not contain any known farms in 2017.

HUC 190801: The watershed referred to as “190801 Porcupine River” in 2017 was known as “190402 Porcupine River” in 2012. The boundaries of this watershed did not change.

HUC 190802: The watershed referred to as “190802 Chandalar-Christian River” in 2017 was known as “190403 Chandalar-Christian Rivers” in 2012. The boundaries of this watershed did not change. This watershed did not contain any known farms in 2012 or 2017.

HUC 190803: The watershed referred to as “190803 Tanana River” in 2017 was known as “190405 Tanana River” in 2012. The boundaries of this watershed did not change.

HUC 190804: In 2012 this watershed did not exist.

HUC 190901: The watershed referred to as “190901 Koyukuk River” in 2017 was known as “190406 Koyukuk River” in 2012. The boundaries of this watershed did not change.

HUC 190902: In 2012 this watershed did not exist.

HUC 190903: The watershed referred to as “190903 Outlet Yukon River” in 2017 was known as “190408 Lower Yukon” in 2012. The boundaries of this watershed did not change.

Appendix

Methodology, Hydrologic Unit Code Changes, and Terms and Definitions

HYDROLOGIC UNIT CODE ASSIGNMENT METHODOLOGY

The Watershed tabulations of 2017 Census of Agriculture data are based on operation location. Census respondents were asked to declare their principal county of operation as the county with the greatest share of their total value of production. Additionally, the respondent's mail ZIP Code was known; however, this ZIP Code did not necessarily correspond to the actual location of the farm or ranch. Watershed assignments were based on map boundary files produced by the National Agricultural Statistics Service (NASS), as well as other files produced outside of NASS. The National Watershed Boundary Dataset (WBD) was from the U.S. Geological Survey. County boundary files were provided by the U.S. Census Bureau. ZIP Code boundary files for 2017 were obtained from Environmental Systems Research Institute, Inc.'s (ESRI) data and maps. In addition, digitized agricultural/non-agricultural land boundaries were produced by NASS.

Of the reports returned for the 2017 census that were determined to be from in-scope farms or ranches, approximately 64.5 percent were respondents to the 2012 Census of Agriculture in States where watershed boundaries did not change and the operation's reported principal county did not change. These operations were assigned to the same 6-digit HUC as in 2012. Another 21.5 percent were deterministically assigned to a 6-digit HUC because geocoding software was available that enabled NASS to geocode those operations' locations to the appropriate 6-digit HUC. (I.e., for records where the ZIP Code was within the reported principal county, NASS was able to calculate geographic coordinates for those operations based on address, and spatially determine in which 6-digit HUC each operation's coordinates were located.) Another 3.4 percent of records were deterministically assigned to a 6-digit HUC because the principal county reported fell entirely within a

single 6-digit HUC. Another 3.8 percent of all records were assigned deterministically to a 6-digit HUC because their mail ZIP Code was located in the operation's principal county, and the ZIP Code fell entirely within a single 6-digit HUC. The remaining 6.8 percent of census farm and ranch records were assigned probabilistically following a statistical model. These records involved farm operations where either the county or the ZIP Code intersected multiple 6-digit HUCs. For these cases, two models for probabilistically assigning a 6-digit HUC were developed. The first model was used if the mail ZIP Code was located in the operation's principal county. Then probabilities of assignment to each 6-digit HUC within the ZIP Code were equal to the proportion of that ZIP Code's agricultural land contained in the 6-digit HUC, as calculated by NASS. The second model was used if the mail ZIP Code was not located in the operation's principal county. In that case NASS used the principal county in carrying out the 6-digit HUC assignment. The probabilities of assignment to each 6-digit HUC within the principal county were equal to the proportion of the county's agricultural land contained in the 6-digit HUC, as calculated by NASS.

Probabilistically assigned farms and ranches were reviewed by NASS Regional Field Offices to verify their assignments and, in some cases, corrections were made. The farms and ranches that were reviewed were typically large operations (with respect to their total value of production) or operations with a rare commodity. All published farm counts and totals were fully adjusted for nonresponse, misclassification, and coverage.

The following 6-digit HUCs are wholly or partially located within the United States, but did not contain any known farms in 2017 or 2012: 041506, 190105, 190208, 190503, 190504, 190601, 190602, 190603, 190604, 190605, 190701, 190704, 190705, 190802, and 200300.

CHANGES TO HYDROLOGIC UNIT CODE DEFINITIONS AND BOUNDARIES

Between the time of the 2012 Census of Agriculture and the 2017 Census of Agriculture, some of the boundaries of the Hydrologic Unit Code (HUC) regions changed. In very rare cases, HUC regions were renamed or new HUC regions were created. The U.S. Geological Survey defines the HUC regions, and thus is the federal agency responsible for modifications to them. As data users examine the published statistics in the accompanying tables, it is helpful to reference the specific changes in HUC definitions and boundaries to assist in interpreting increases or decreases between 2012 and 2017.

In Alaska, the 2012 6-digit HUC regions 190402, 190403, 190405, 190406, and 190408, were renamed to 2017 6-digit HUC regions 190801, 190802, 190803, 190901, and 190903, respectively. The 2012 6-digit HUC regions 190401, 190404, and 190407 were replaced by 2017 6-digit HUC regions 190804, 190704, 190705, and 190902. The 2012 4-digit HUC region 1904 was divided into three 2017 4-digit HUC regions 1907, 1908 and 1909.

In Arkansas, a small portion of 2012 4- and 6-digit HUC regions 1111 and 111102 were reassigned to 2017 4- and 6-digit HUC regions 0802 and 080204.

In Montana, a small portion of 2012 4- and 6-digit HUC regions 1005 and 100500 were reassigned to 2017 4- and 6-digit HUC regions 1006 and 100600.

In New York, a small portion of 2012 6-digit HUC region 020302 were reassigned to 2017 6-digit HUC region 020301.

In general, many other HUC boundaries changed across the 50 States. Generally, the boundary changes were minimal, so that comparisons of 2017 tabulations back to 2012 tabulations would be only very minimally affected, if at all. In this publication, maps are provided displaying the 6-digit HUC boundaries for each HUC2 region for 2017. The data user has the capability to compare these maps back to the 2012 versions of these maps, which may be accessed by referring back to our 2012 Watersheds publication:

(https://www.nass.usda.gov/Publications/AgCensus/2012/Online_Resources/Watersheds/wtrsheds.pdf)

TERMS AND DEFINITIONS

The following definitions and explanations provide a detailed description of specific terms and phrases used in this publication. Many of the definitions and explanations are the same as those used in earlier censuses. For more details relating to the census of agriculture program, go to the NASS website at <https://www.nass.usda.gov/AgCensus/index.php>.

Acres. Crops were reported in whole acres, except for the following crops that were reported in tenths of acres: tobacco, nursery and greenhouse crops in the open, vegetables including potatoes and sweet potatoes, fruit and nut crops including land in orchards, and berries. Totals for crops reported in tenths of acres were rounded to whole acres at the aggregate level during the tabulation process. Nursery and greenhouse crops grown under glass or other protection were reported in square feet but were converted to acres for this report.

If two or more crops were harvested from the same land during the year (double cropping), the acres were counted for each crop. Therefore, the total acres of all crops harvested could exceed the acres of cropland harvested. No double cropping is allowed for hay or fruit and nut crops. When more than one cutting of hay was taken from the same acres, the acres were counted only once. If there were multiple cuttings of one type of hay production, e.g., two cuttings of alfalfa for dry hay, acreage was reported once but the quantity harvested includes all cuttings. Acreage cut and tons harvested for both dry hay and haylage, silage, or greenchop were reported for each crop. For interplanted crops or “skip-row” crops, acres were reported according to the portion of the field occupied, whether by a crop or whether it was idle land. If a crop was interplanted in an orchard or vineyard and harvested, then the entire orchard or vineyard acreage was reported under the appropriate fruit crop and the interplanted estimated crop acreage was reported under the appropriate crop.

If a crop was planted but not harvested, the acres were not reported as harvested. These acres were reported in the Land Use section on the report form under the

appropriate items – cropland on which all crops failed or were abandoned, cropland in summer fallow, cropland idle or used for cover crops or soil improvement but not harvested and not pastured or grazed, or other pasture and grazing land that could have been used for crops without additional improvements. This does not include fruit and nut orchards, vineyards, berries, acres in production for cultivated Christmas trees, and acres in production for short rotation woody crops that were not harvested. Acreage in these commodities were included in cropland harvested regardless of whether the crop was harvested. Abandoned orchards were reported as cropland idle, not as harvested cropland, and the individual abandoned orchard crop acres were not reported.

Crops that were grazed by livestock were reported as “Other pasture and grazing land that could have been used for crops without additional improvements.” Crop residue left in fields after the 2017 harvest and later grazed by livestock were reported as cropland harvested and not as other pasture or grazing land that could have been used for crops.

Acres treated with chemicals. For each type of chemical used, the acres treated were reported only once even if the acres were treated more than once. If multi-purpose chemicals were used, the acres treated for each purpose were reported.

All other crops. Data include all crops other than those listed separately in the tables.

Cattle and calves inventory. Data are for farms with any cattle and calves.

Chemicals used to control growth, thin fruit, ripen, or defoliate. This category includes the number of farms and acreage treated with chemicals that altered the expected growth of flowering or reproduction rate of plants (growth regulators), thinned the number of fruit to increase fruit size, or caused leaves or other foliage to drop from a plant, usually to facilitate harvest (defoliants).

Chickens, all inventory. Data are for farms with chickens of any type, whether broilers or layers. This includes bantams and roosters.

Commercial fertilizer, lime, and soil conditioners.

Soil enriching agricultural input which contains one or more nutrients such as nitrogen, phosphate, potash, or sulfur. Includes farms with acres treated at least once with commercial fertilizer, lime, or soil conditioners.

Cropland, harvested. See Harvested cropland.

Cropland idle or used for cover crops or soil improvement but not harvested and not pastured or grazed. Cropland idle includes any other acreage which could have been used for crops without any additional improvement and which was not reported as cropland harvested, cropland on which all crops failed, cropland in summer fallow, or other pasture or grazing land that could have been used for crops without additional improvements. This category includes:

1. Land used for cover crops or soil improvement but not harvested or grazed.
2. Land in Federal or State conservation programs that was not hayed or grazed in 2017.
3. Land occupied with growing crops for harvest in 2018 or later years but not harvested or summer fallowed in 2017 (except fruit or nuts in an orchard, grove, or vineyard or berries being maintained for production). Examples are acreage planted in winter wheat, strawberries, etc., for harvest in 2018 and no crop was harvested from these acres in 2017.
4. Land in “skipped” rows between rows of crops or field strips.

Cropland in summer fallow. This includes cropland cultivated or treated with herbicides to control weeds and conserve moisture and not seeded or harvested in 2017. It includes cropland summer fallowed in 2017 and planted to a crop (i.e., winter wheat, etc.) for harvest in 2018. In 2012 this item was referred to as Cultivated summer fallow. This is a wording change only; data are comparable.

Cropland, irrigated. See Irrigated land.

Cropland on which all crops failed or were abandoned. This category includes the number of farms and the acreage where crops were planted, but not harvested, for reasons such as adverse weather conditions damaged the crops.

Cropland on which no-till practices were used. This category includes land on which no-till or minimum till practices were used for weed control and to help reduce weed seed germination by not disturbing the soil.

Cropland on which reduced tillage, excluding no-till, practices were used. This category includes the number of farms and acreage where a tillage system was used to create a suitable soil environment for growing a crop that conserves soil, water, and energy resources mainly through the reduction in the intensity of tillage and retention of plant residues. At least 30 percent of the soil surface must be covered with residue after planting to meet the definition of conservation tillage. In 2012 reduced tillage was labeled conservation tillage. This is a wording change only; data are comparable.

Cropland, total. See Total cropland.

Cropland used only for pasture or grazing. See Other pasture or grazing land that could have been used for crops without additional improvements.

Farms. The term “farms” represents the number of farms reporting the item. For example, if there are 3,710 farms in an HUC and 842 of them had 28,594 cattle and calves, the data for those farms reporting cattle and calves would appear as:

Cattle and calves farms	842
number . . .	28,594

Floriculture crops. See Nursery, greenhouse, floriculture, and sod.

Goats, all inventory. Data are for farms with any goats and kids, whether for meat, milk, or fiber.

Harvested cropland. This category includes land from which crops were harvested and hay was cut, land used to grow short rotation woody crops and Christmas trees, and land in orchards, groves,

vineyards, berries, nurseries, and greenhouses. Land from which two or more crops were harvested was counted only once. Land in tapped maple trees was included in woodland not pastured.

Harvested cropland irrigated. This category includes harvested cropland which was irrigated by any artificial or controlled means. See Irrigated land.

Hogs and pigs inventory. Data are for farms with any hogs or pigs.

Horses and ponies. See Total horses and ponies inventory.

Hydrologic Unit Code (HUC). Any subdivision of land in the U.S. based on boundaries determined by the U.S. Geological Survey (USGS). These subdivisions are based on water flow patterns to the major rivers and their tributaries.

Irrigated land. This category includes all land watered by any artificial or controlled means, such as sprinklers, flooding, furrows or ditches, sub-irrigation, and spreader dikes. Included are supplemental, partial, and preplant irrigation. Each acre was counted only once regardless of the number of times it was irrigated or harvested. If an operation reported less than one acre irrigated or harvested, the irrigated land for the operation was rounded to one acre. Livestock lagoon waste water distributed by sprinkler or flood systems was also included.

Land in farms. The acreage designated as “land in farms” consists primarily of agricultural land used for crops, pasture, or grazing. It also includes woodland and wasteland not actually under cultivation or used for pasture or grazing, provided it was part of the farm operator’s total operation. Large acreages of woodland or wasteland held for nonagricultural purposes were deleted from individual reports during the edit process. Land in farms includes conservation program acres such as those enrolled in Conservation Reserve Program (CRP), Wetlands Reserve Program (WRP), Farmable Wetlands Program (FWP), and the Conservation Reserve Enhancement Program (CREP).

Land in farms is an operating unit concept and includes land owned and operated as well as land

rented from others. Land used rent free was reported as land rented from others. All grazing land, except land used under government permits on a per-head basis, was included as “land in farms” provided it was part of a farm or ranch. Land under the exclusive use of a grazing association was reported by the grazing association and included as land in farms. All land in American Indian reservations used for growing crops, grazing livestock, or the potential of grazing livestock was included as land in farms. Land in reservations not reported by reservation, individual American Indians or non-Native Americans was reported in the name of the cooperative group that used the land. In a few instances, an entire American Indian reservation was reported as one farm.

Land in farmsteads, homes, buildings, livestock facilities, ponds, roads, wasteland, etc. This category includes the number of farms and acres consisting of the farmstead buildings (home, barns, bins, machine sheds, etc.) and land not used for agricultural production (roads, ponds, streams and rivers, and other wasteland).

Land in orchards. Starting in 2017, pineapples were moved from the field crops section to the fruit and nut section. As a result, land in orchards includes pineapples in 2017 and land in orchards is not directly comparable to 2012. This category includes land in bearing age and nonbearing age fruit trees, citrus or other groves, vineyards, and nut trees of all ages, including land on which all fruit crops failed. Respondents also reported bearing age acres and nonbearing age acres by individual fruit and nut crops.

Land in vegetables. The acres of vegetables and melons harvested are the summation of the acres of individual vegetables and melons harvested. When more than one vegetable or melon crop was harvested from the same acreage, acres were counted for each crop. Ginseng, potatoes, and sweet potatoes are included.

Manure used. This category includes the number of farms and acres of cropland and pastureland on which animal manure was applied.

Nursery, greenhouse, floriculture, and sod. Data are for total square feet under protection and acres in the open. Individual crop data were collected for area

under glass or other protection, area in the open, and sales of aquatic plants, floriculture and bedding crops, nursery crops, sod, propagative materials, food crops grown under protection, and mushroom crops.

Organic fertilizer used. This is a new item for 2017. These are the acres of cropland or pastureland on which approved organic fertilizers were applied.

Other pasture and grazing land that could have been used for crops without additional improvements. This category includes land used only for pasture or grazing that could have been used for crops without additional improvement. Also included are acres of crops grazed by livestock, but not harvested prior to grazing. However, cropland that was pastured before or after crops were harvested in 2017 was included as harvested cropland rather than cropland for pasture or grazing.

Pastureland and other land irrigated. This category includes all types of land, other than Harvested cropland, which was irrigated by any artificial or controlled means. See Irrigated land.

Permanent pasture and rangeland, other than cropland and woodland pastured. This land use category encompasses grazable land that does not qualify as woodland pasture or cropland pasture. It may be irrigated or dry land. In some areas, it can be a high quality pasture that could not be cropped without improvements. In other areas, it is barely able to be grazed and is only marginally better than wasteland.

Sheep and lambs inventory. Data are for sheep and lambs of all ages owned regardless of location. Sheep and lambs were collected in their own section to clarify to respondents when to report “owned” sheep and lambs versus any sheep and lambs on the operation. Prior to 2017 in the Eastern States, data were collected for sheep and lambs regardless of ownership.

Total cropland. This category includes cropland harvested, other pasture and grazing land that could have been used for crops without additional improvements, cropland on which all crops failed or were abandoned, cropland in summer fallow, and cropland idle or used for cover crops or soil

improvement but not harvested and not pastured or grazed.

Total horses and ponies inventory. Data are for farms with horses and ponies inventory, regardless of ownership.

Watershed. A watershed is the area of land where all the rainfall that drains off of it goes to a common waterway, such as a stream, lake, estuary, wetland, aquifer, or even the ocean. Watersheds come in all shapes and sizes, and often cross county, State, and national boundaries. According to the U.S. Geological Survey (USGS), the U.S. is divided into 20 regions (2-digit Hydrologic Unit Code level). These regions are subdivided into over 200 subregions (4-digit Hydrologic Unit Code level) based on water flow patterns from the major rivers within the region. The subregions are further divided into basins (6-digit Hydrologic Unit Code level). For

the purposes of this report, “basins” are referred to as watersheds.

Woodland pastured. This category includes all woodland used for pasture or grazing during the census year. Woodland or forest land pastured under a per-head grazing permit was not counted as land in farms and, therefore, was not included in woodland pastured.

Woodland, total. This category includes natural or planted woodlots or timber tracts, cutover and deforested land with young growth which has or will have value for wood products and woodland pastured. Land covered by sagebrush or mesquite was reported as Permanent pasture and rangeland or Other land. Land planted for Christmas tree production and short rotation woody crops was reported in Cropland harvested, and land in tapped maple trees was reported as Woodland not pastured.
