Certified Organic Highlights

The 2015 Certified Organic Survey is a survey of all operations identified as having certified organic production. Certified organic farms must meet the standards set out by USDA’s Agricultural Marketing Service’s (AMS) National Organic Program (NOP) and be certified compliant by an approved agent of NOP. Results from the survey provide acreage, production, and sales data for a variety of certified organic crops and certified organic livestock.

In 2015, the United States had 12,818 certified organic farms that produced \$6.2 billion in certified organic products. Delaware had 3 certified organic farms. Of those farms in Delaware, 100 percent were certified organic for 10 years or more.

In Delaware, 1 certified organic farm sold to wholesale markets and 2 farms sold directly to consumers. The first point of sales for 33 percent of certified organic farms in Delaware was within 100 miles of the farm and 67 percent was within 100-499 miles of the farm.
