**United States Department of Agriculture**

National Agricultural Statistics Service

March 31, 2022
Planted acres are used for corn, sorghum, oats, barley, rye, winter wheat, Durum wheat, other spring wheat, rice, soybeans, peanuts, sunflower, cotton, dry edible beans, chickpeas, potatoes, sugarbeets, canola, and proso millet. Harvested acreage is used for all hay, tobacco, and sugarcane in computing total area planted. Estimates carried forward from previous year for proso millet, potatoes, rye, and sugarcane.
NASS implemented program changes beginning with the 2019 crop year. Full details of the changes can be found at [https://www.nass.usda.gov/Surveys/Program_Review/index.php](https://www.nass.usda.gov/Surveys/Program_Review/index.php). The Planted (Adjusted) line in the chart above provides principal crop totals for comparable estimates across all years.
