NASS Mission

- NASS is committed to providing timely, accurate, and useful statistics in service to U.S. agriculture.
  - Conduct surveys year-round and provide objective, unbiased statistics on a predetermined schedule.
  - Conduct the Census of Agriculture every five years - only source of consistent, comparable, & detailed agricultural data for U.S. counties.
  - Safeguard the privacy of data providers.
GIS Spatial and Statistical Data

- State/county survey & census data
- State & county-level boundaries
- Cropland Data Layer & NDVI
- Interactive maps & tables
- Static maps & graphs

Data and Statistics

Quick Stats (Agricultural Statistics Data Base)

NASS publishes U.S., state, and county level agricultural statistics for many commodities and data series. Quick Stats offers the ability to query by commodity, state(s) and year(s), providing the most up-to-date statistics including all revisions. The query dataset can be downloaded for easy use in your database or spreadsheet.

- Query our Quick Stats Data Base

Additional Crops County Resources

Maps of crops county estimates for acreage and yield are available from NASS as both CSV data files and maps.

County data from Quick Stats data is also available in pre-extracted data sets by year and by crop.

Maps and Cartographic Resources

Agricultural Atlas Maps | Star Tree Map Index | Cartographic Boundary Files

The cartographic boundary files are generalized, digital vector files of state- and county-level geographic areas for which 2002 Census of Agriculture data are reported. The cartographic boundary files can be used with Geographic Information System (GIS) software as a base for medium to small-scale thematic mapping.

These boundary files are not map images. They were developed to support USDA-NASS projects involving map production for the 2002 Agricultural Atlas of the United States.

The cartographic boundary files on this site are in ESRI™ shapefile format.
